

1<sup>st</sup> Grade Math  
Operations &  
Algebraic Thinking  
"I Can"  
Statements

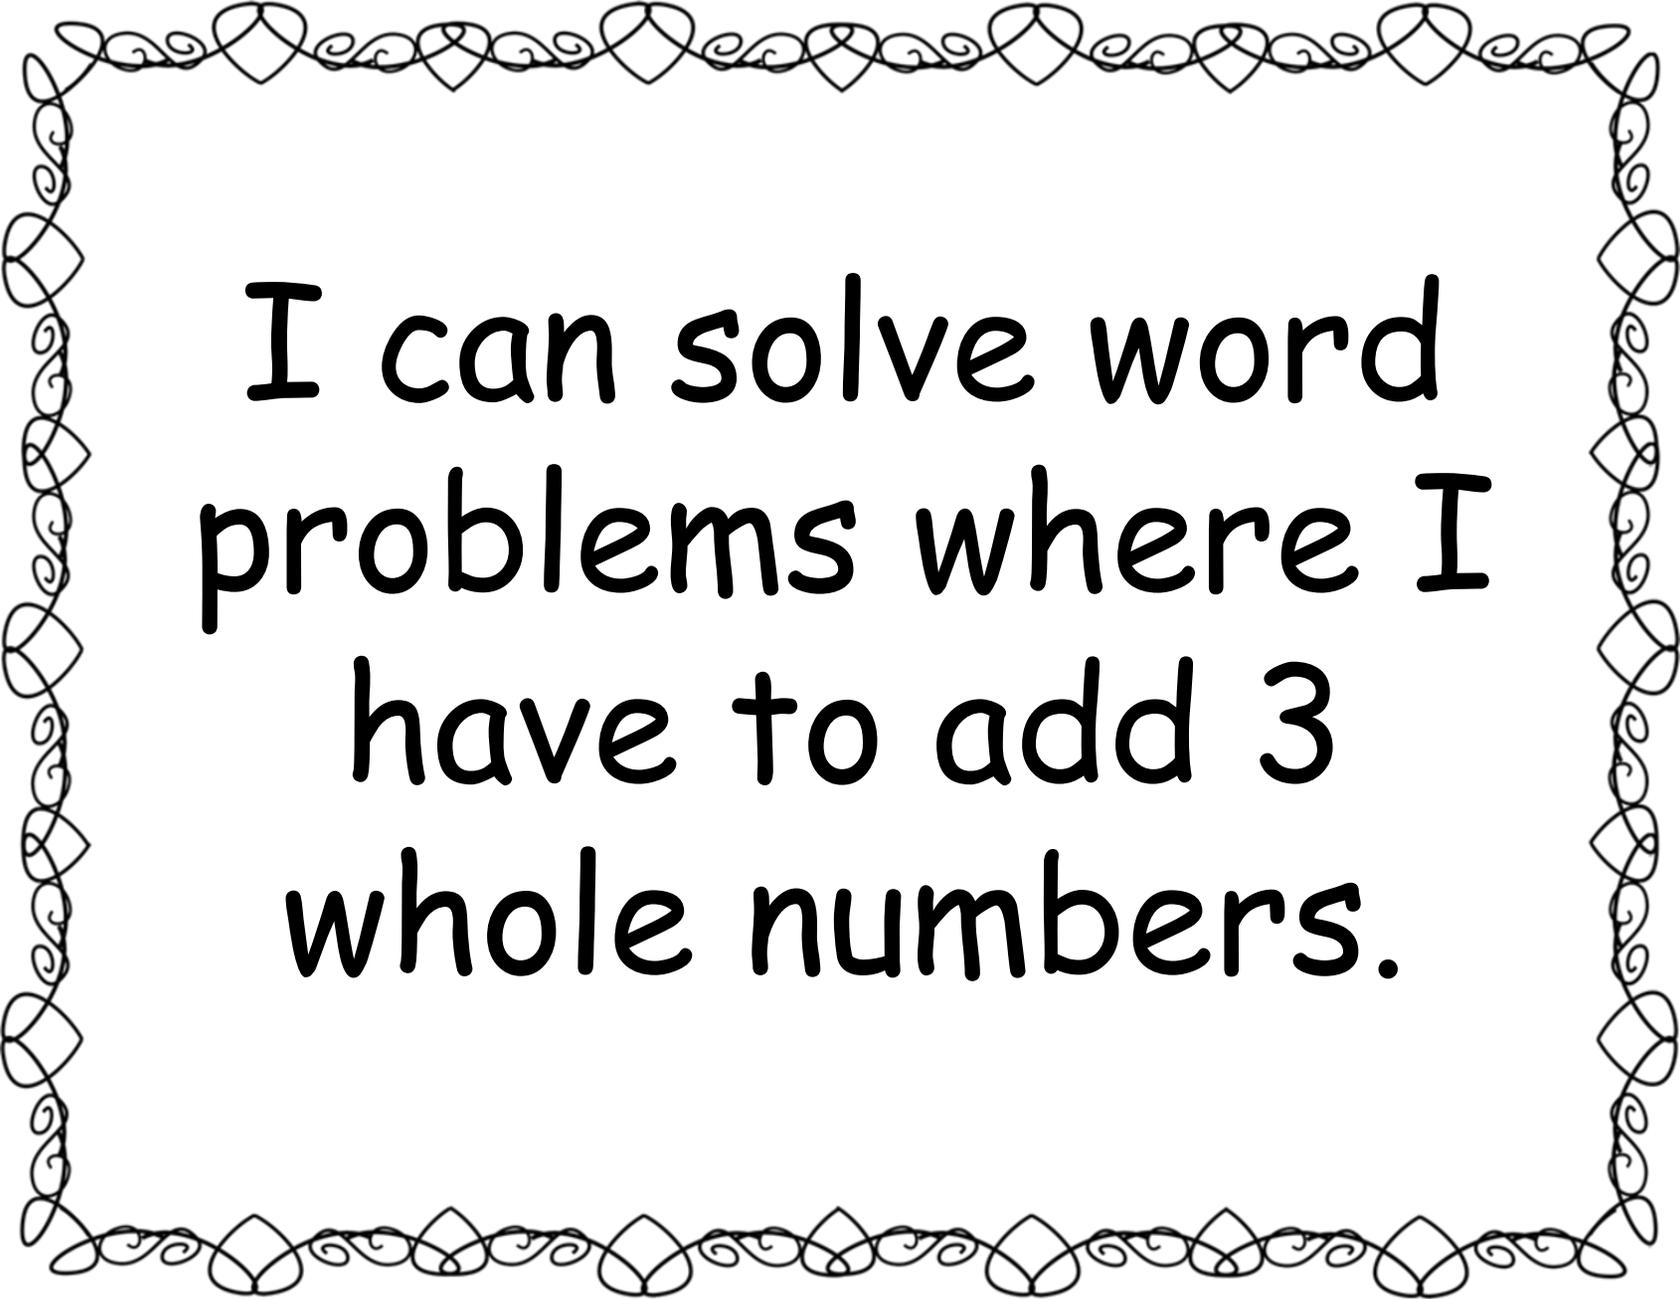

***I can write and  
solve problems  
using addition and  
subtraction.***

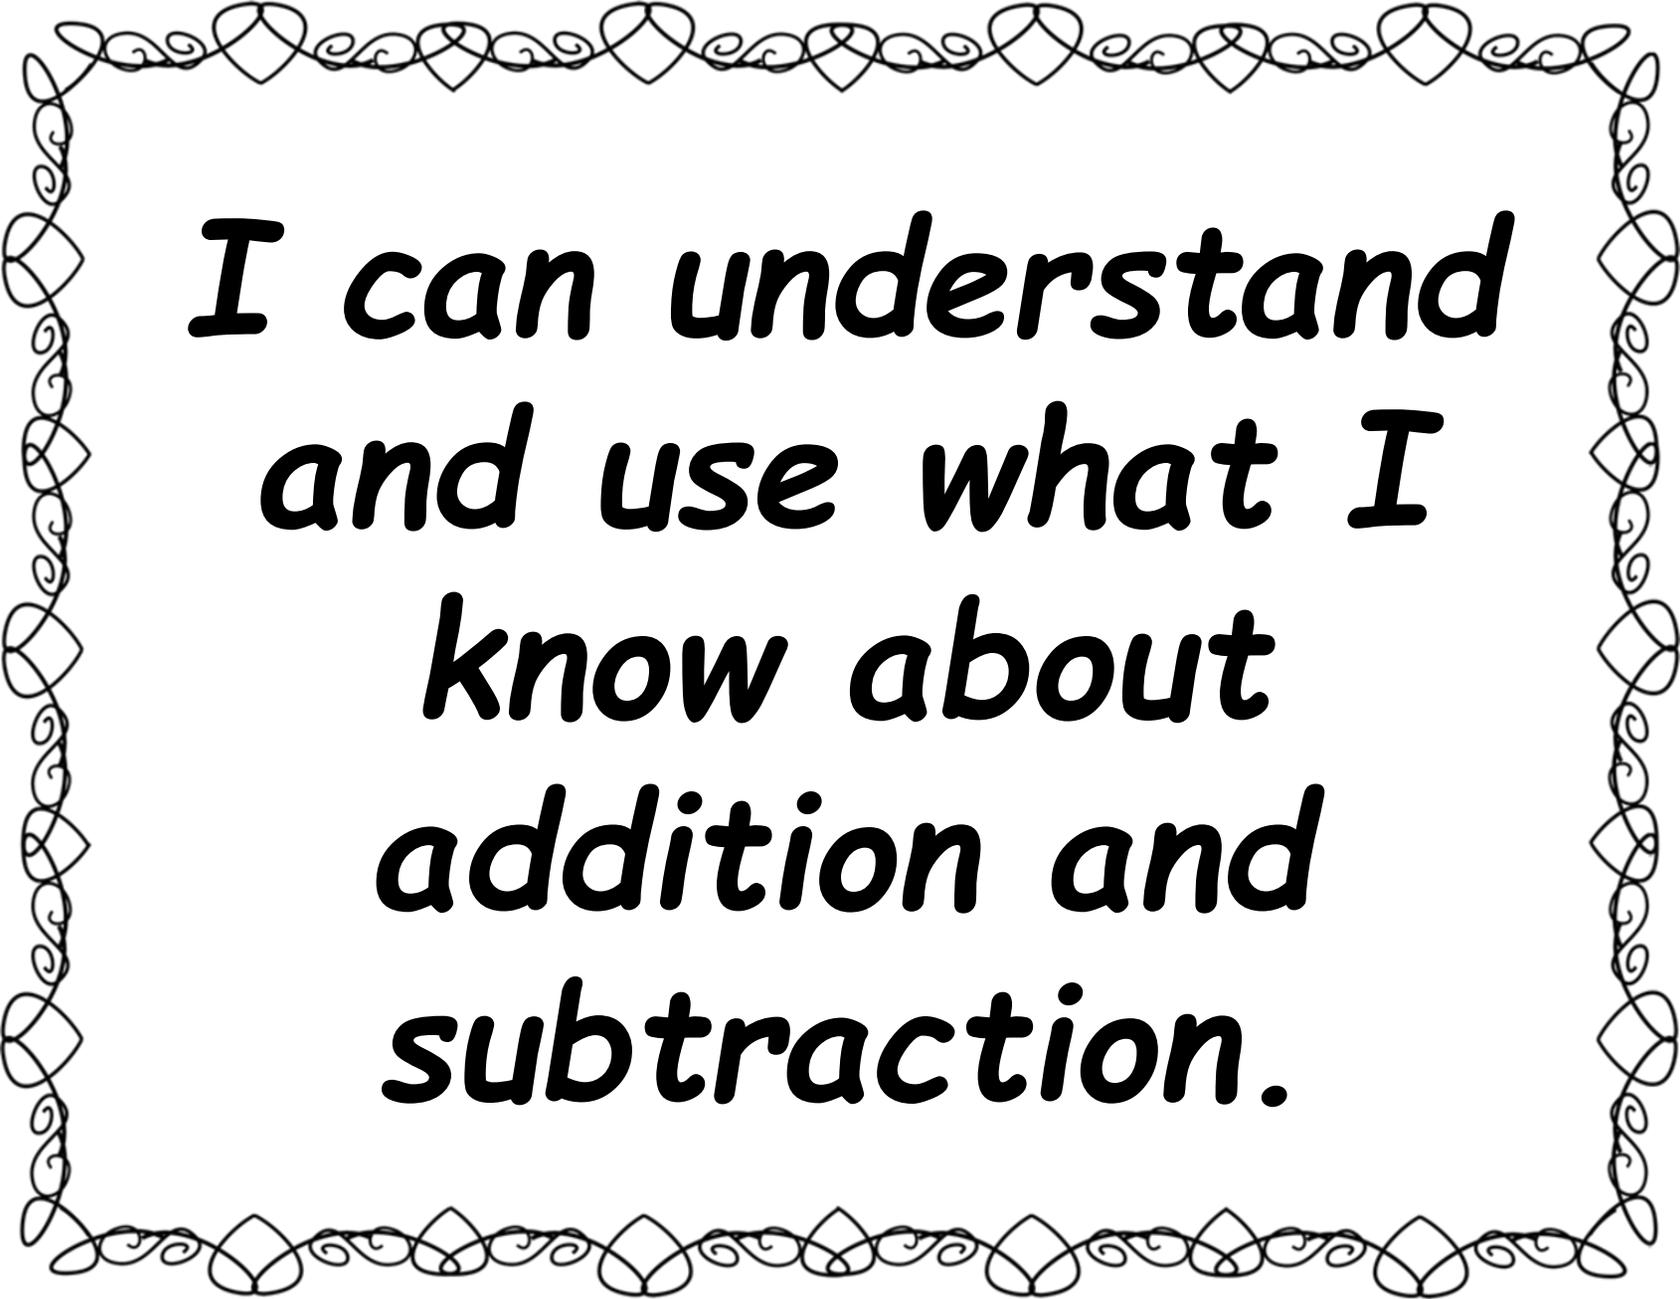

I can use different  
strategies for  
addition to solve  
word problems  
(within 20).

I can use different  
strategies for  
subtraction to solve  
word problems  
(within 20).

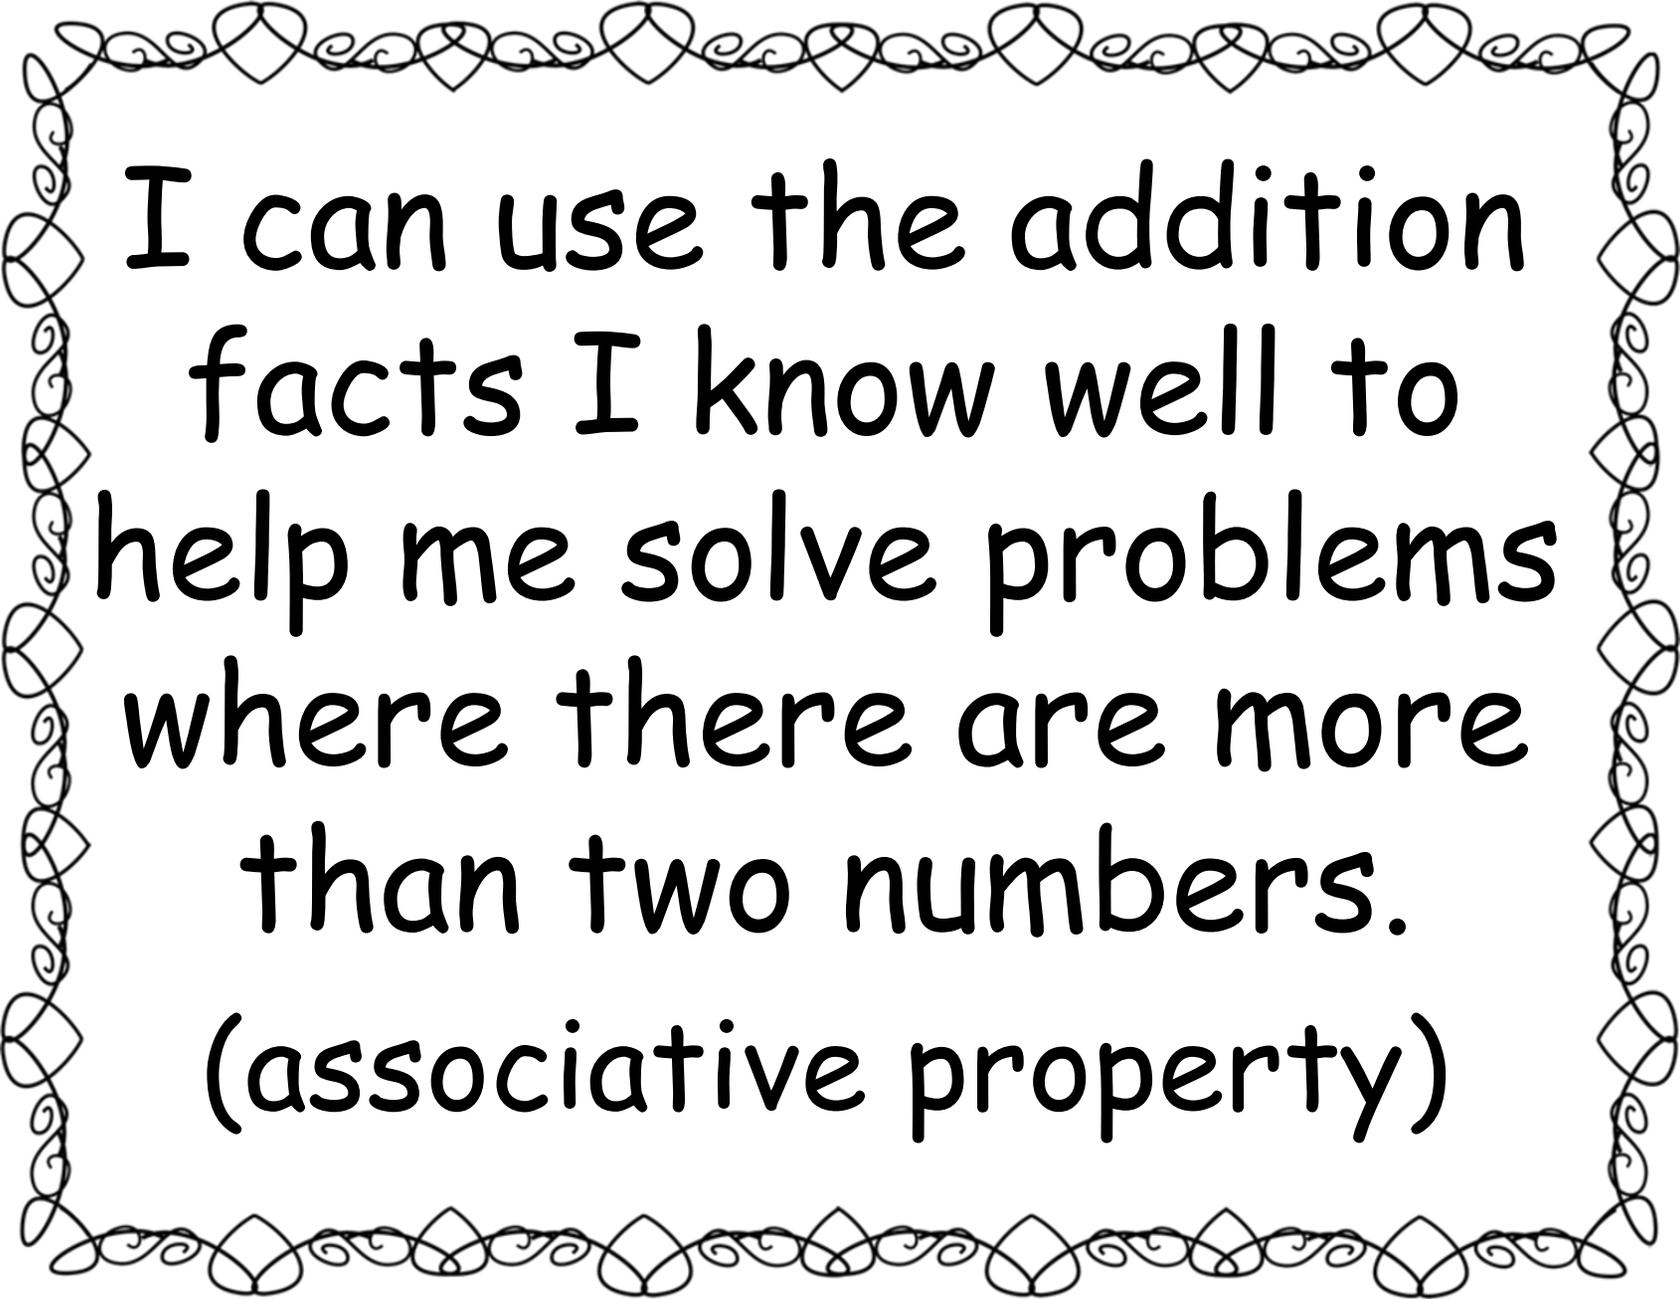

I can solve word  
problems where I  
have to add 3  
whole numbers.

***I can understand  
and use what I  
know about  
addition and  
subtraction.***

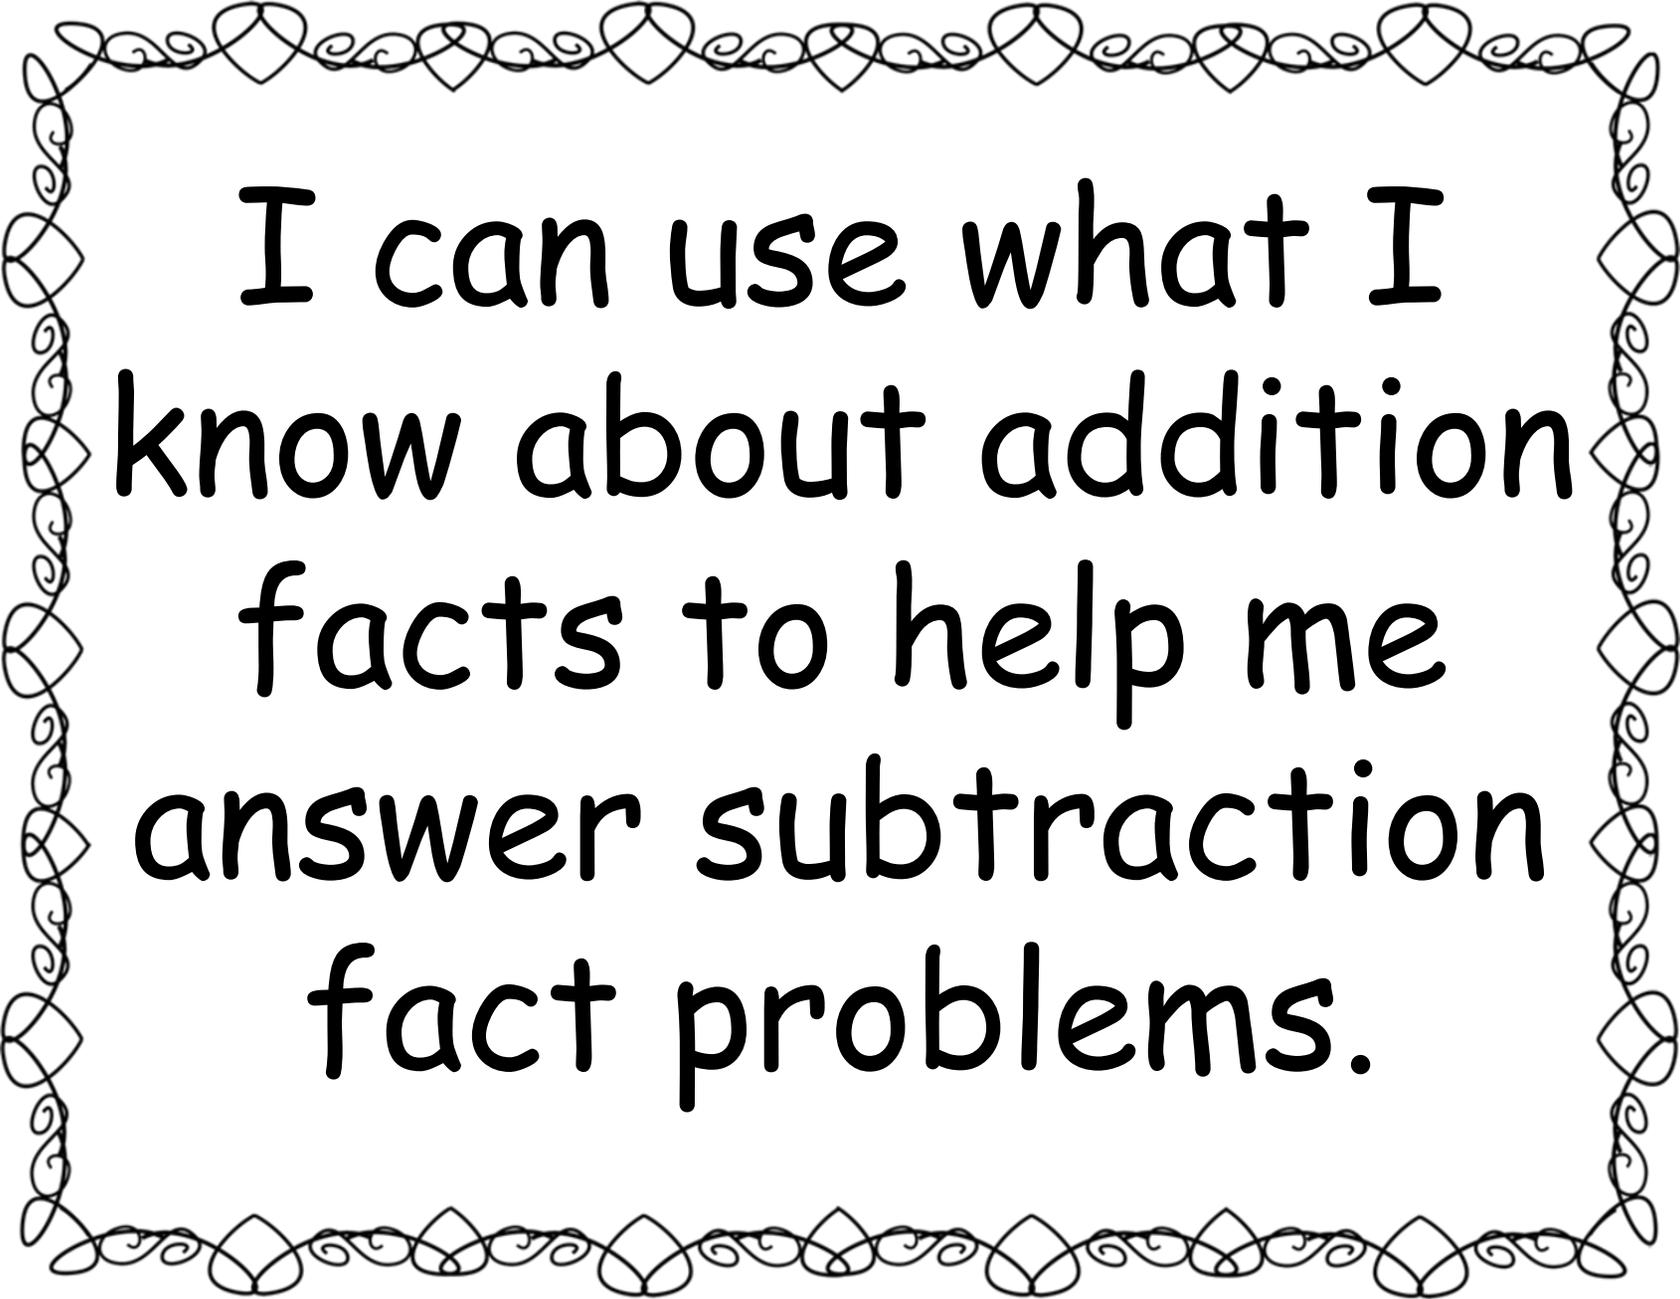

A decorative border made of repeating heart and scroll patterns surrounds the text.

I can use fact  
families to help me  
solve addition  
problems.  
(commutative property)

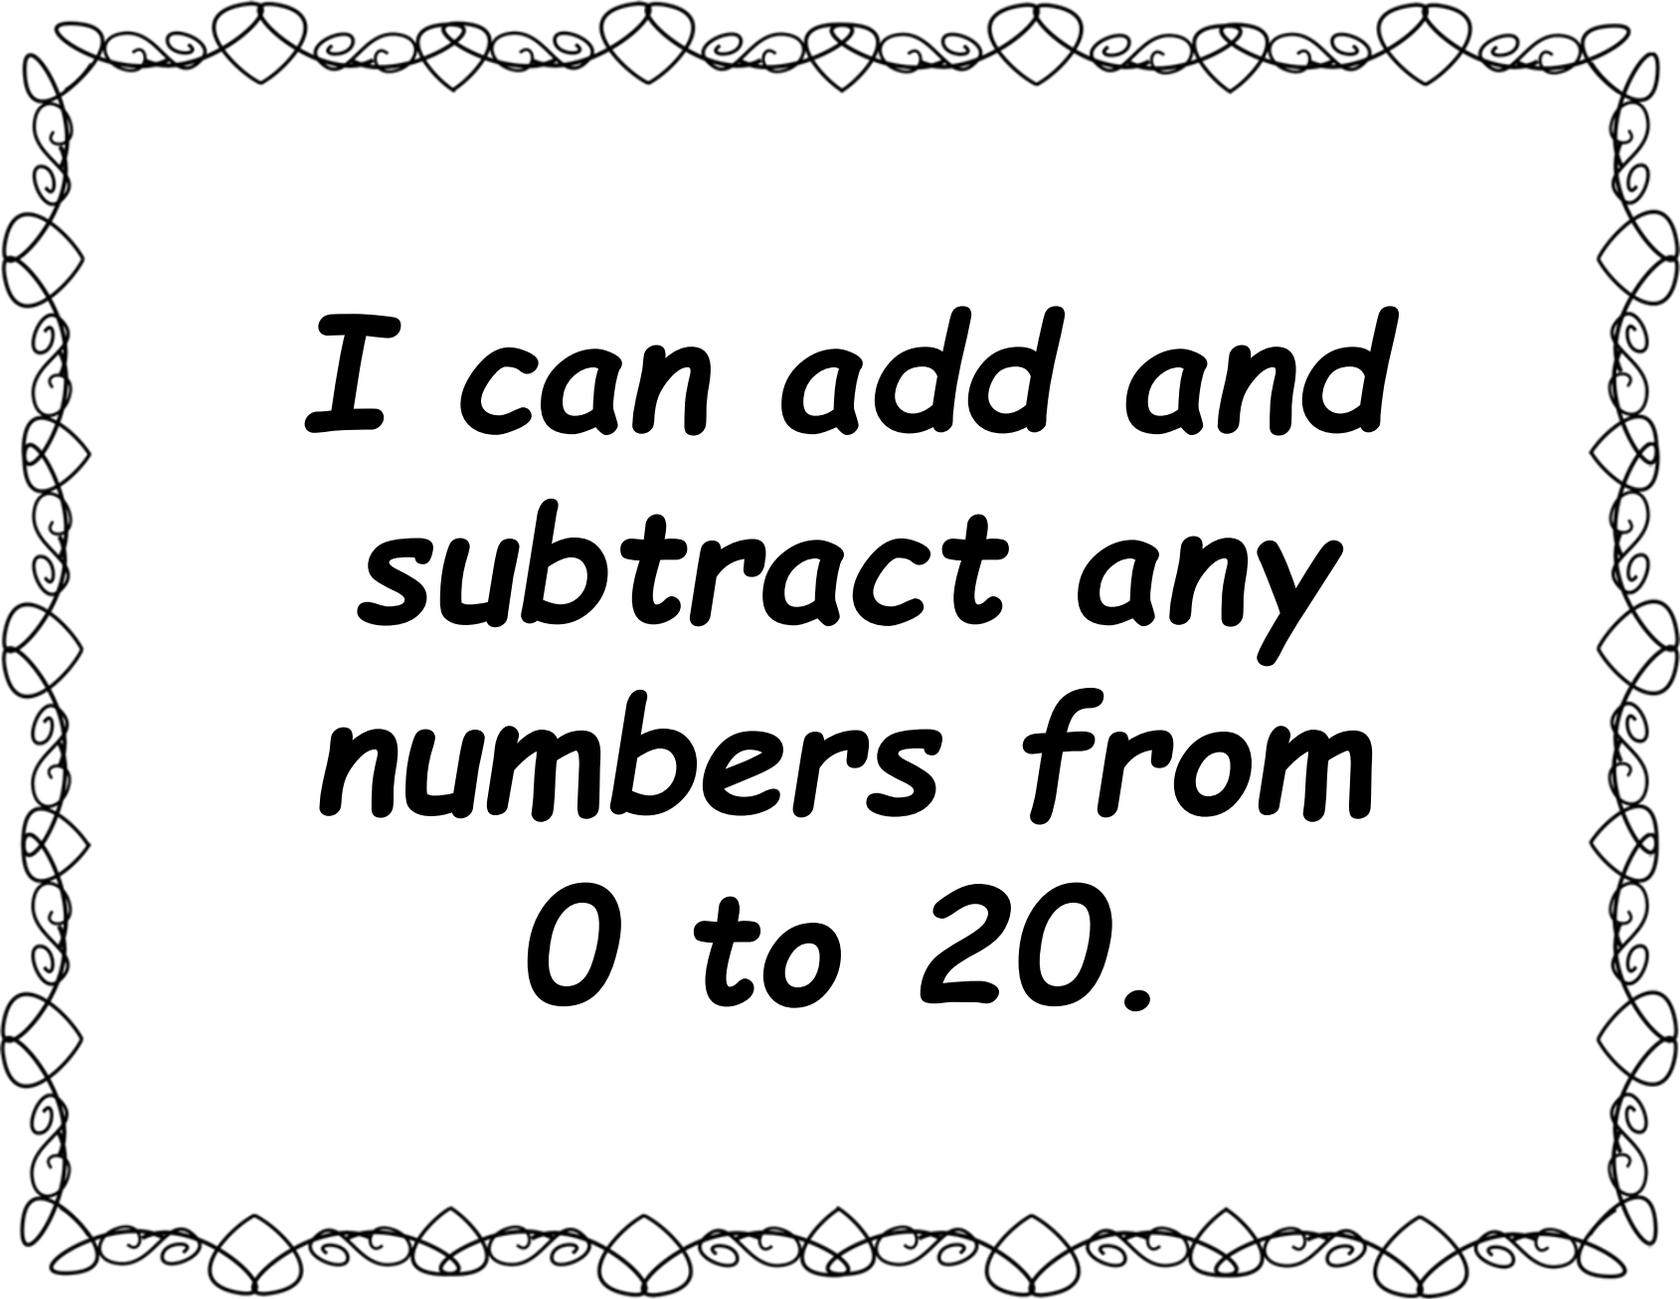

I can use the addition facts I know well to help me solve problems where there are more than two numbers.

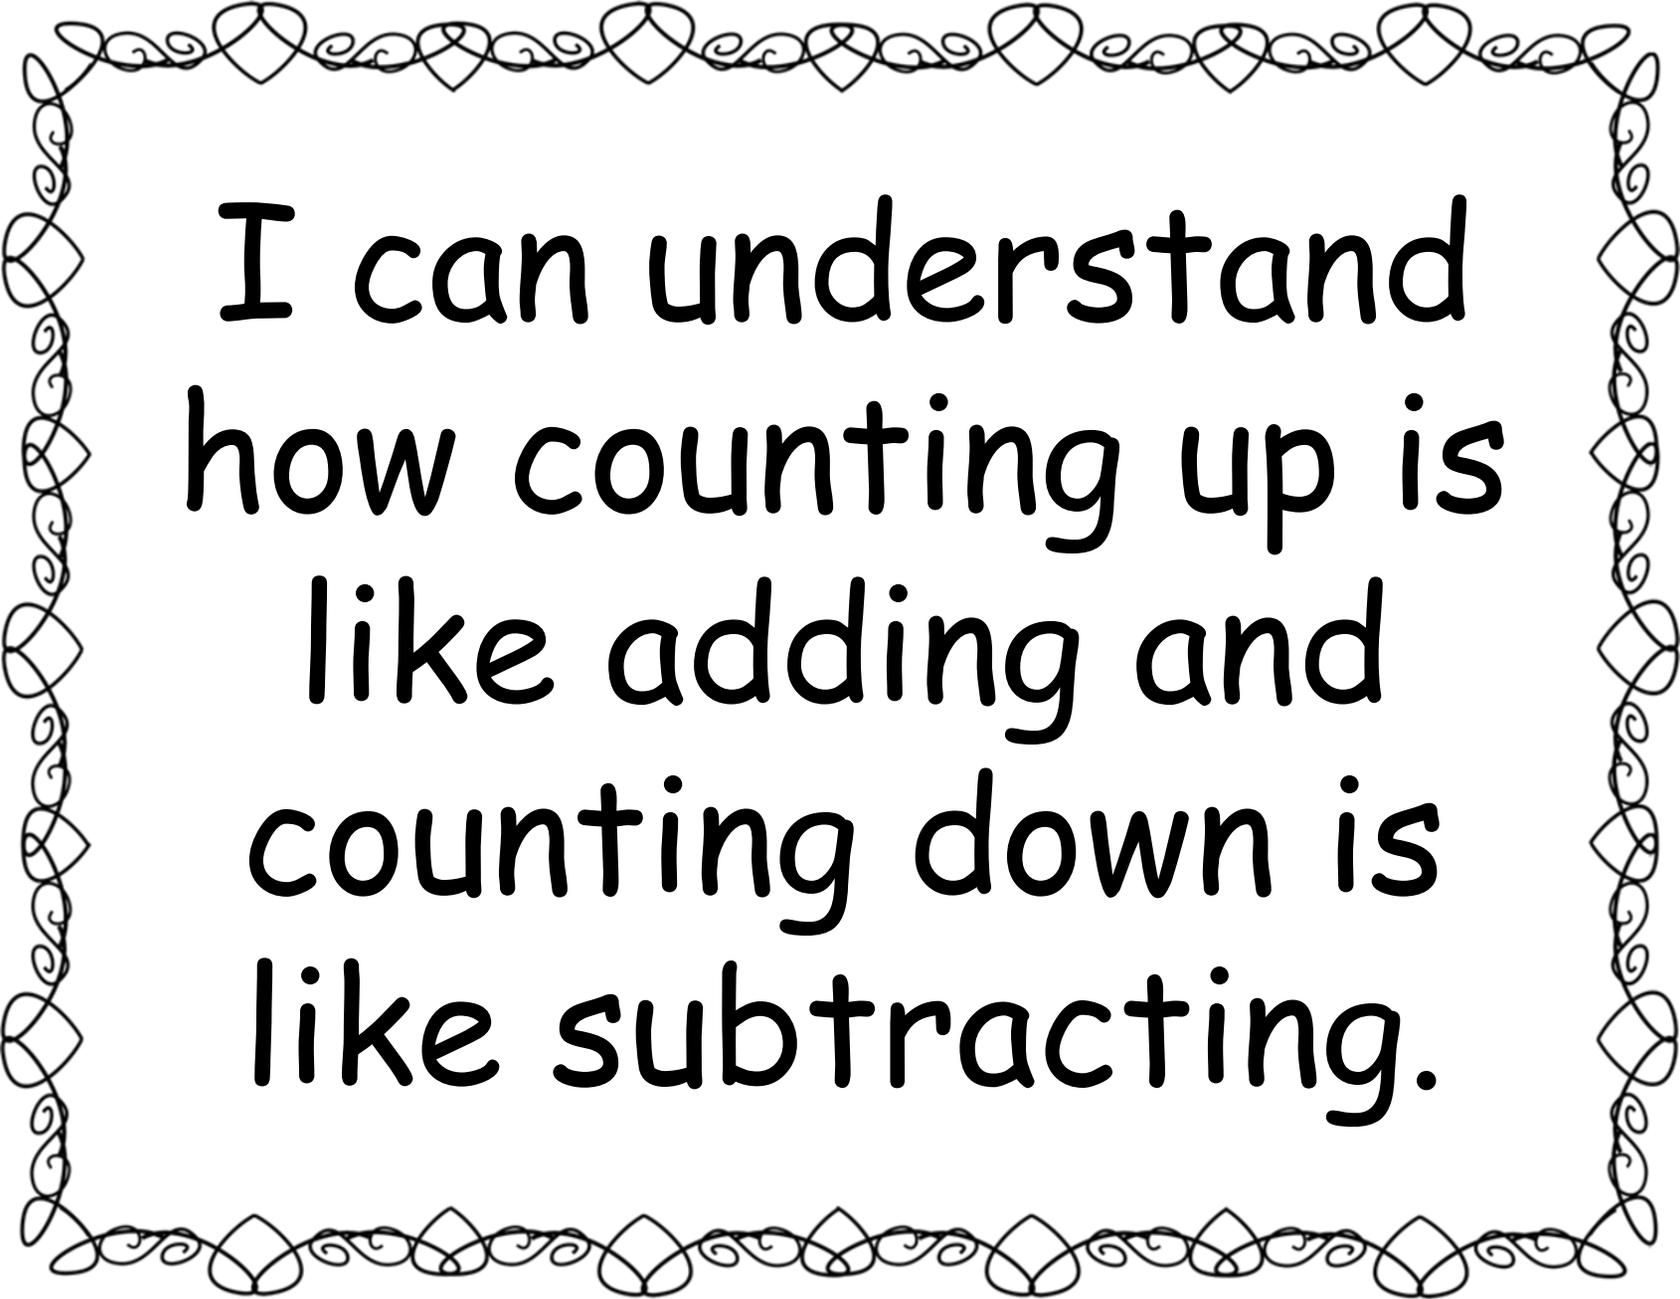

(associative property)

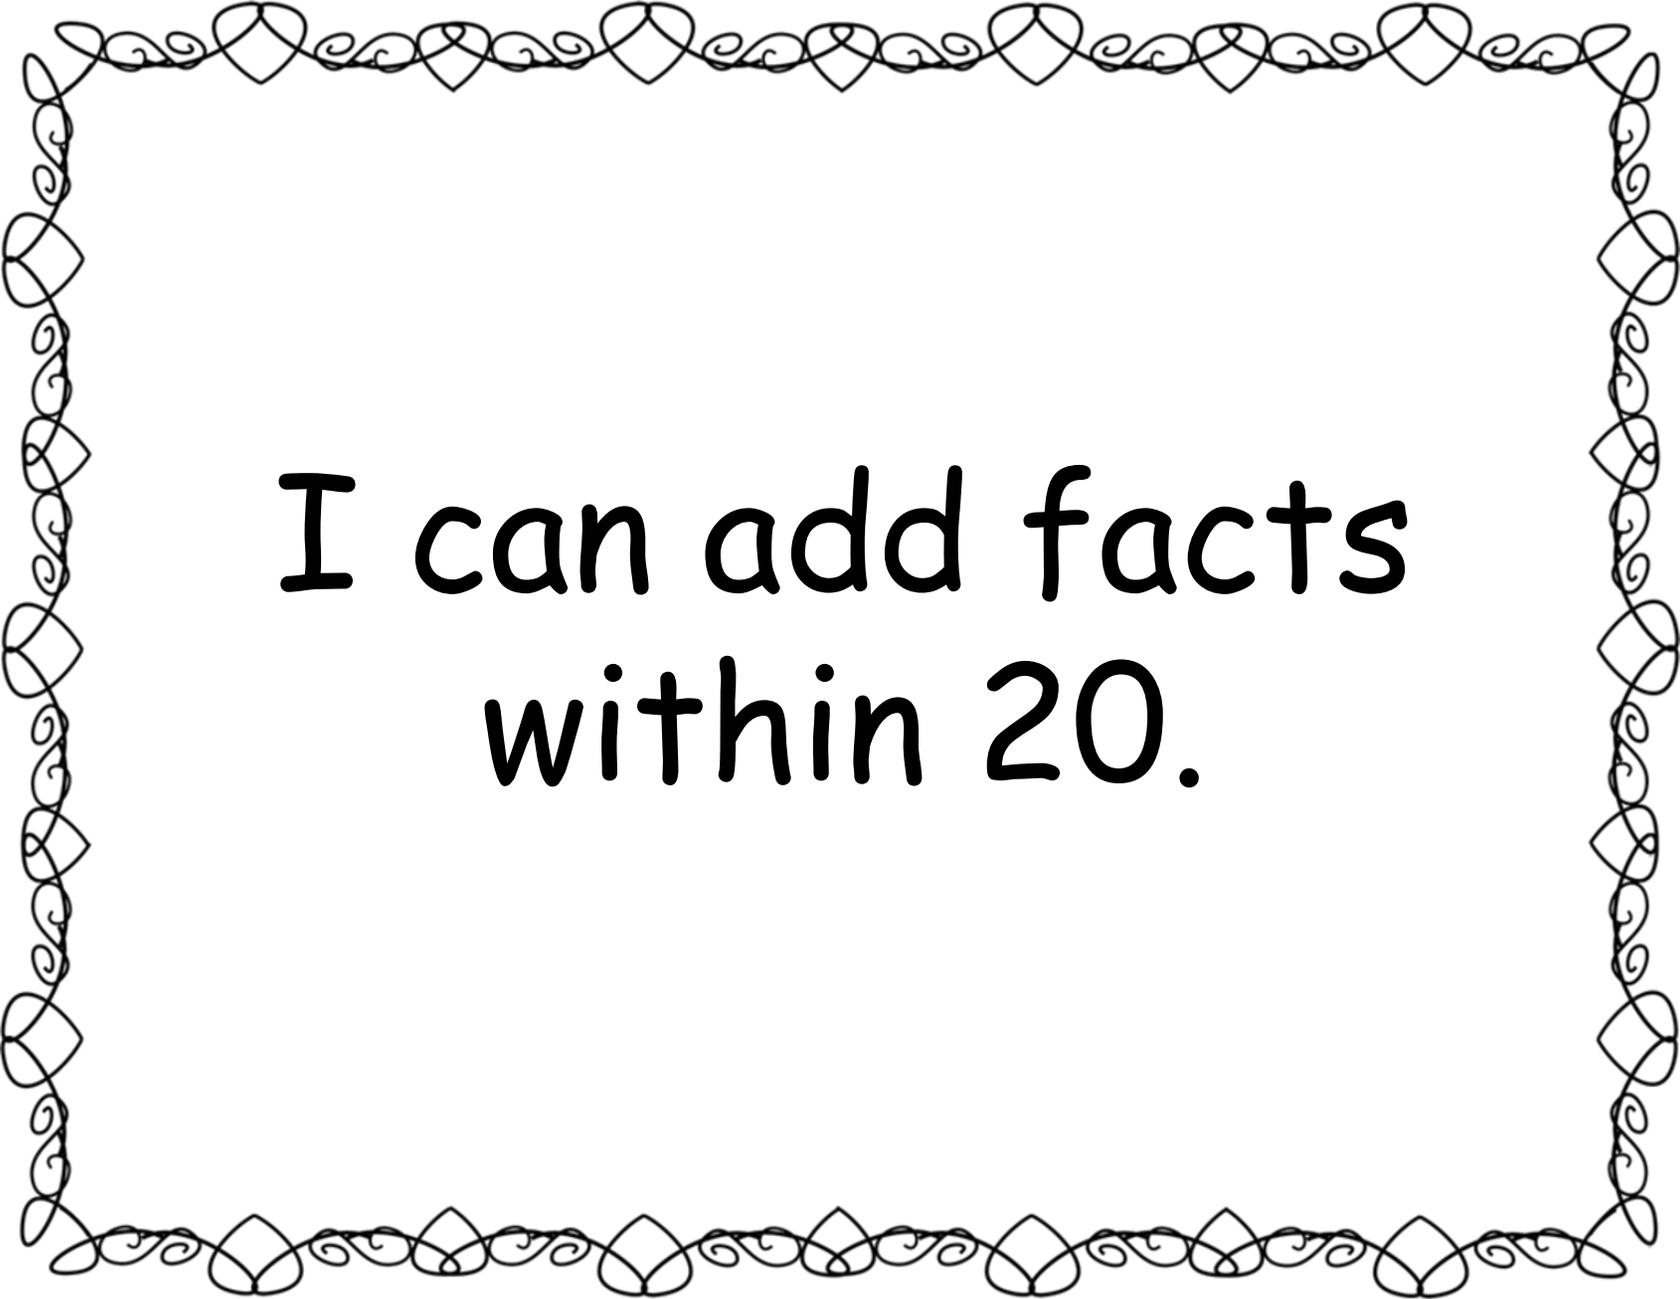

I can use what I  
know about addition  
facts to help me  
answer subtraction  
fact problems.

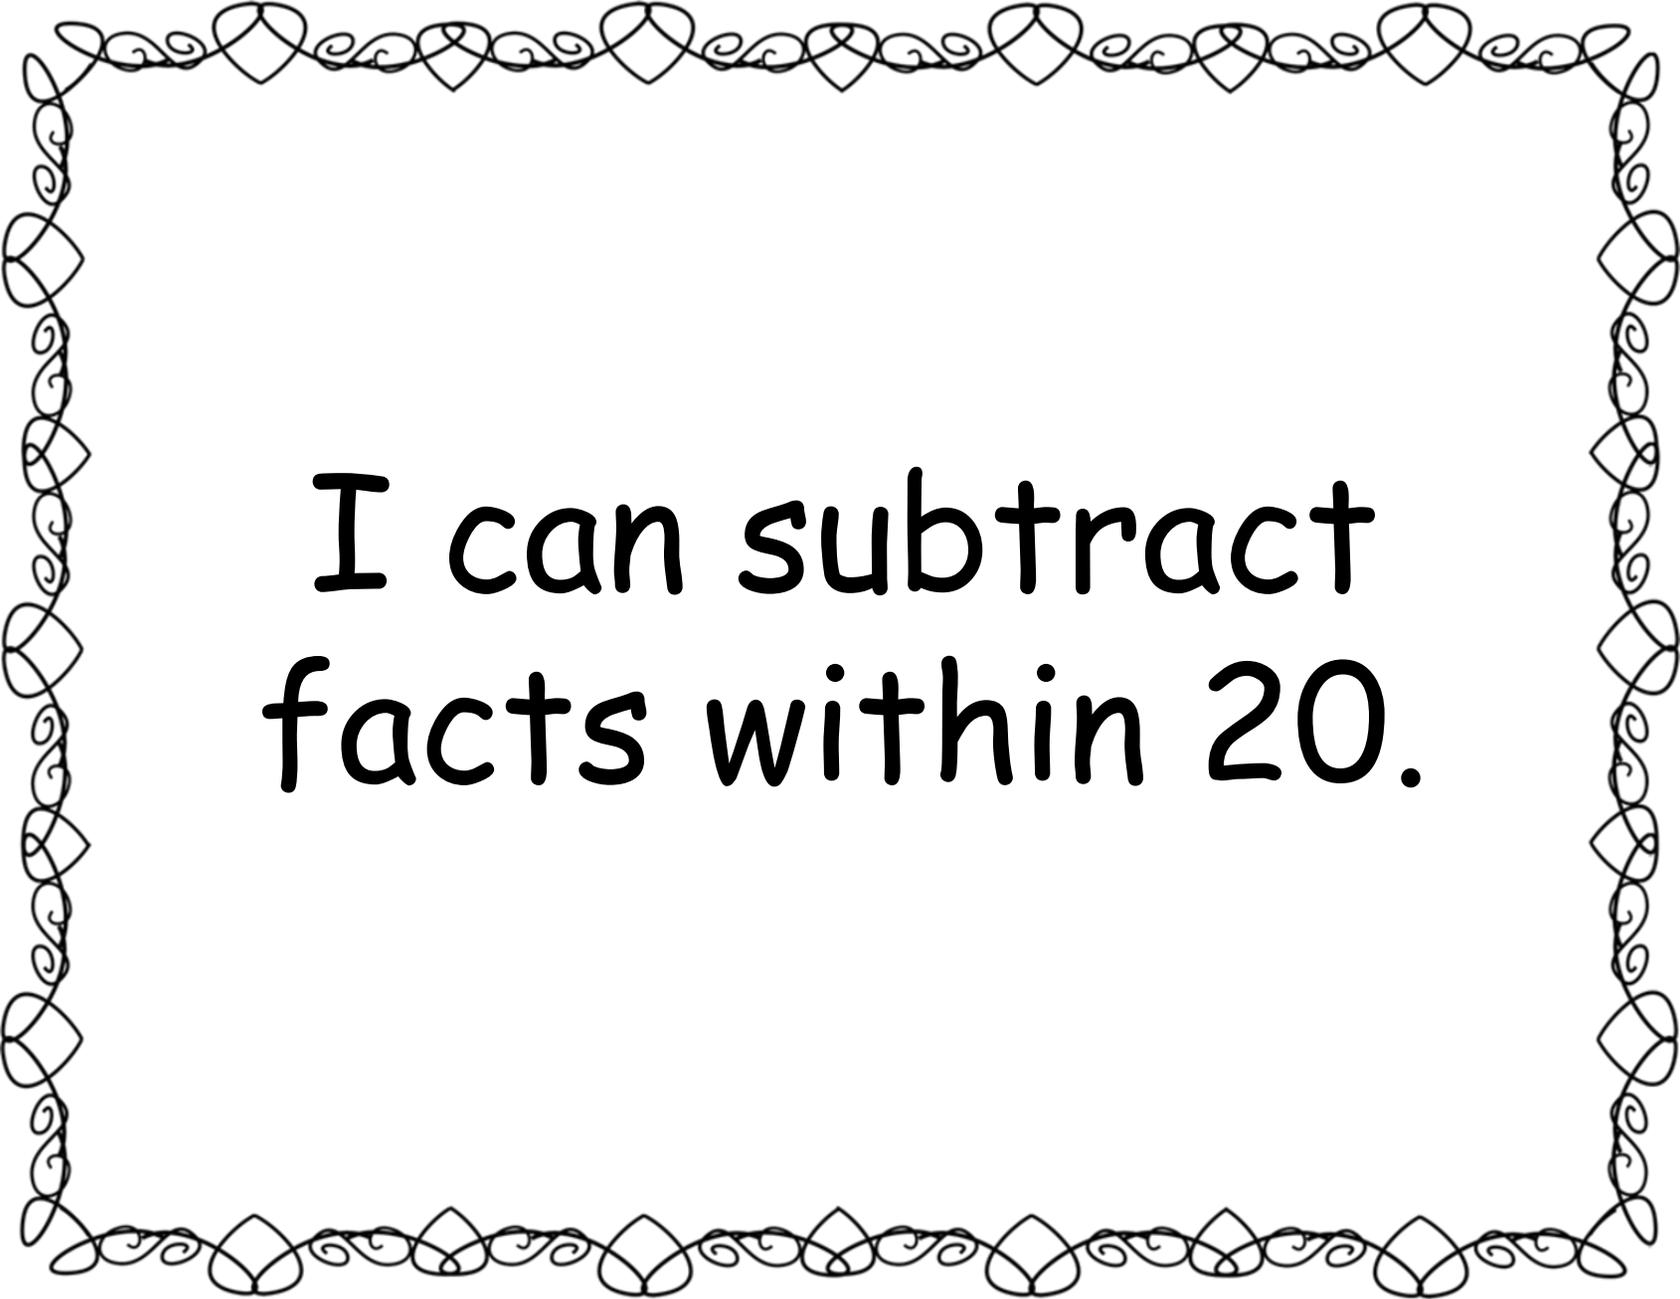

***I can add and  
subtract any  
numbers from  
0 to 20.***

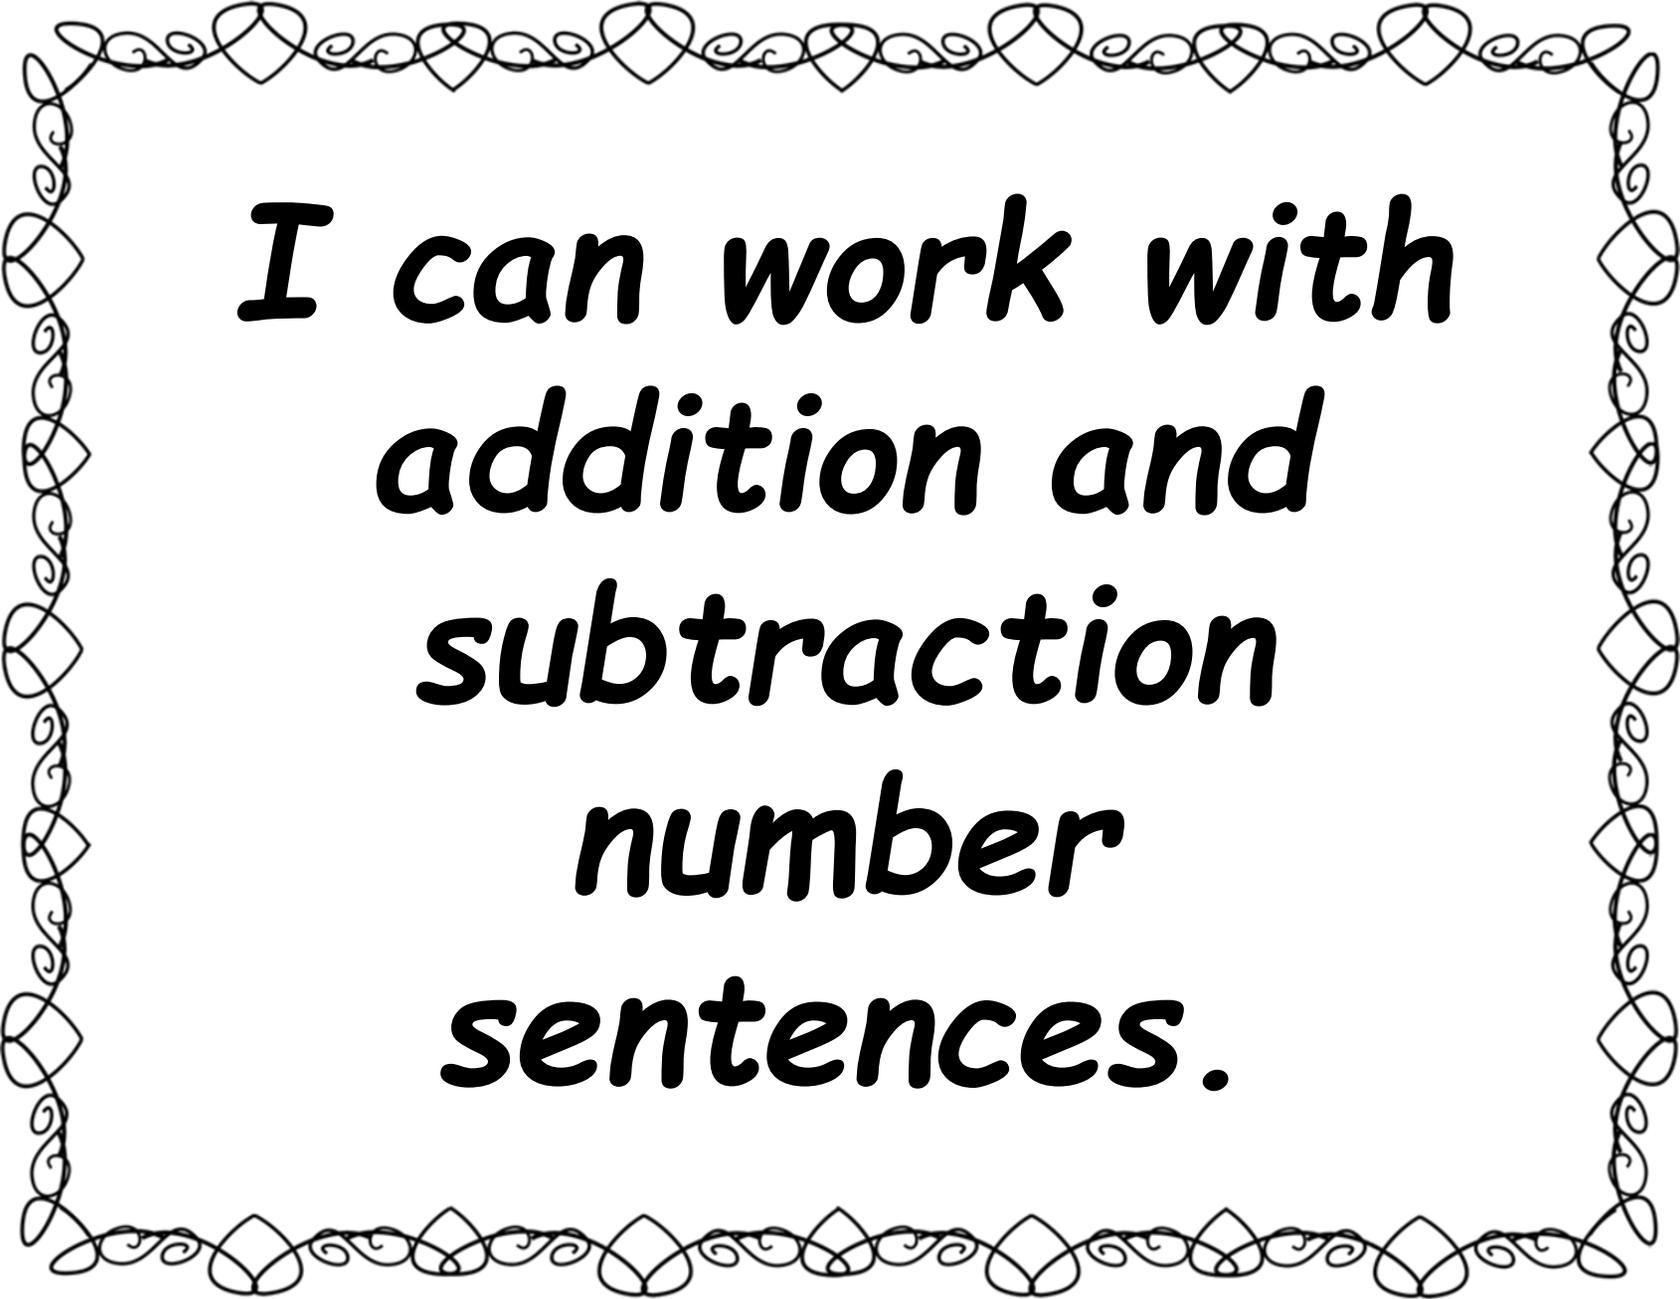

I can understand  
how counting up is  
like adding and  
counting down is  
like subtracting.

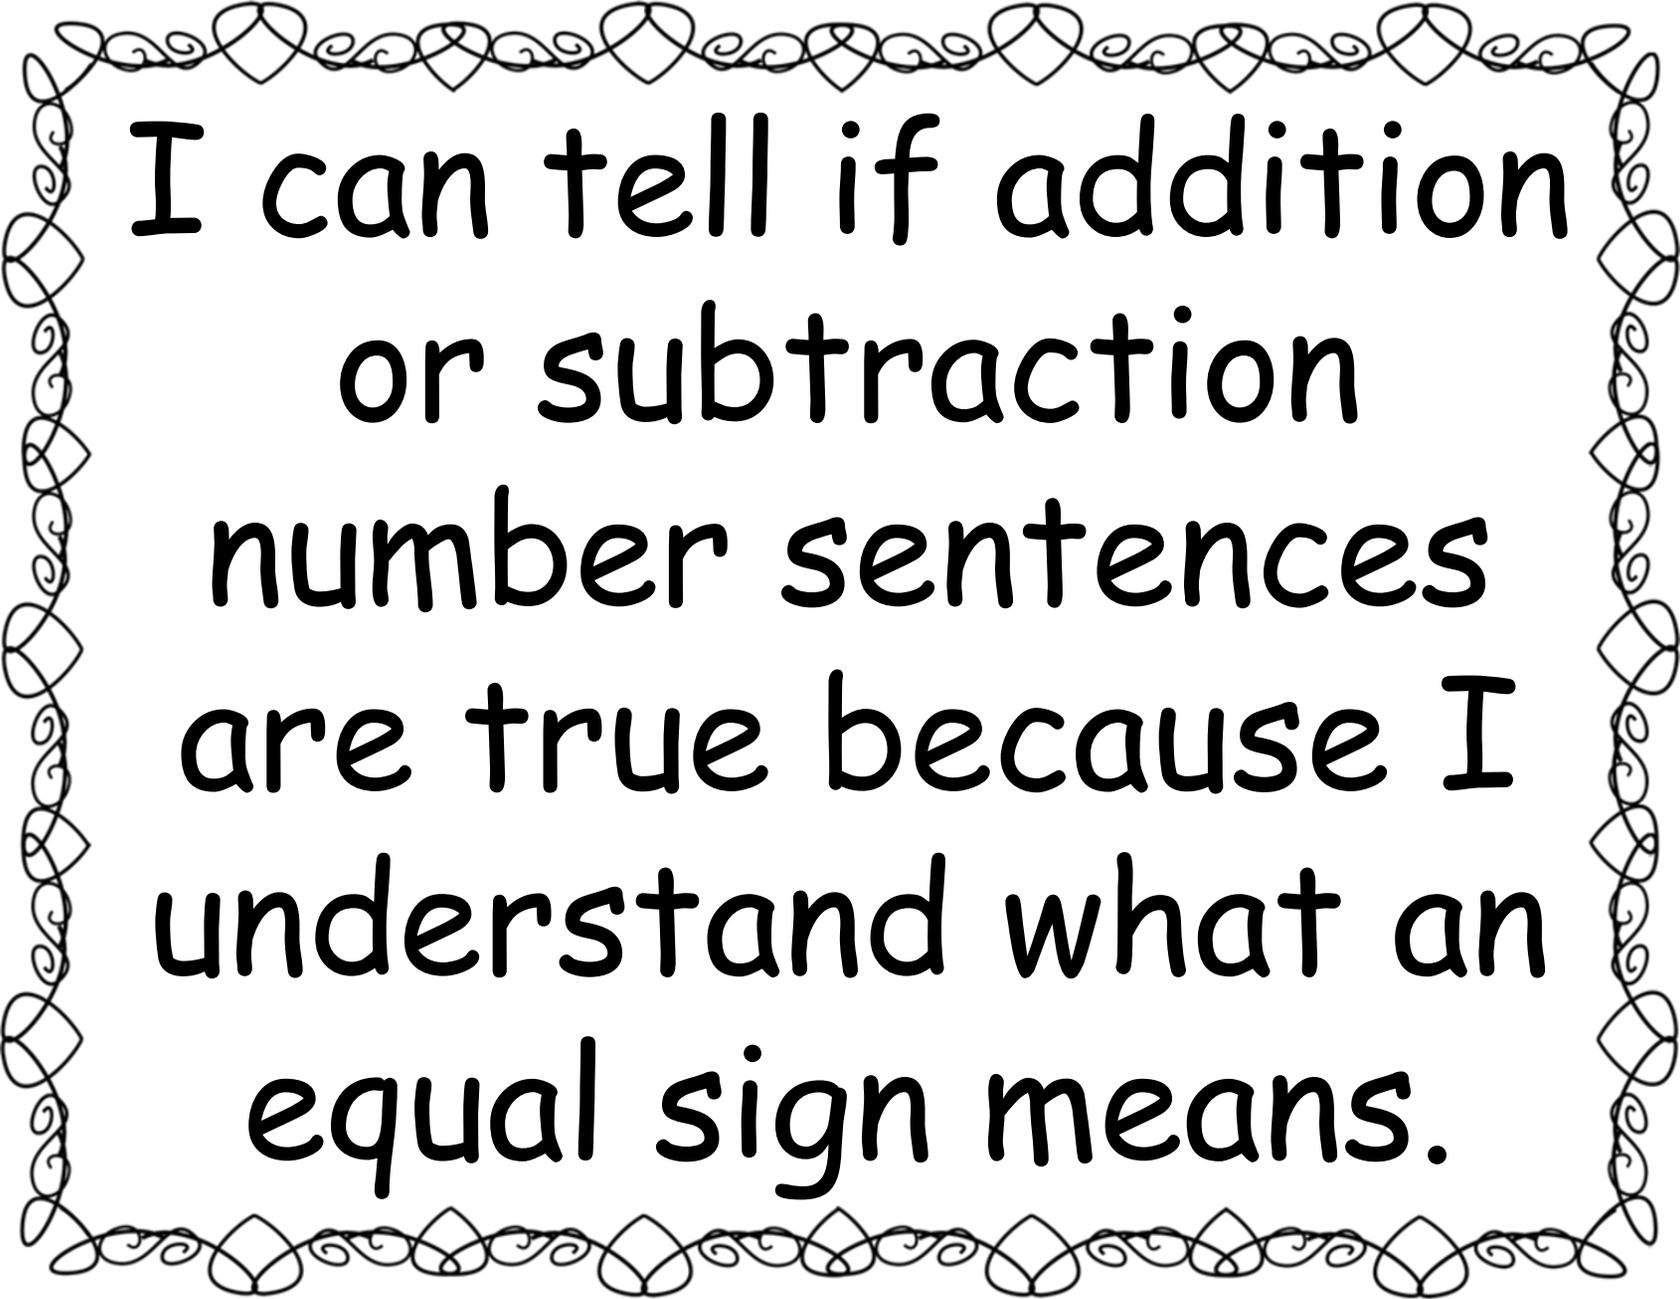

I can add facts  
within 20.

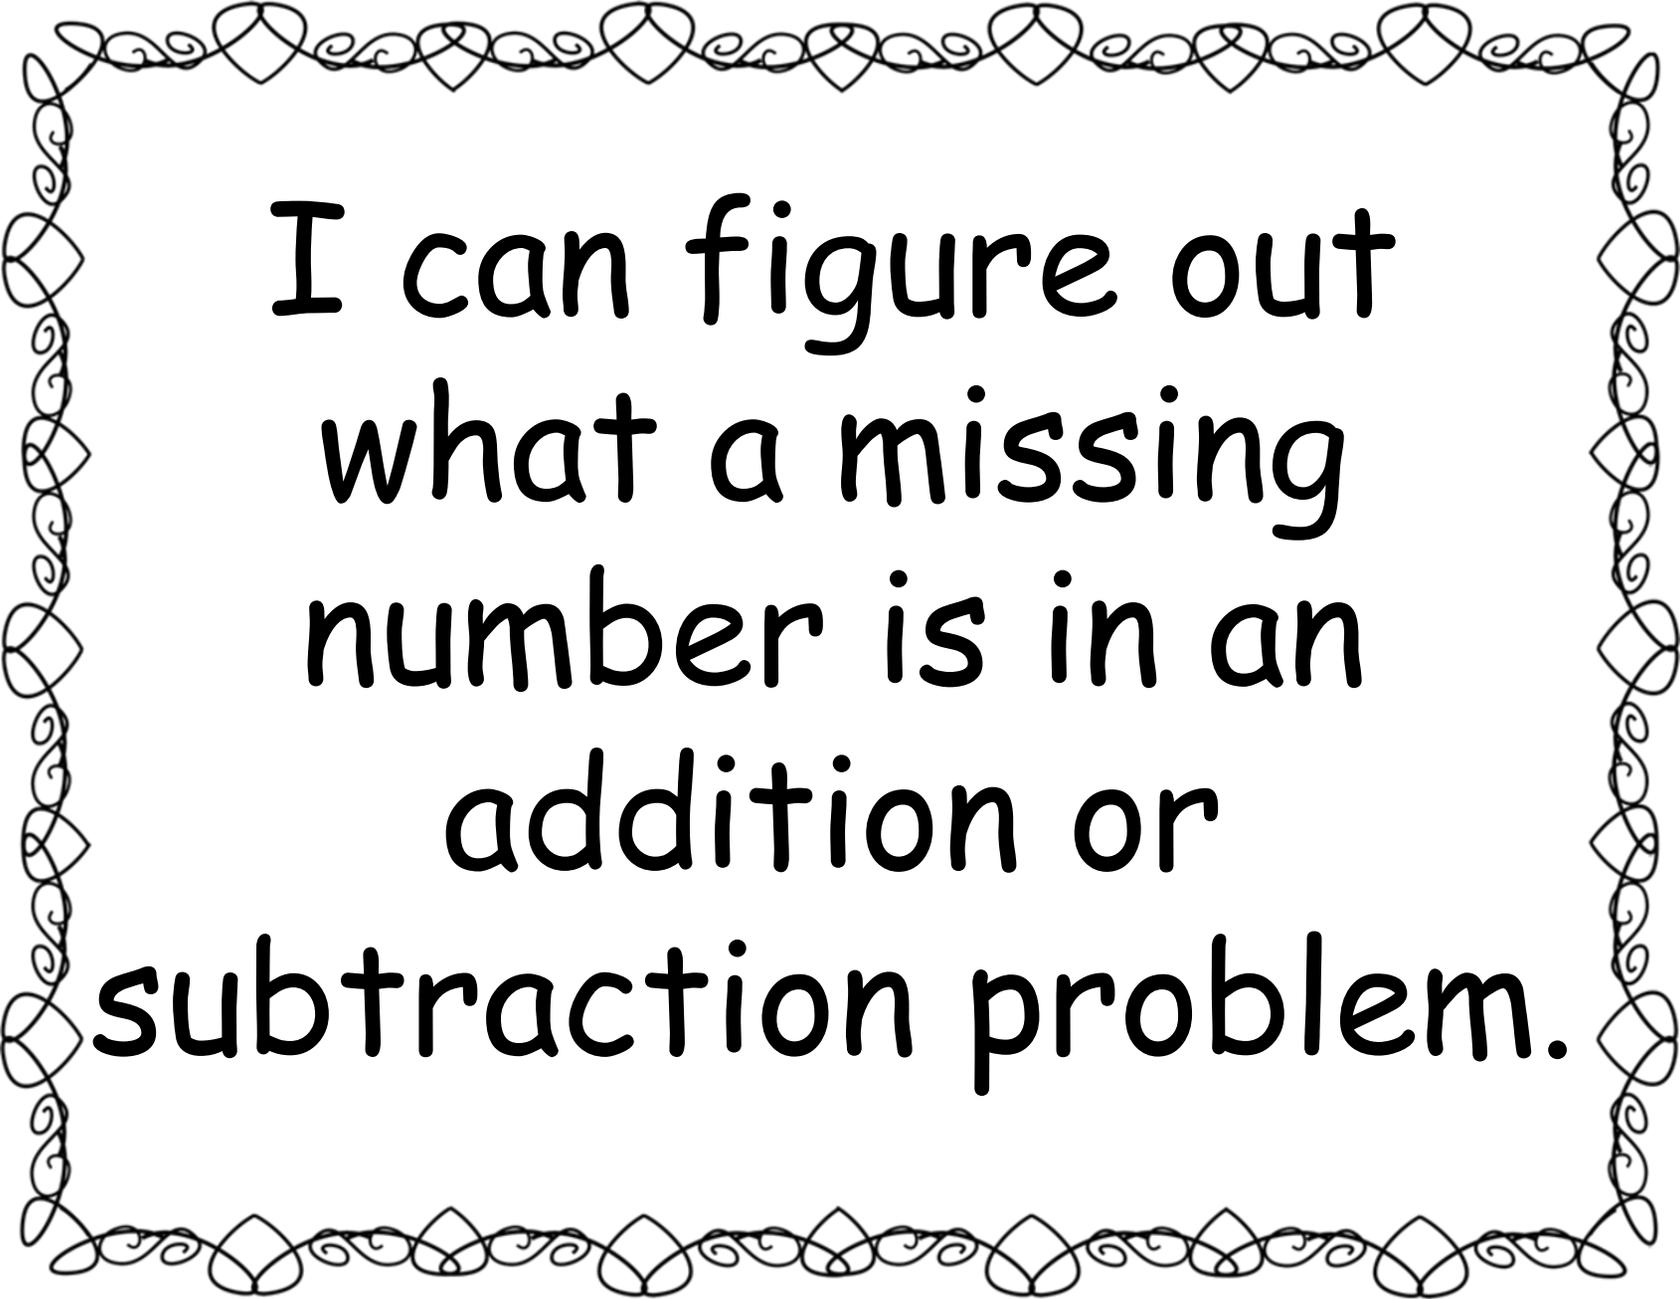

I can subtract  
facts within 20.

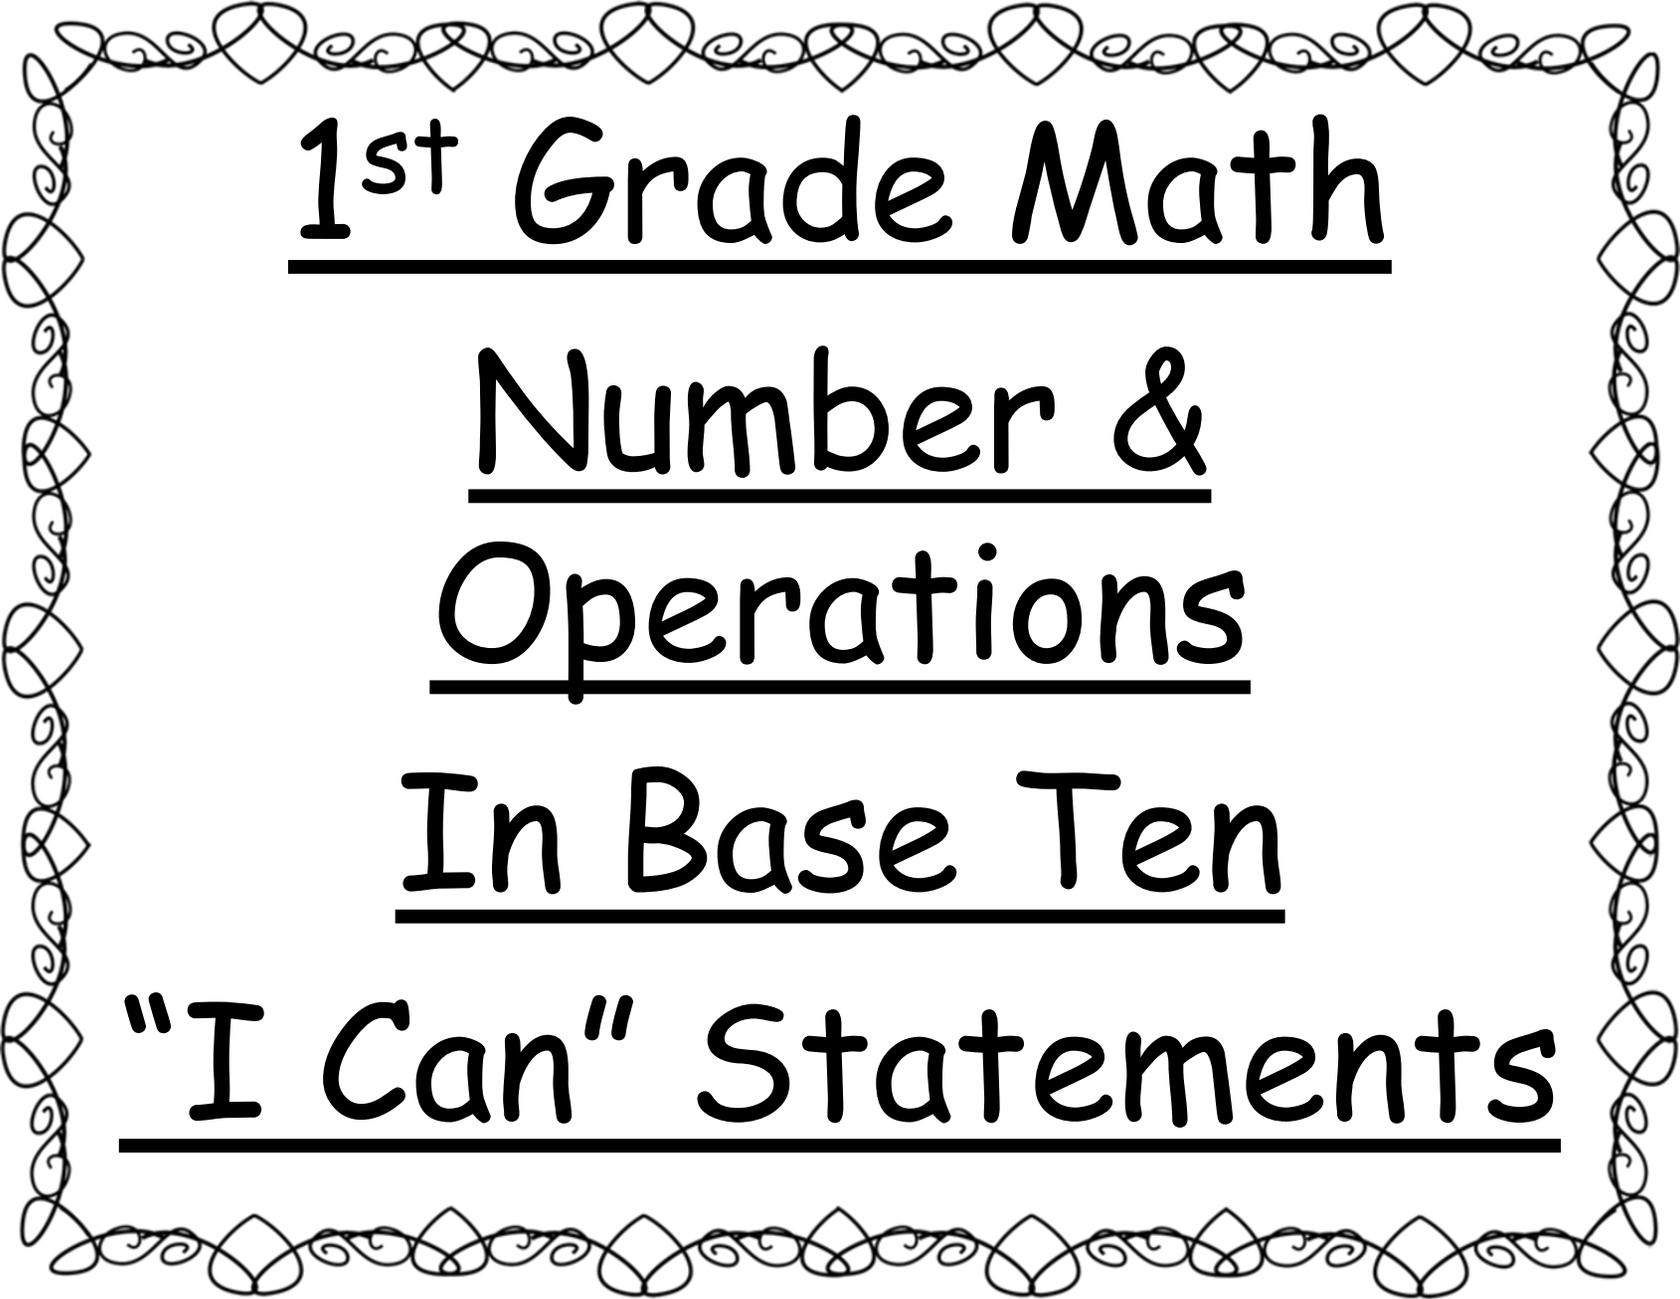

***I can work with  
addition and  
subtraction  
number  
sentences.***

I can tell if addition  
or subtraction  
number sentences  
are true because I  
understand what an  
equal sign means.

I can figure out  
what a missing  
number is in an  
addition or  
subtraction problem.

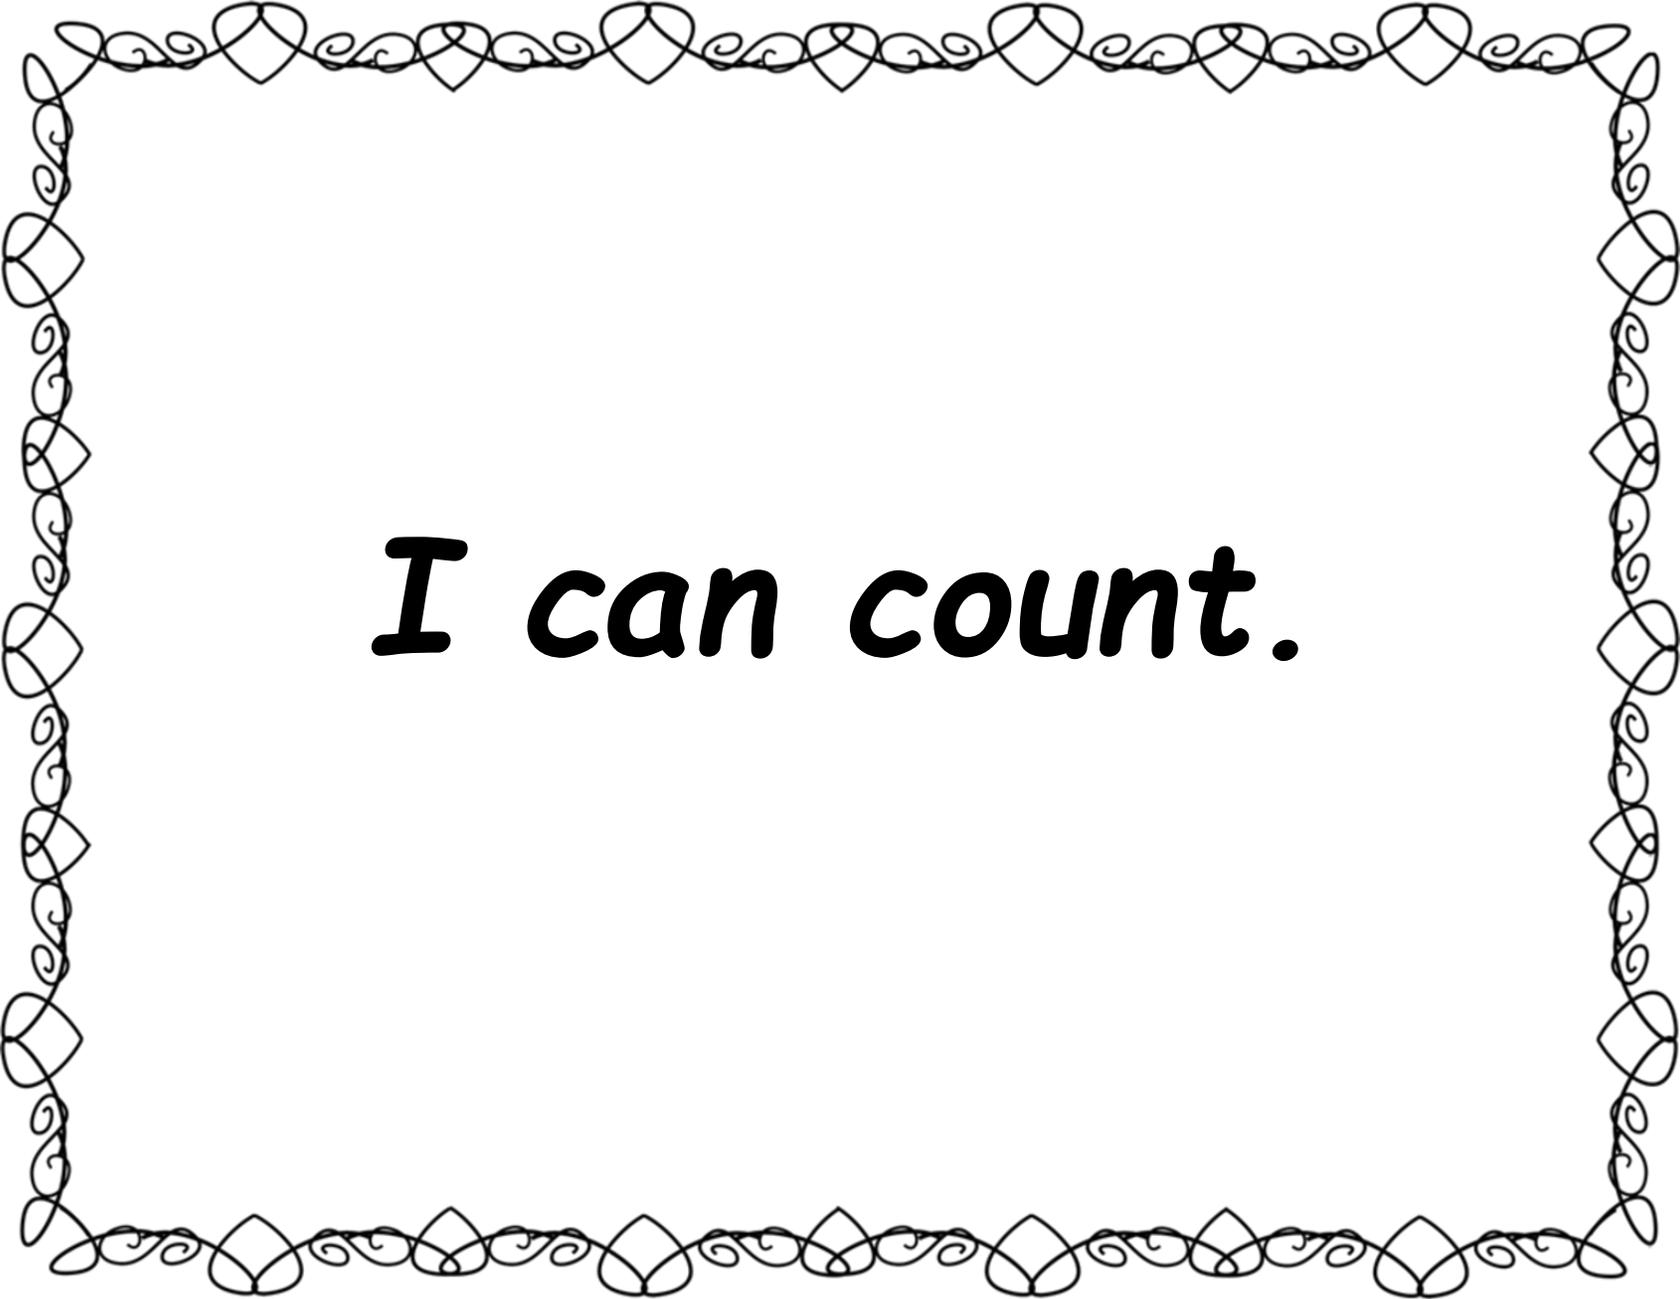

1<sup>st</sup> Grade Math

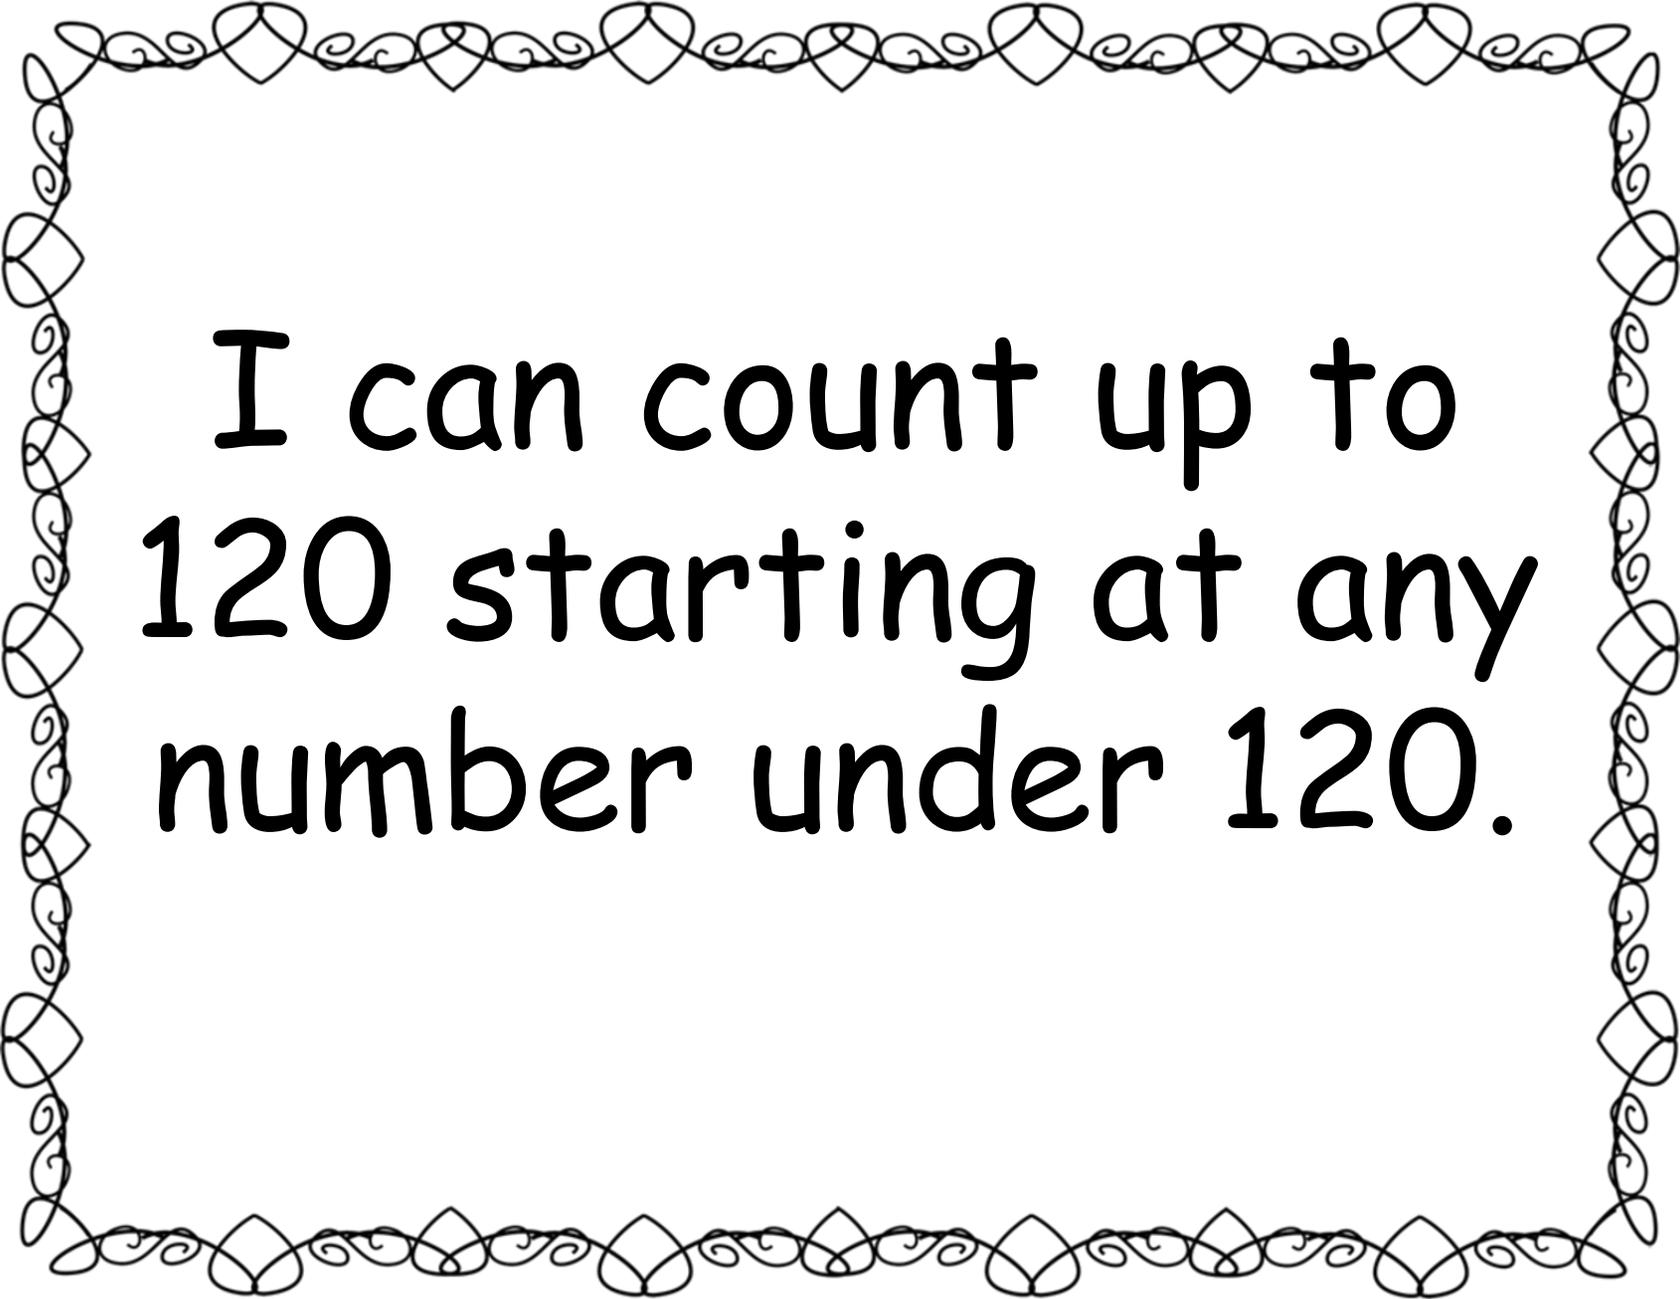

Number &  
Operations

In Base Ten

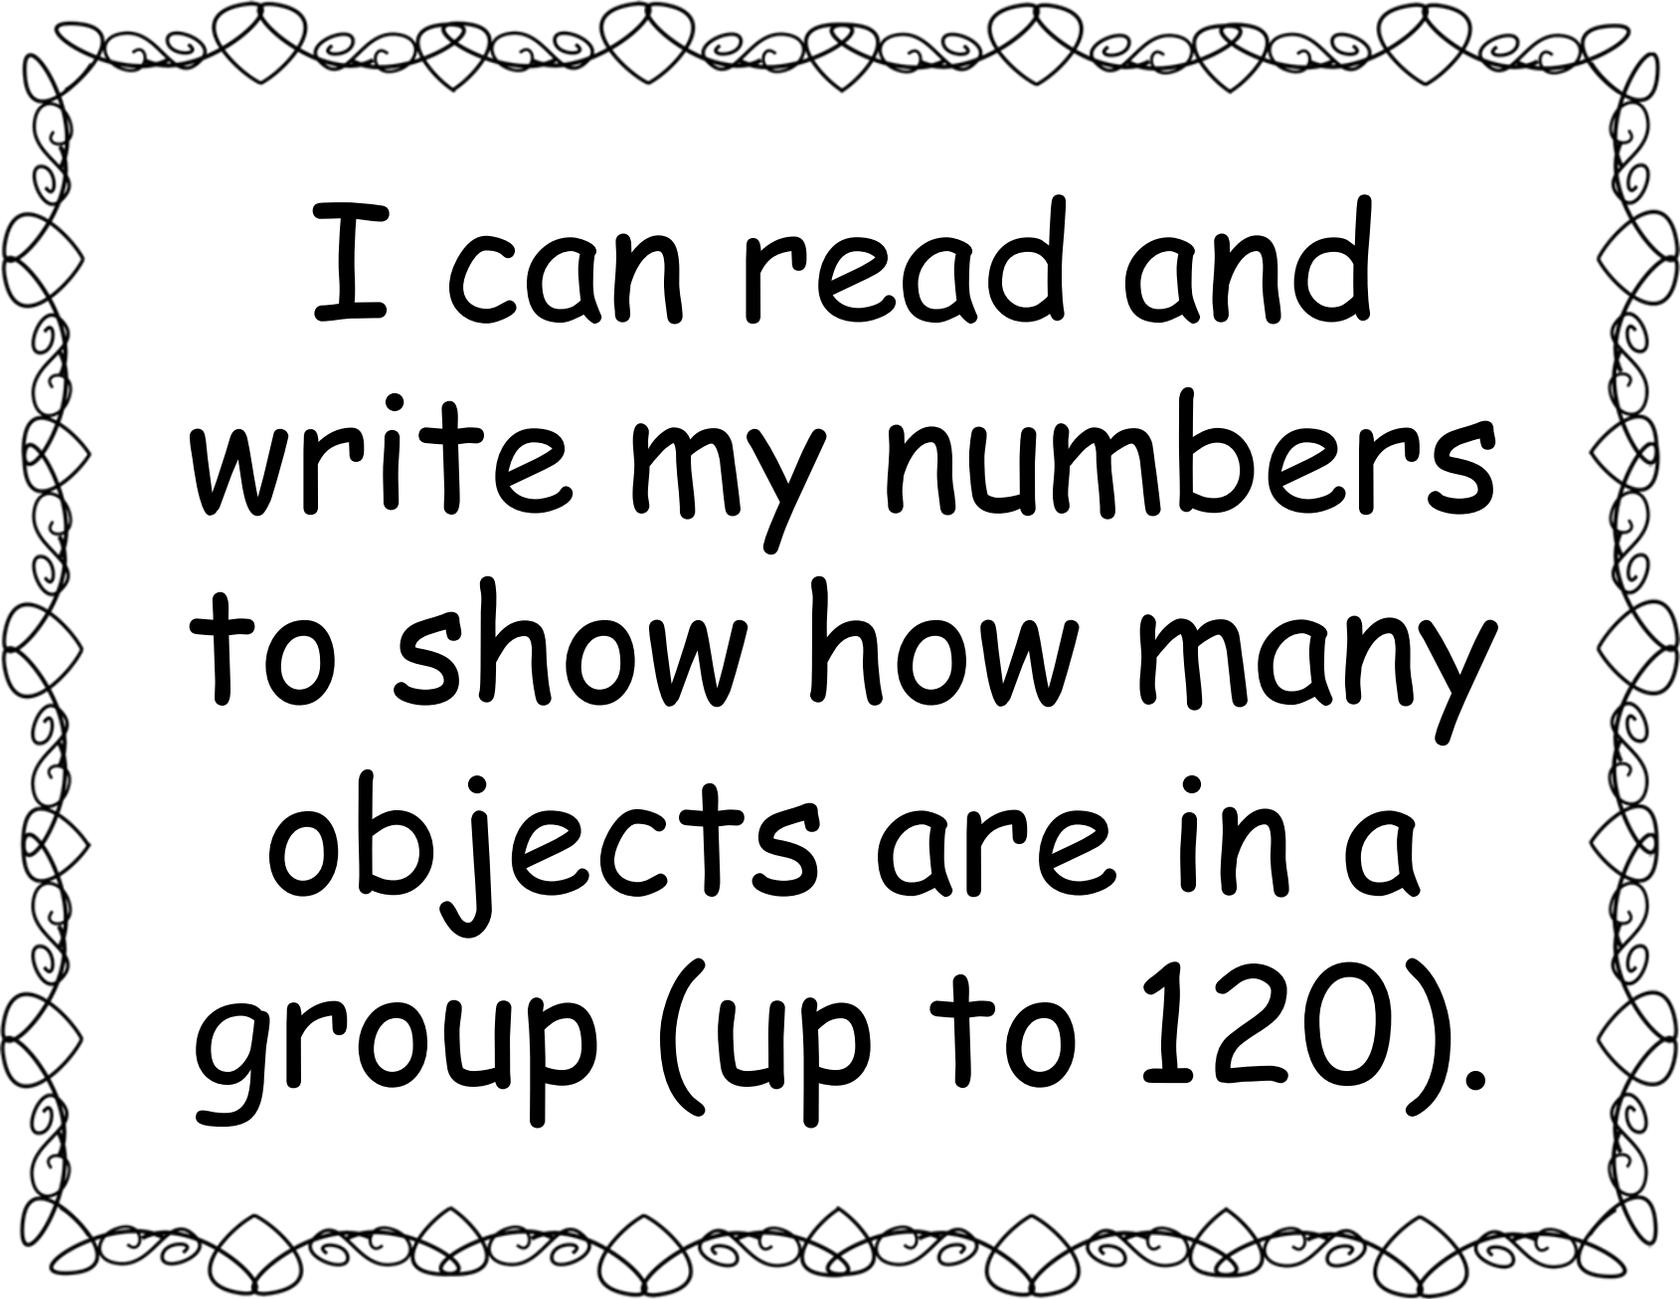

"I Can" Statements

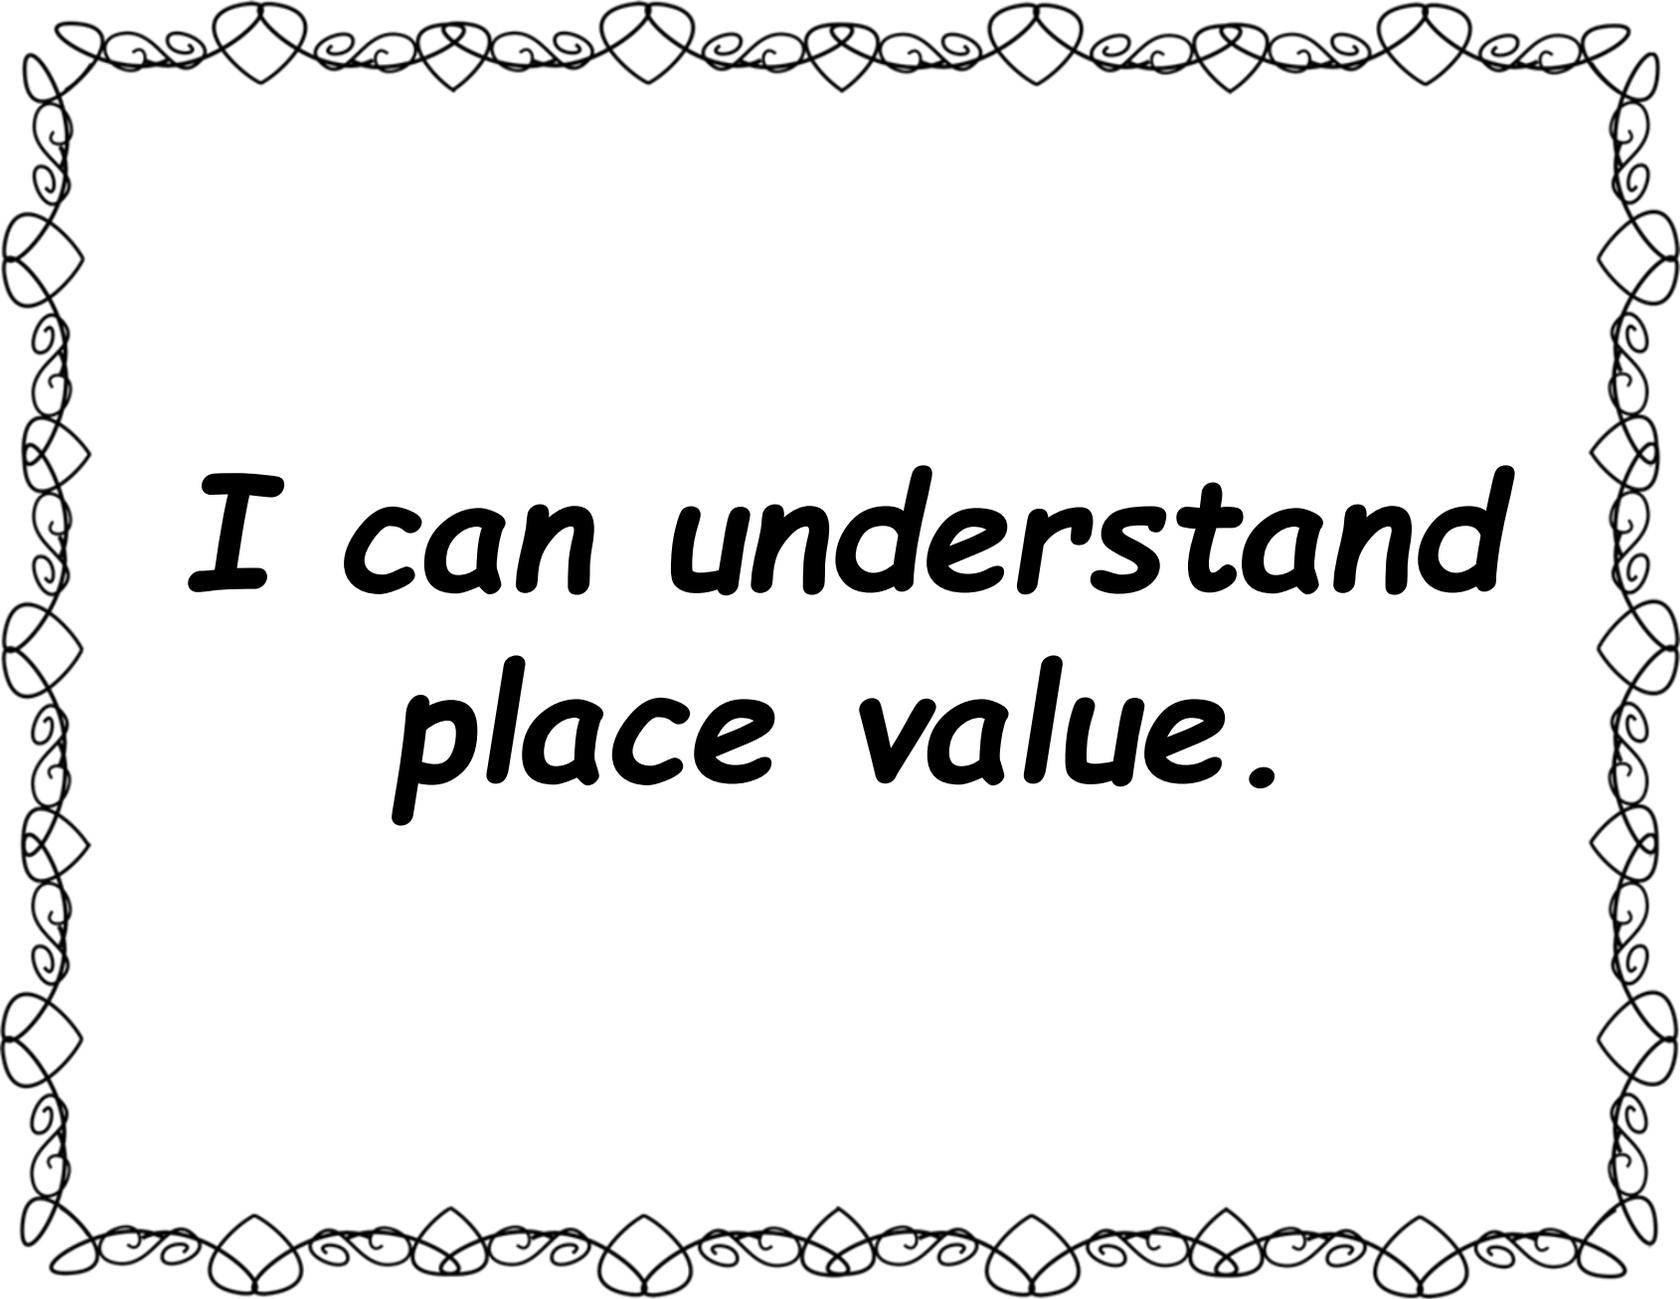

***I can count.***

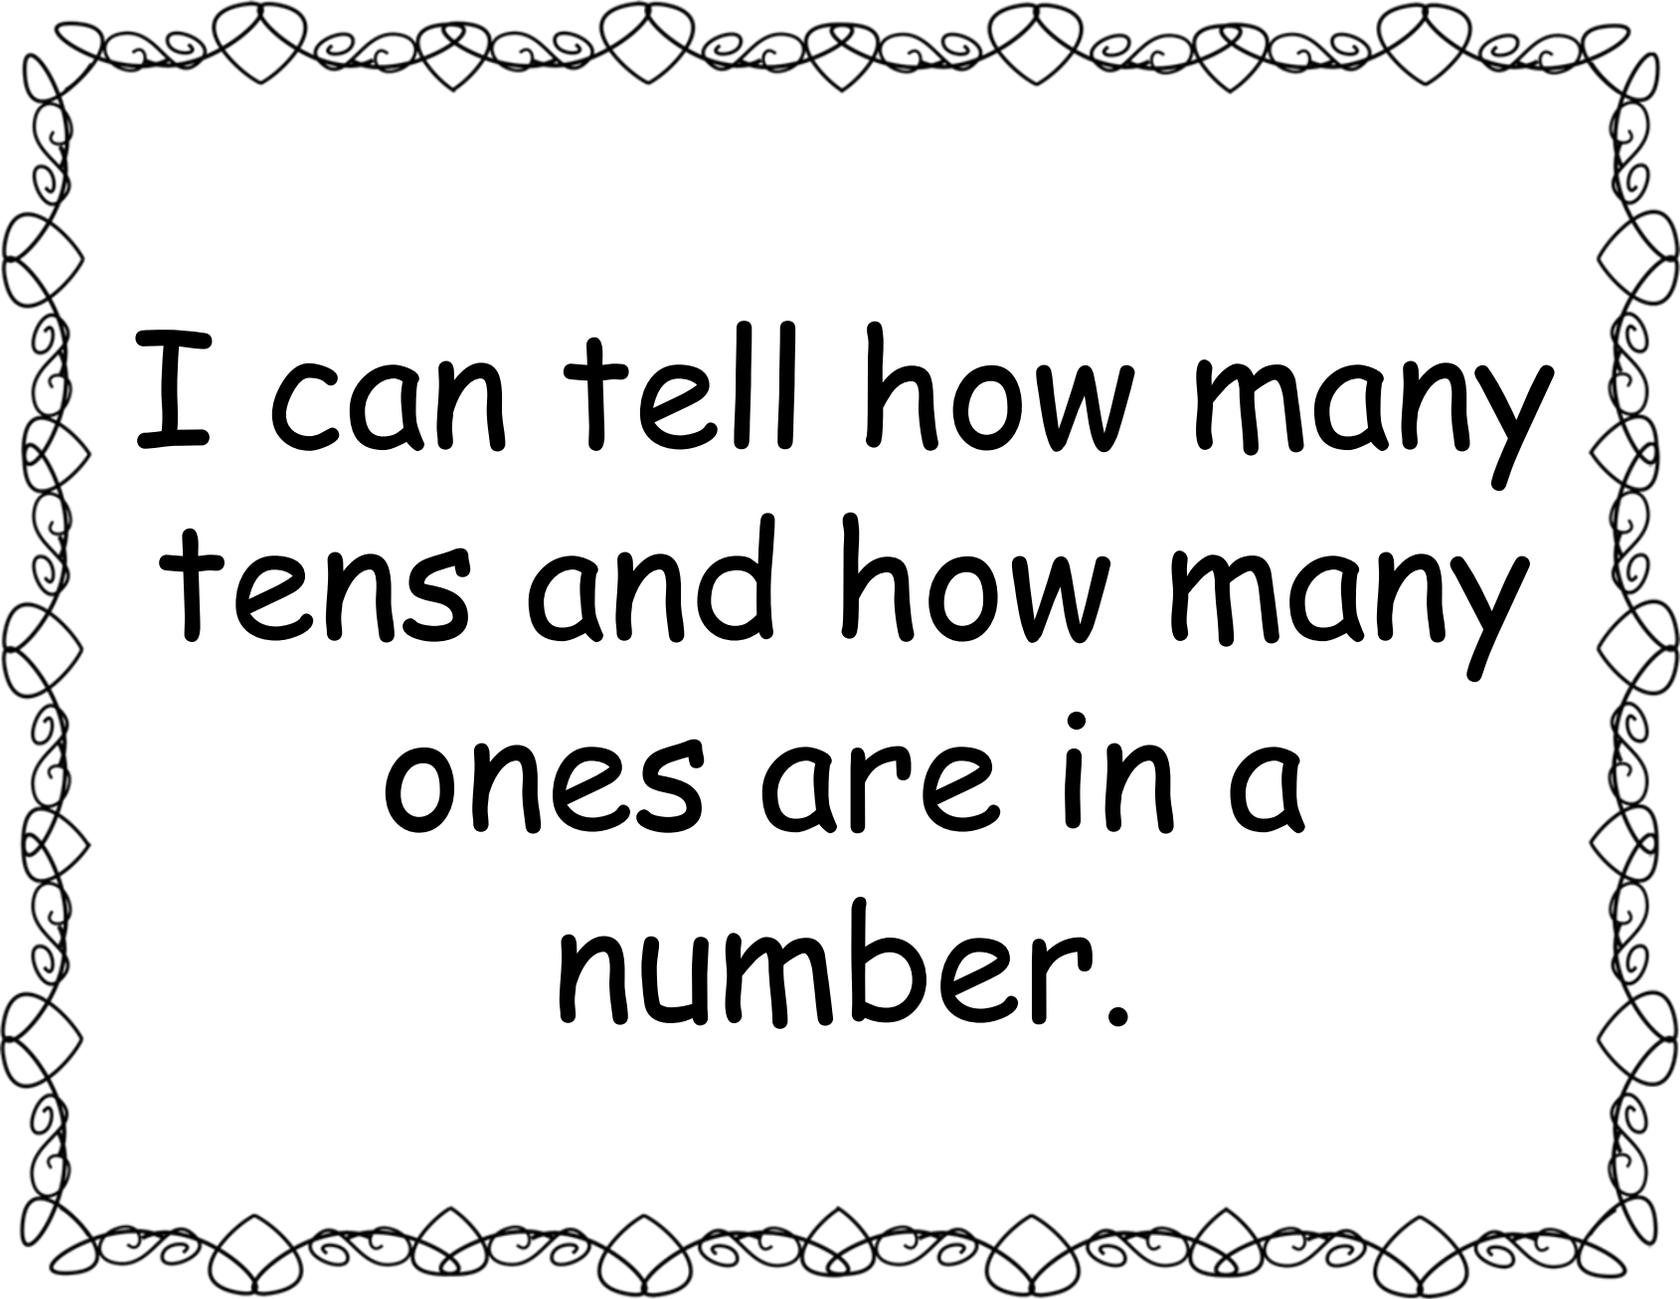

I can count up to  
120 starting at any  
number under 120.

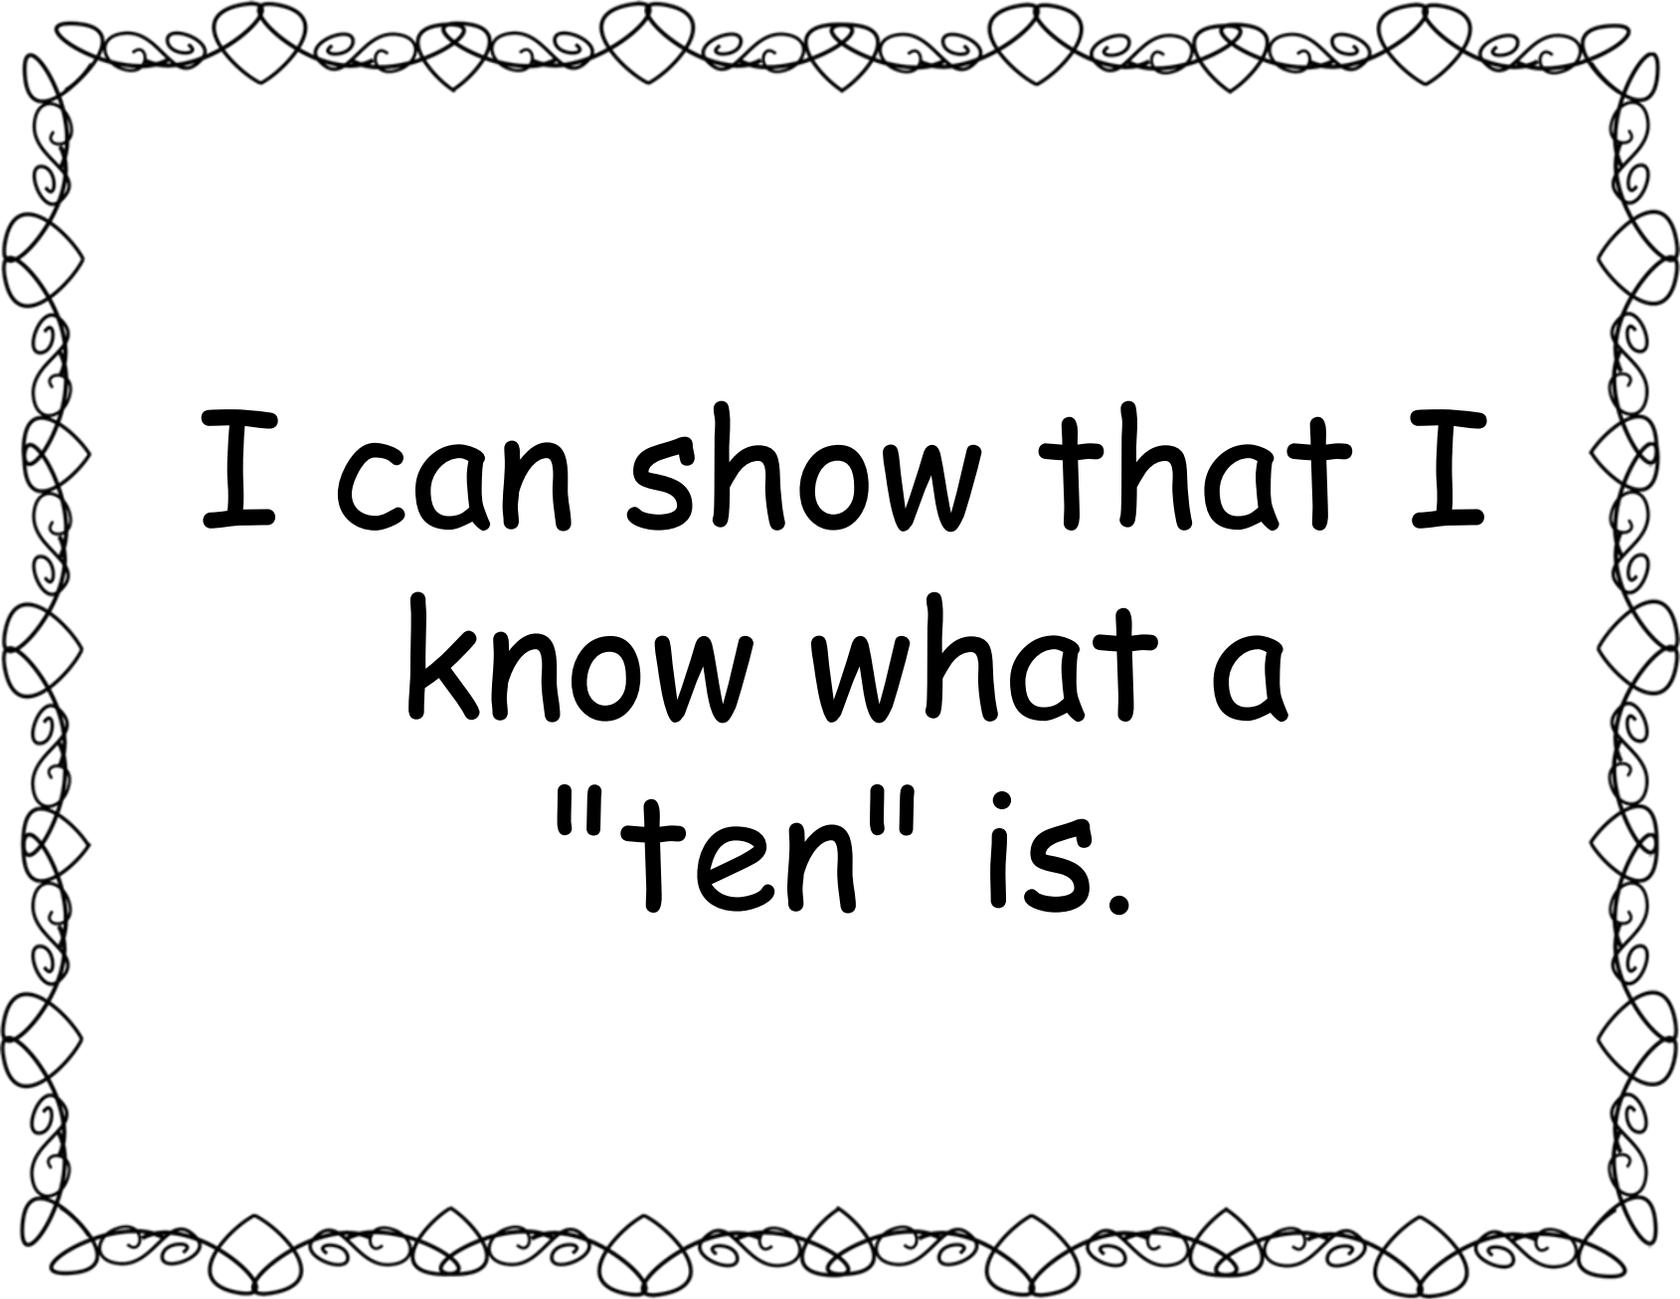

I can read and  
write my numbers  
to show how many  
objects are in a  
group (up to 120).

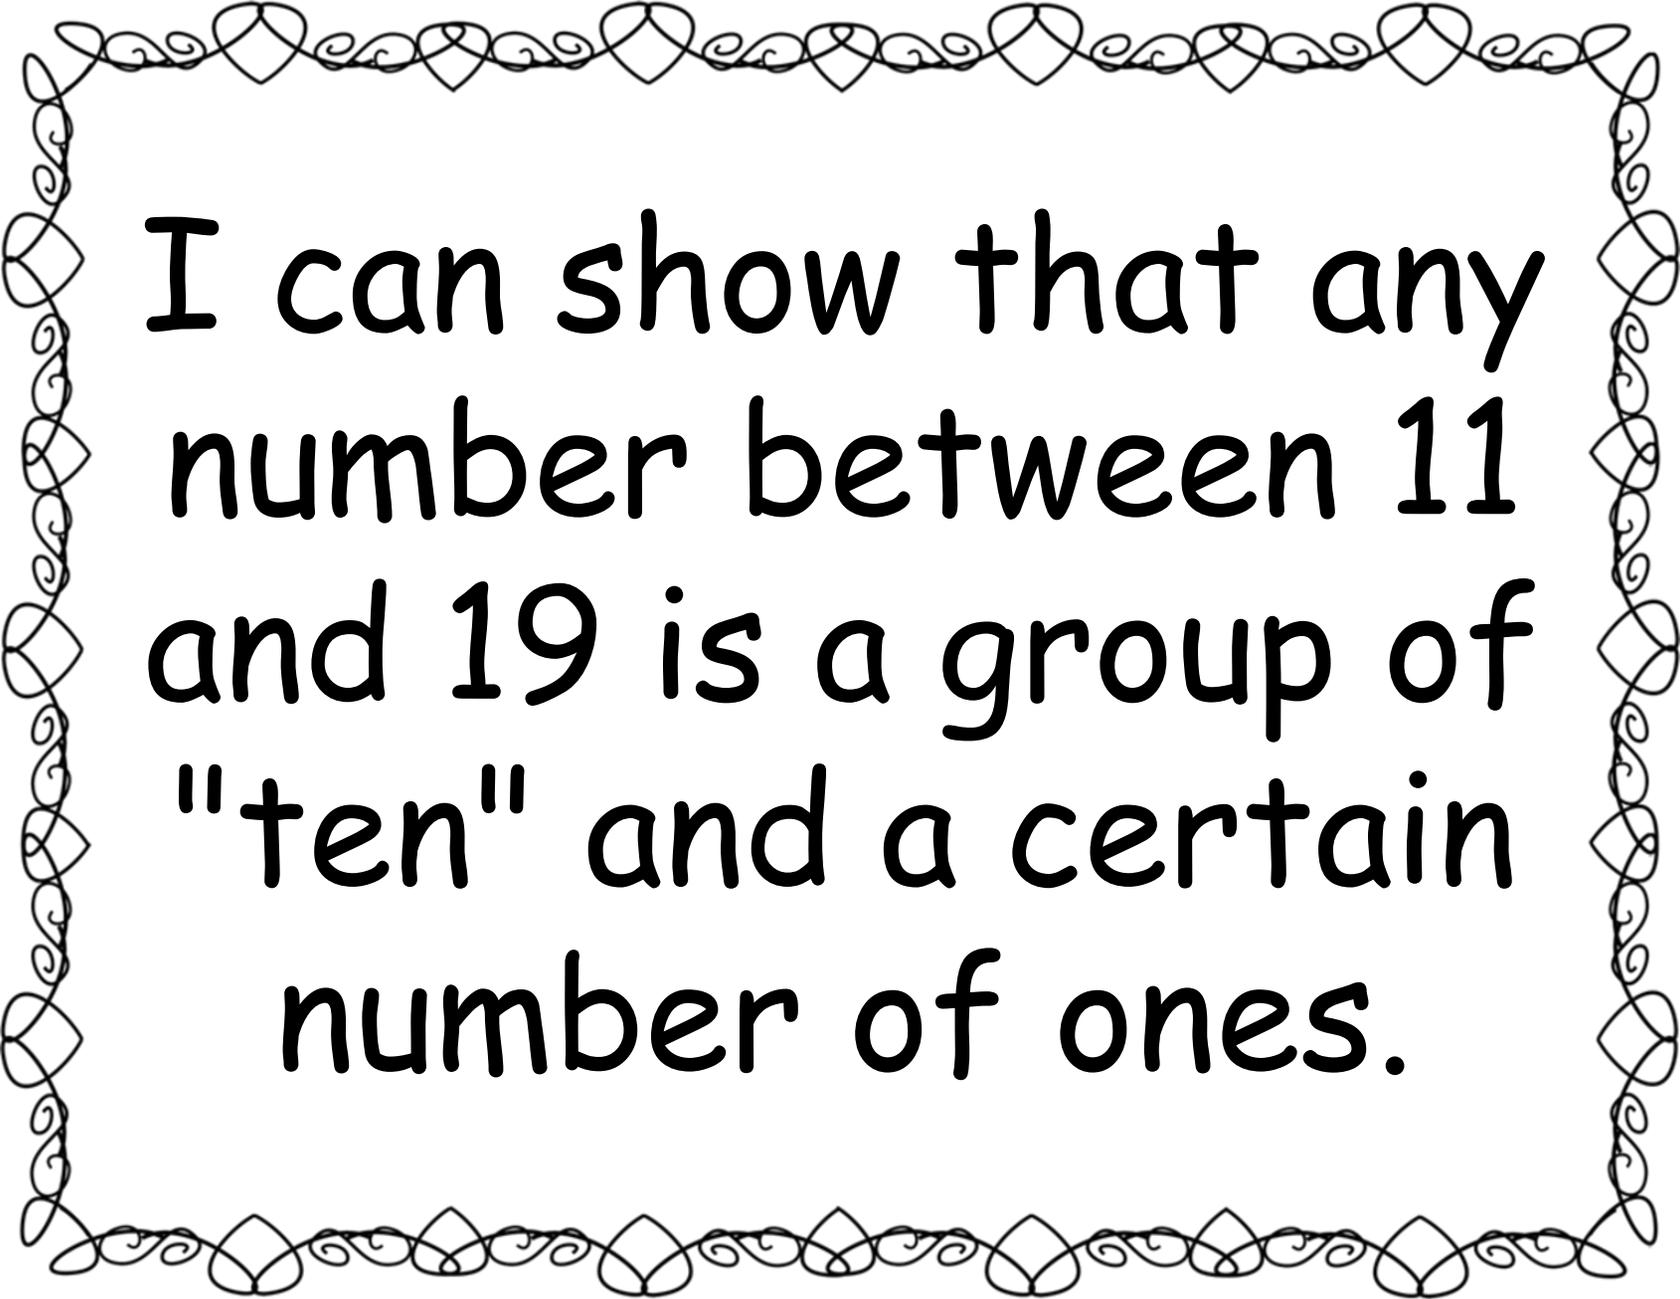

***I can understand  
place value.***

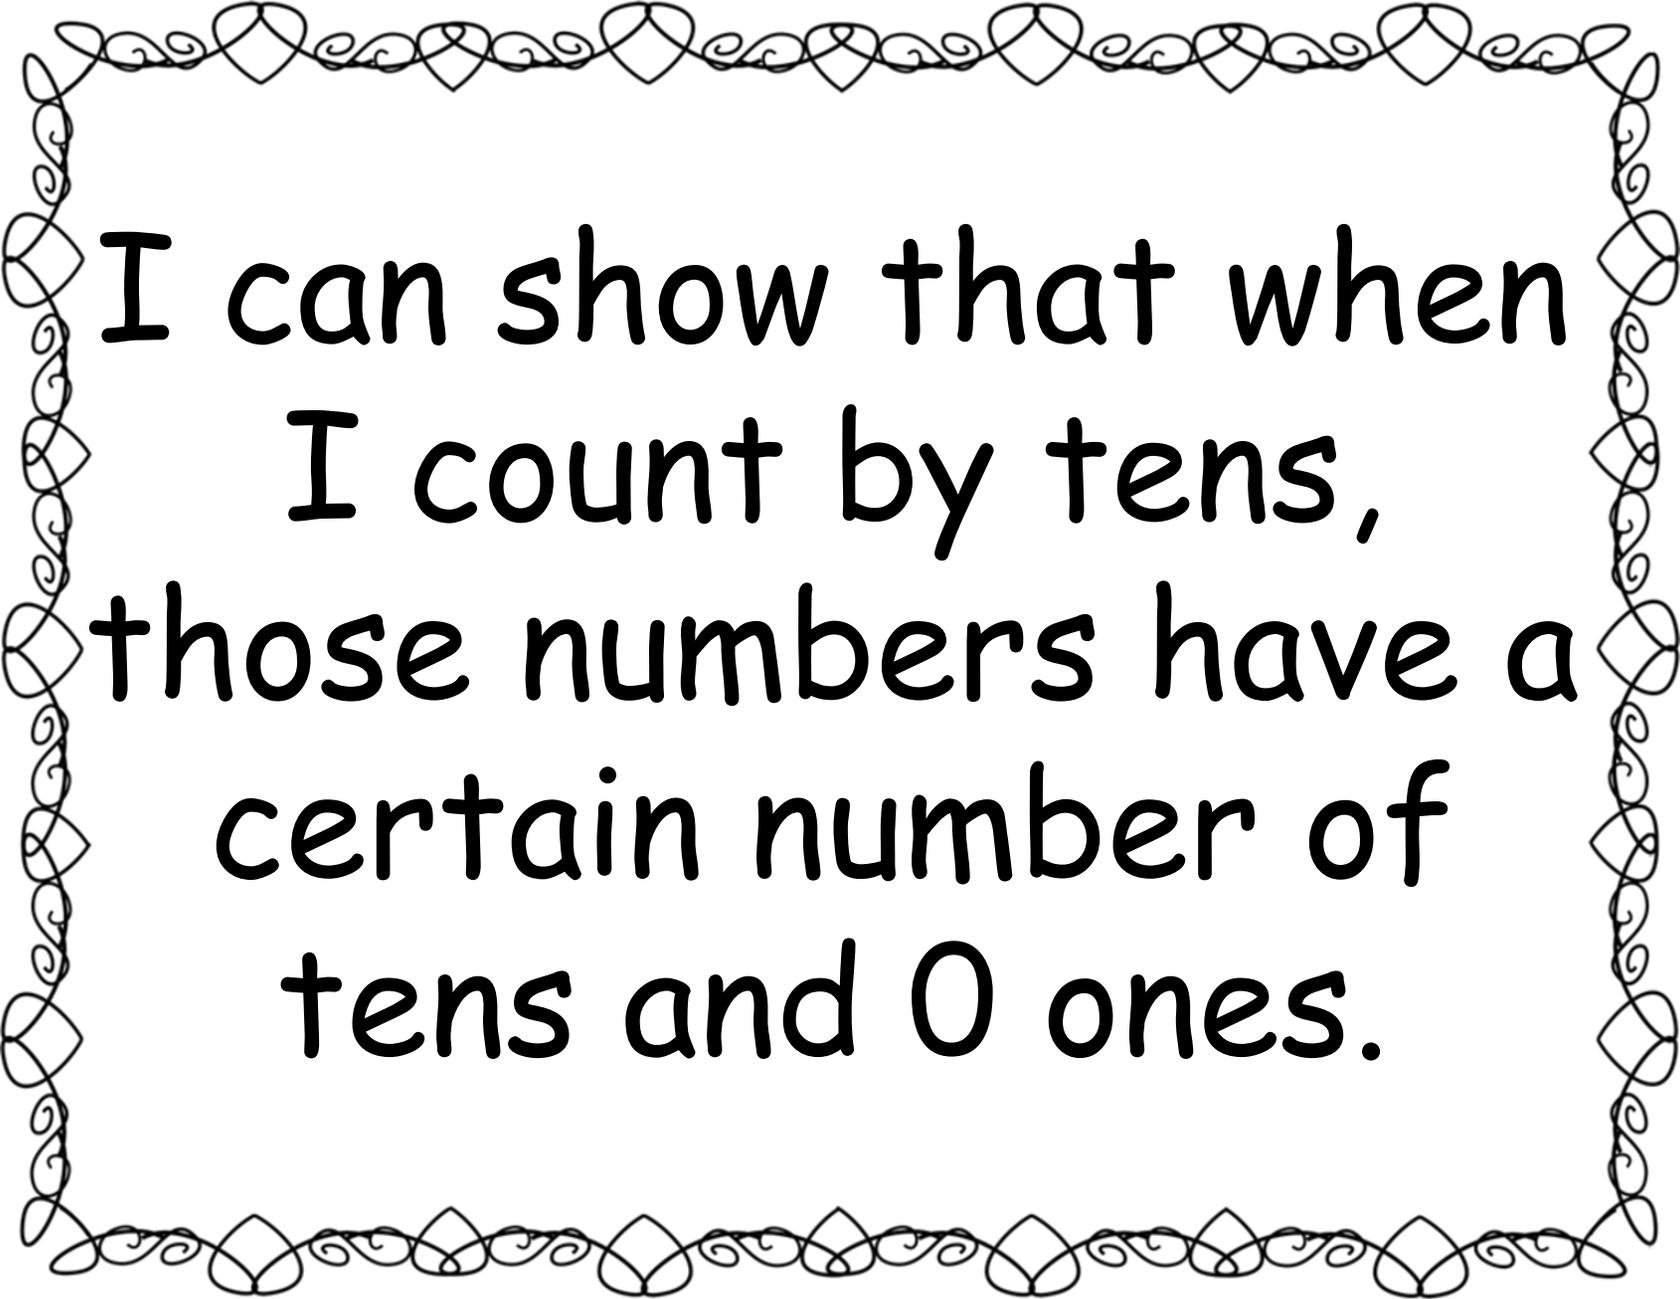

I can tell how many  
tens and how many  
ones are in a  
number.

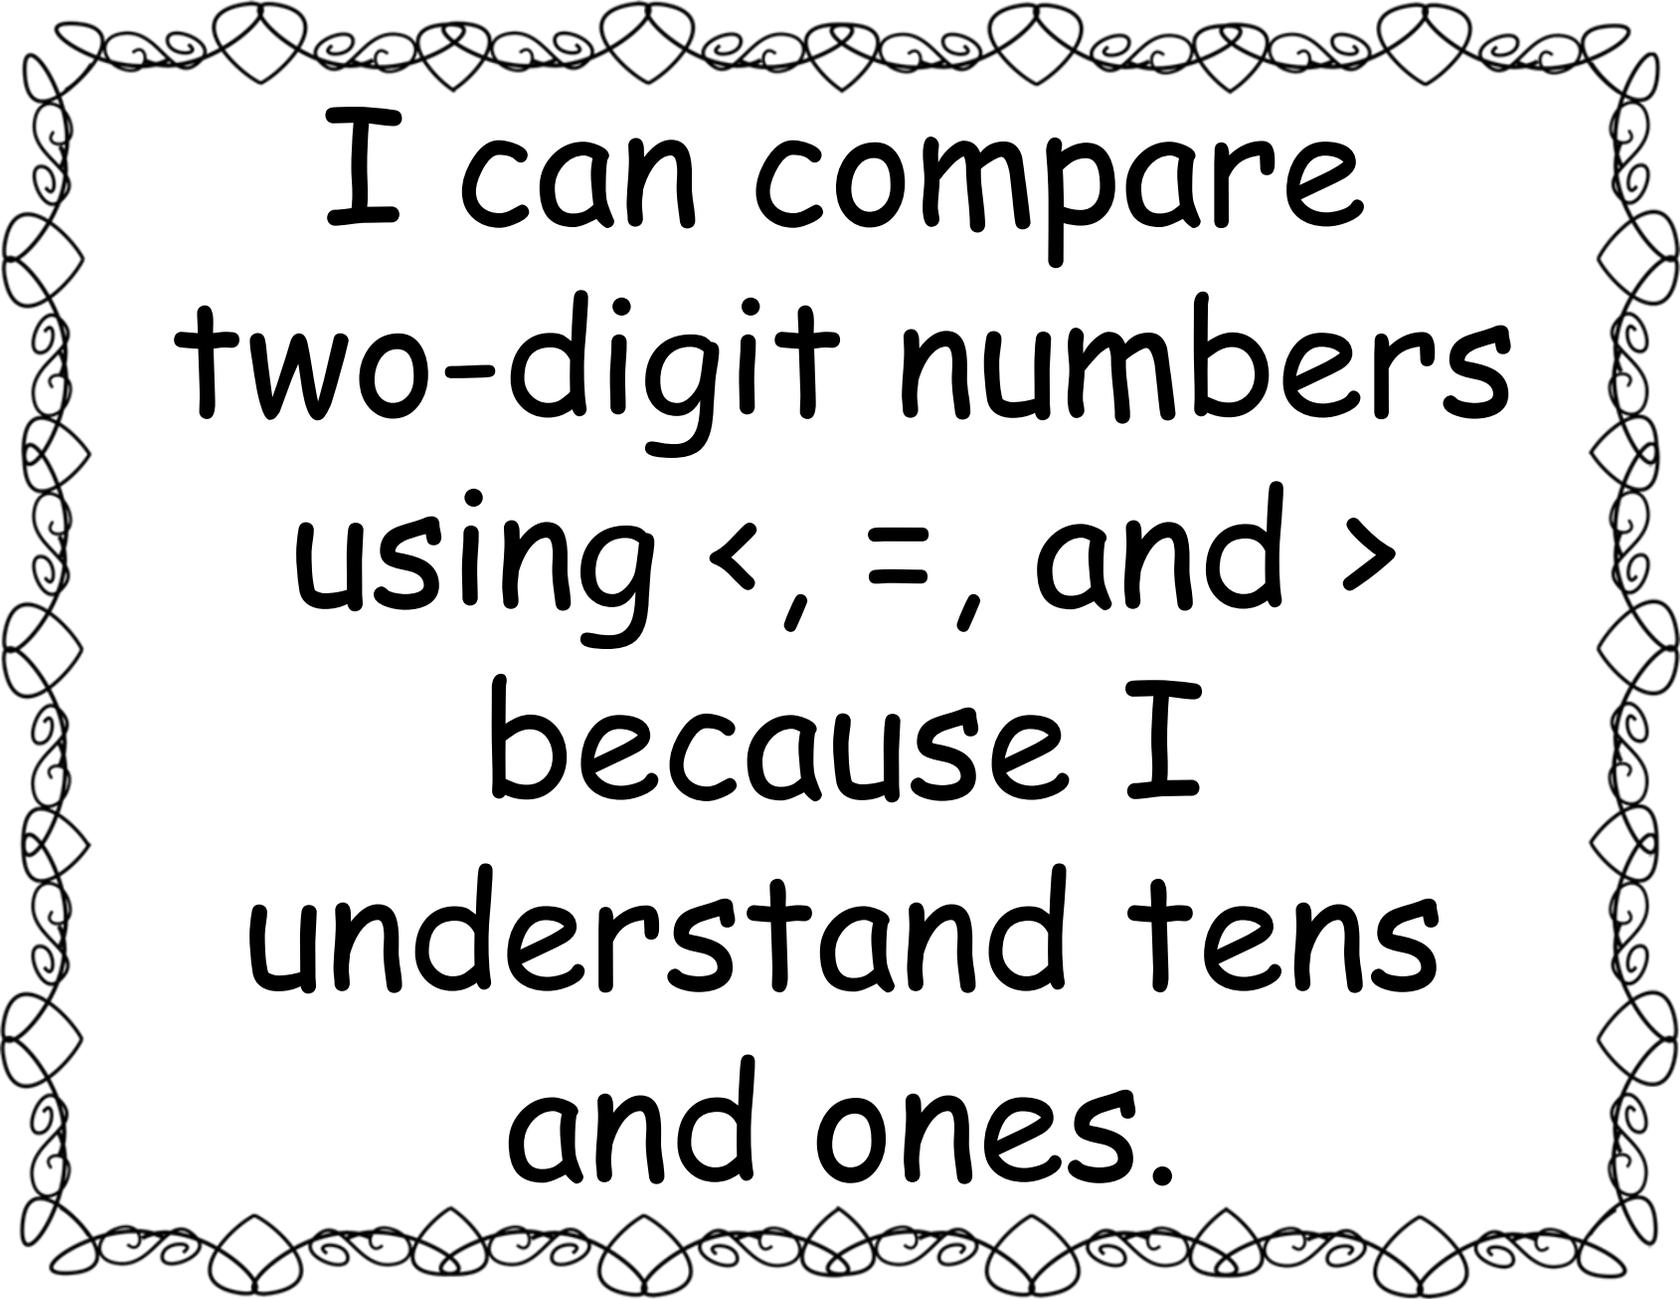

I can show that I  
know what a  
"ten" is.

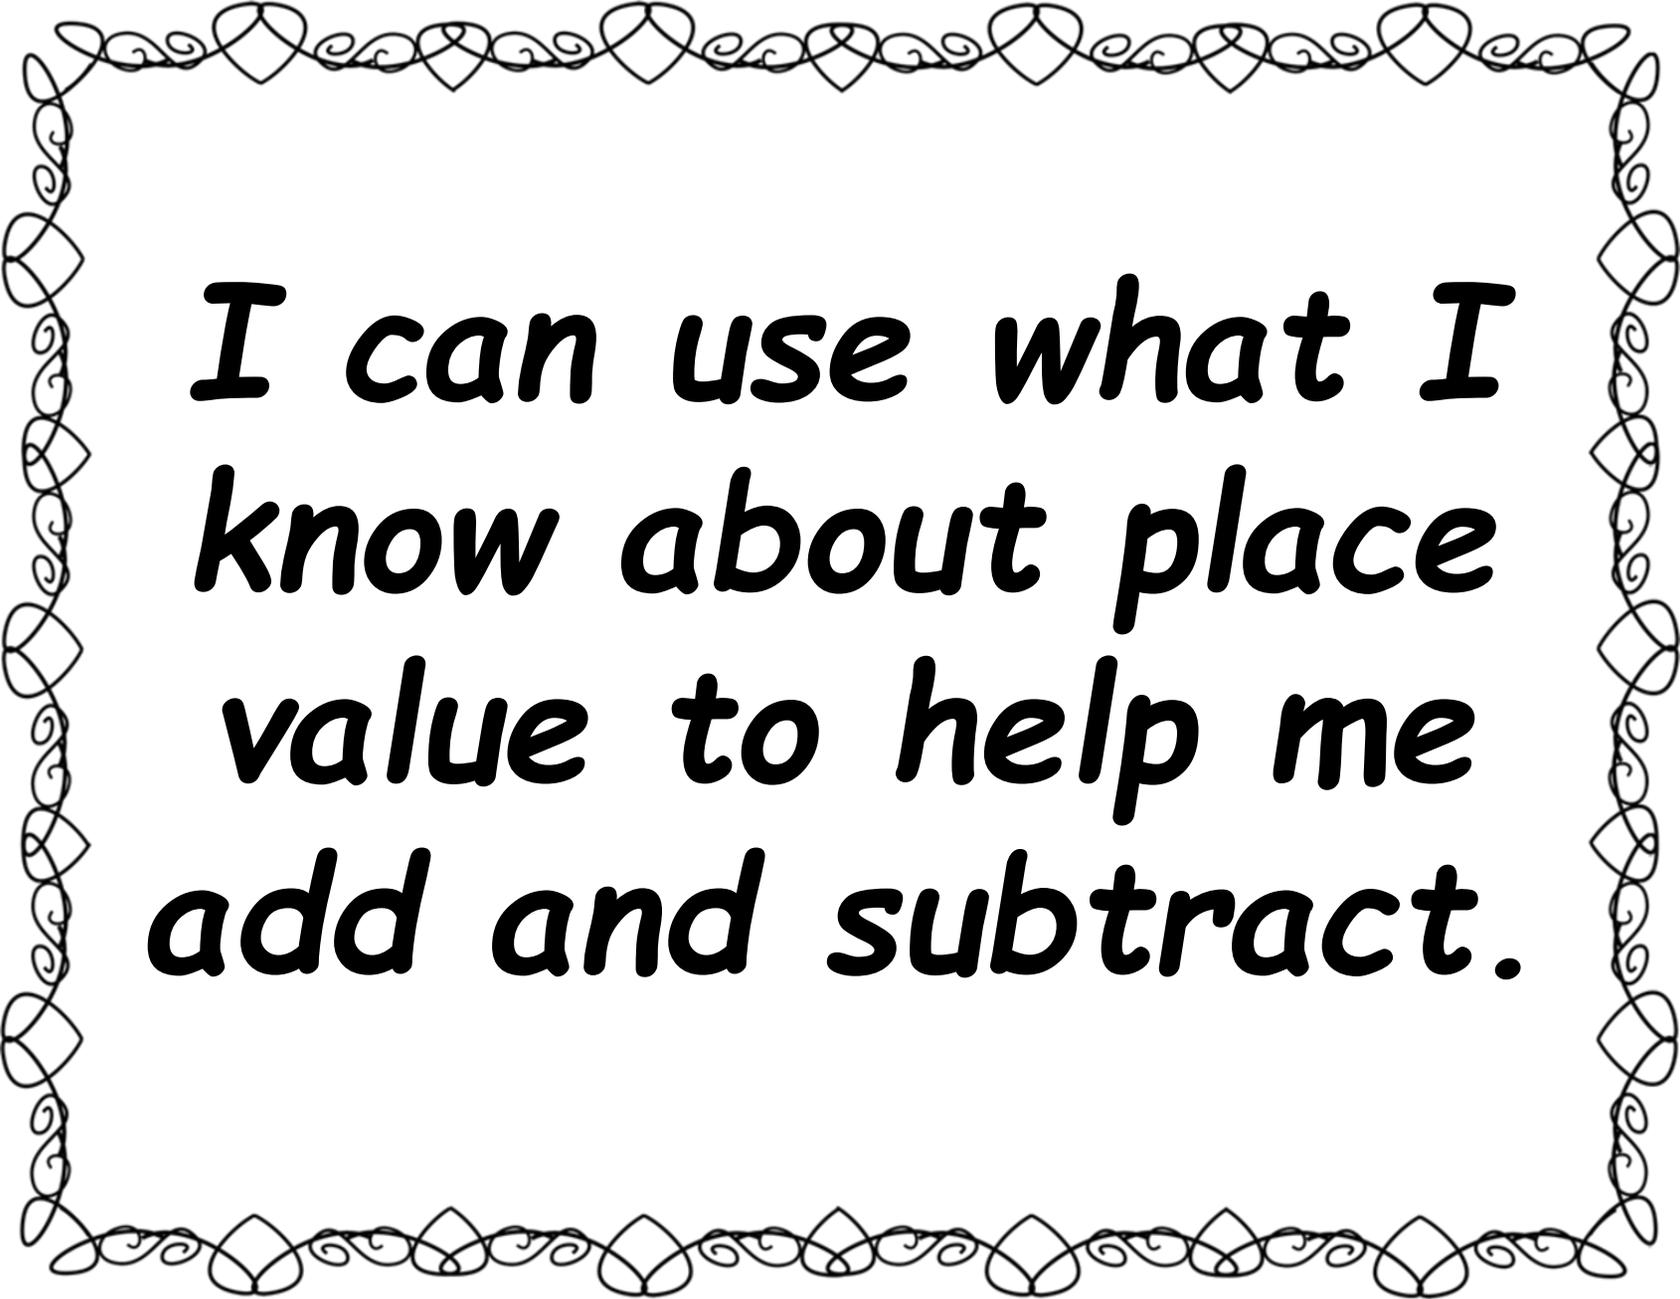

I can show that any number between 11 and 19 is a group of "ten" and a certain number of ones.

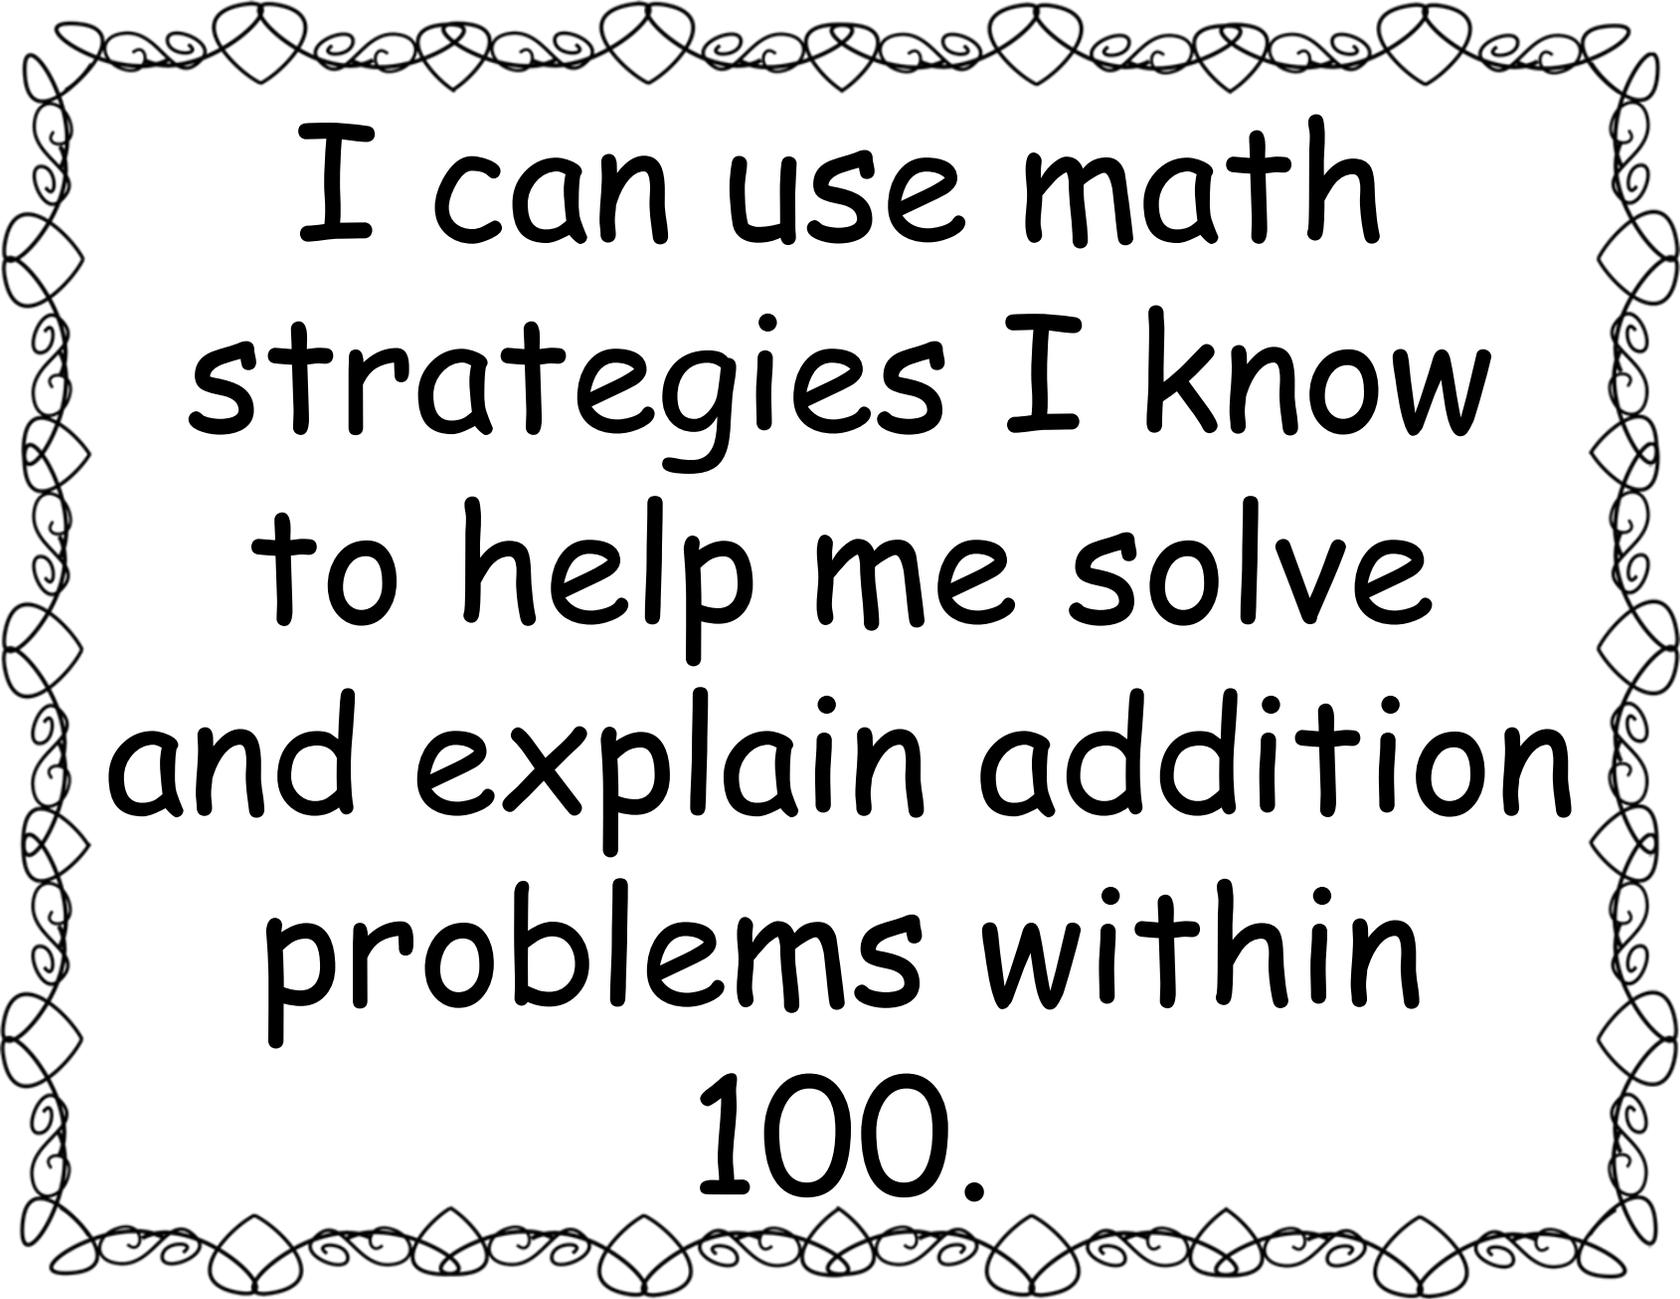

I can show that when  
I count by tens,  
those numbers have a  
certain number of  
tens and 0 ones.

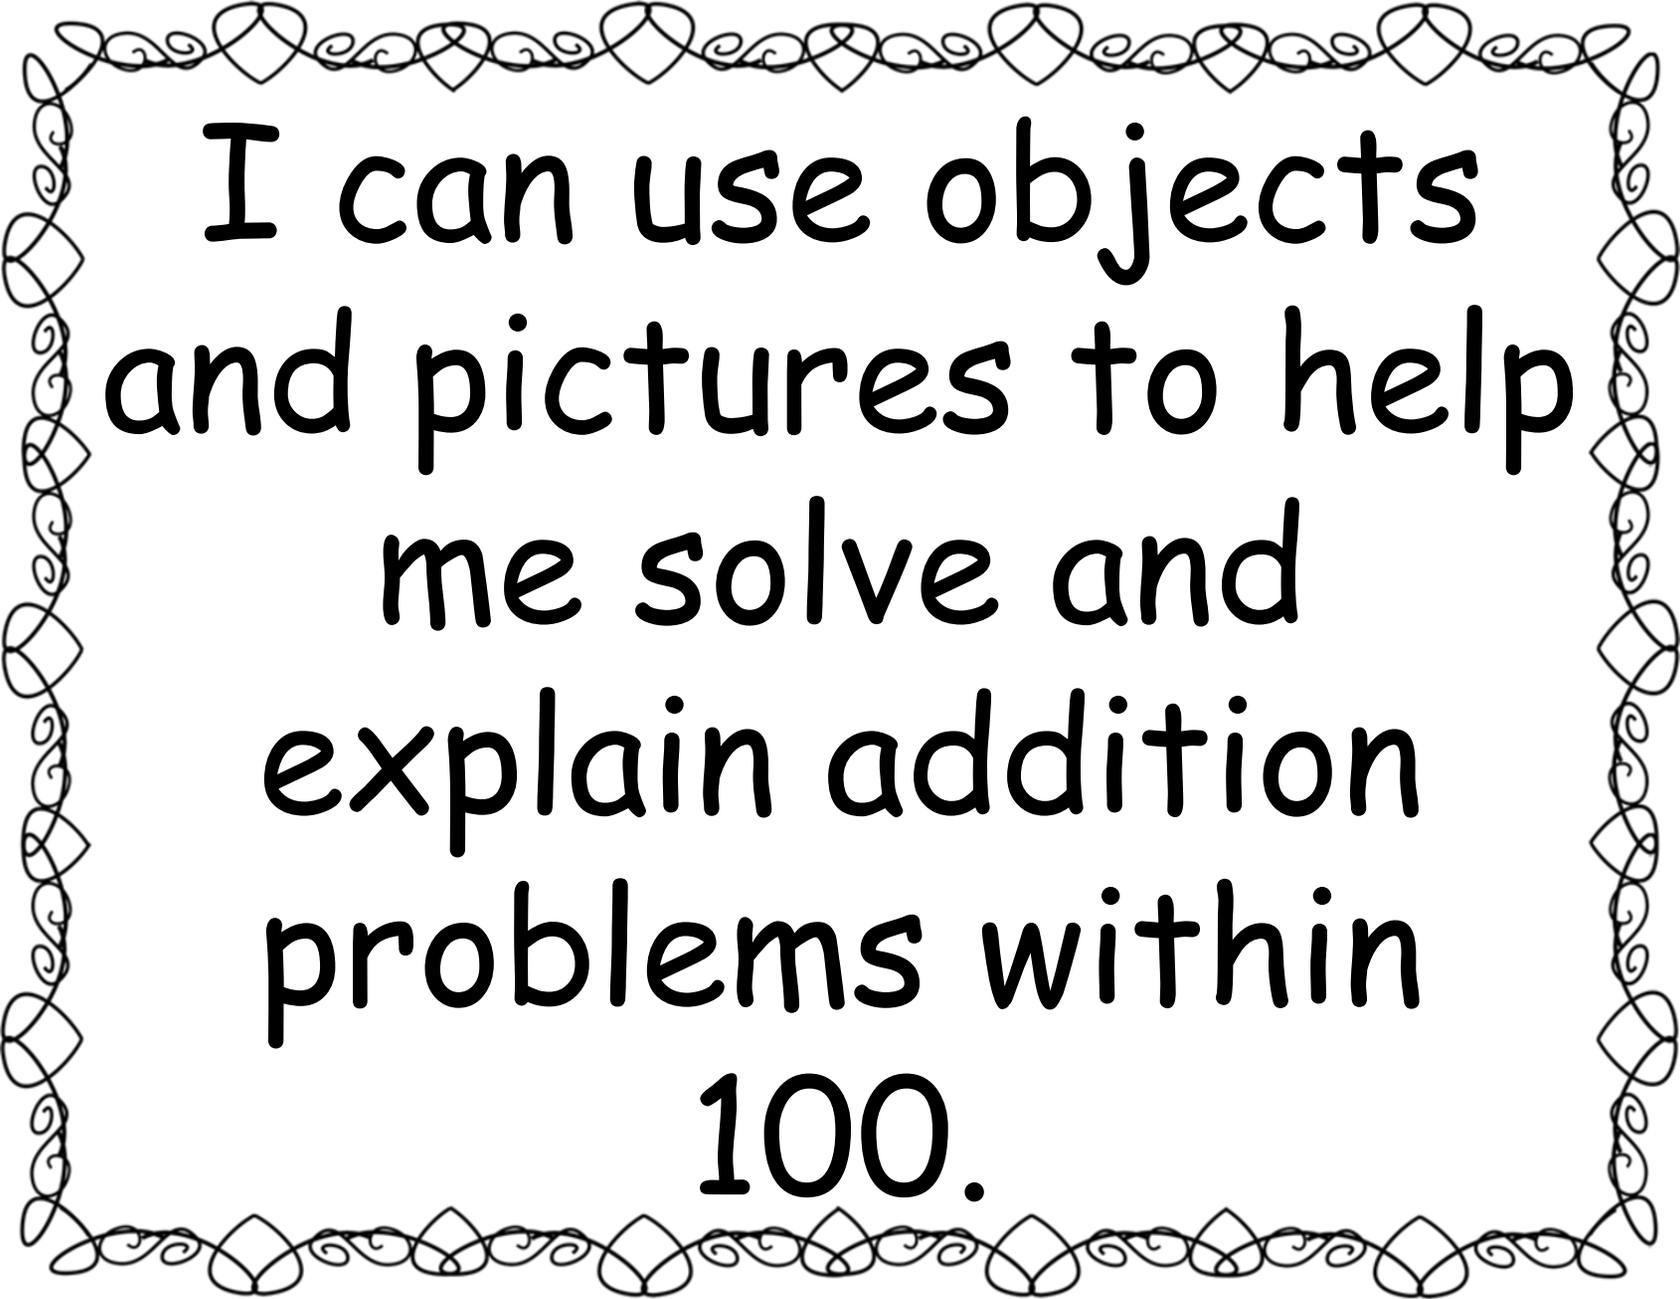

I can compare  
two-digit numbers  
using  $<$ ,  $=$ , and  $>$   
because I  
understand tens  
and ones.

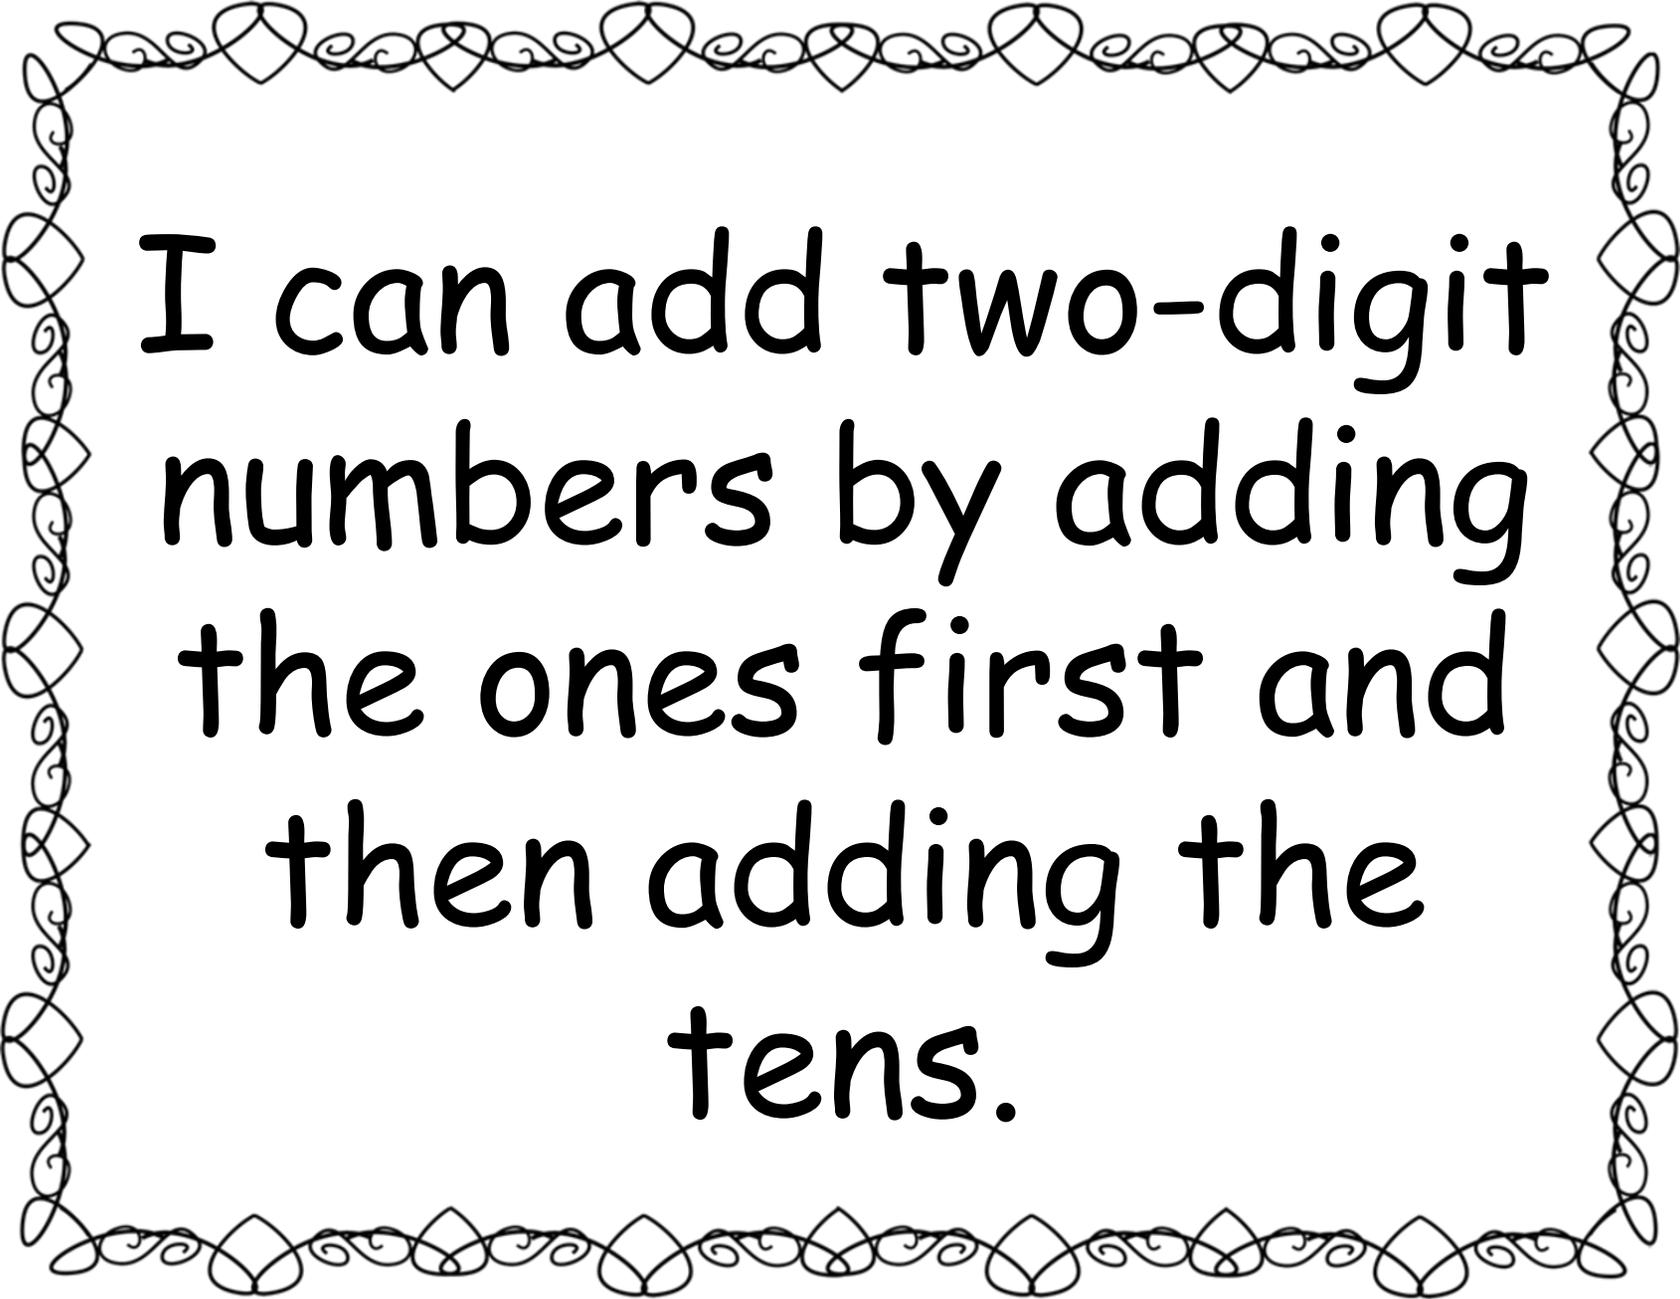

***I can use what I  
know about place  
value to help me  
add and subtract.***

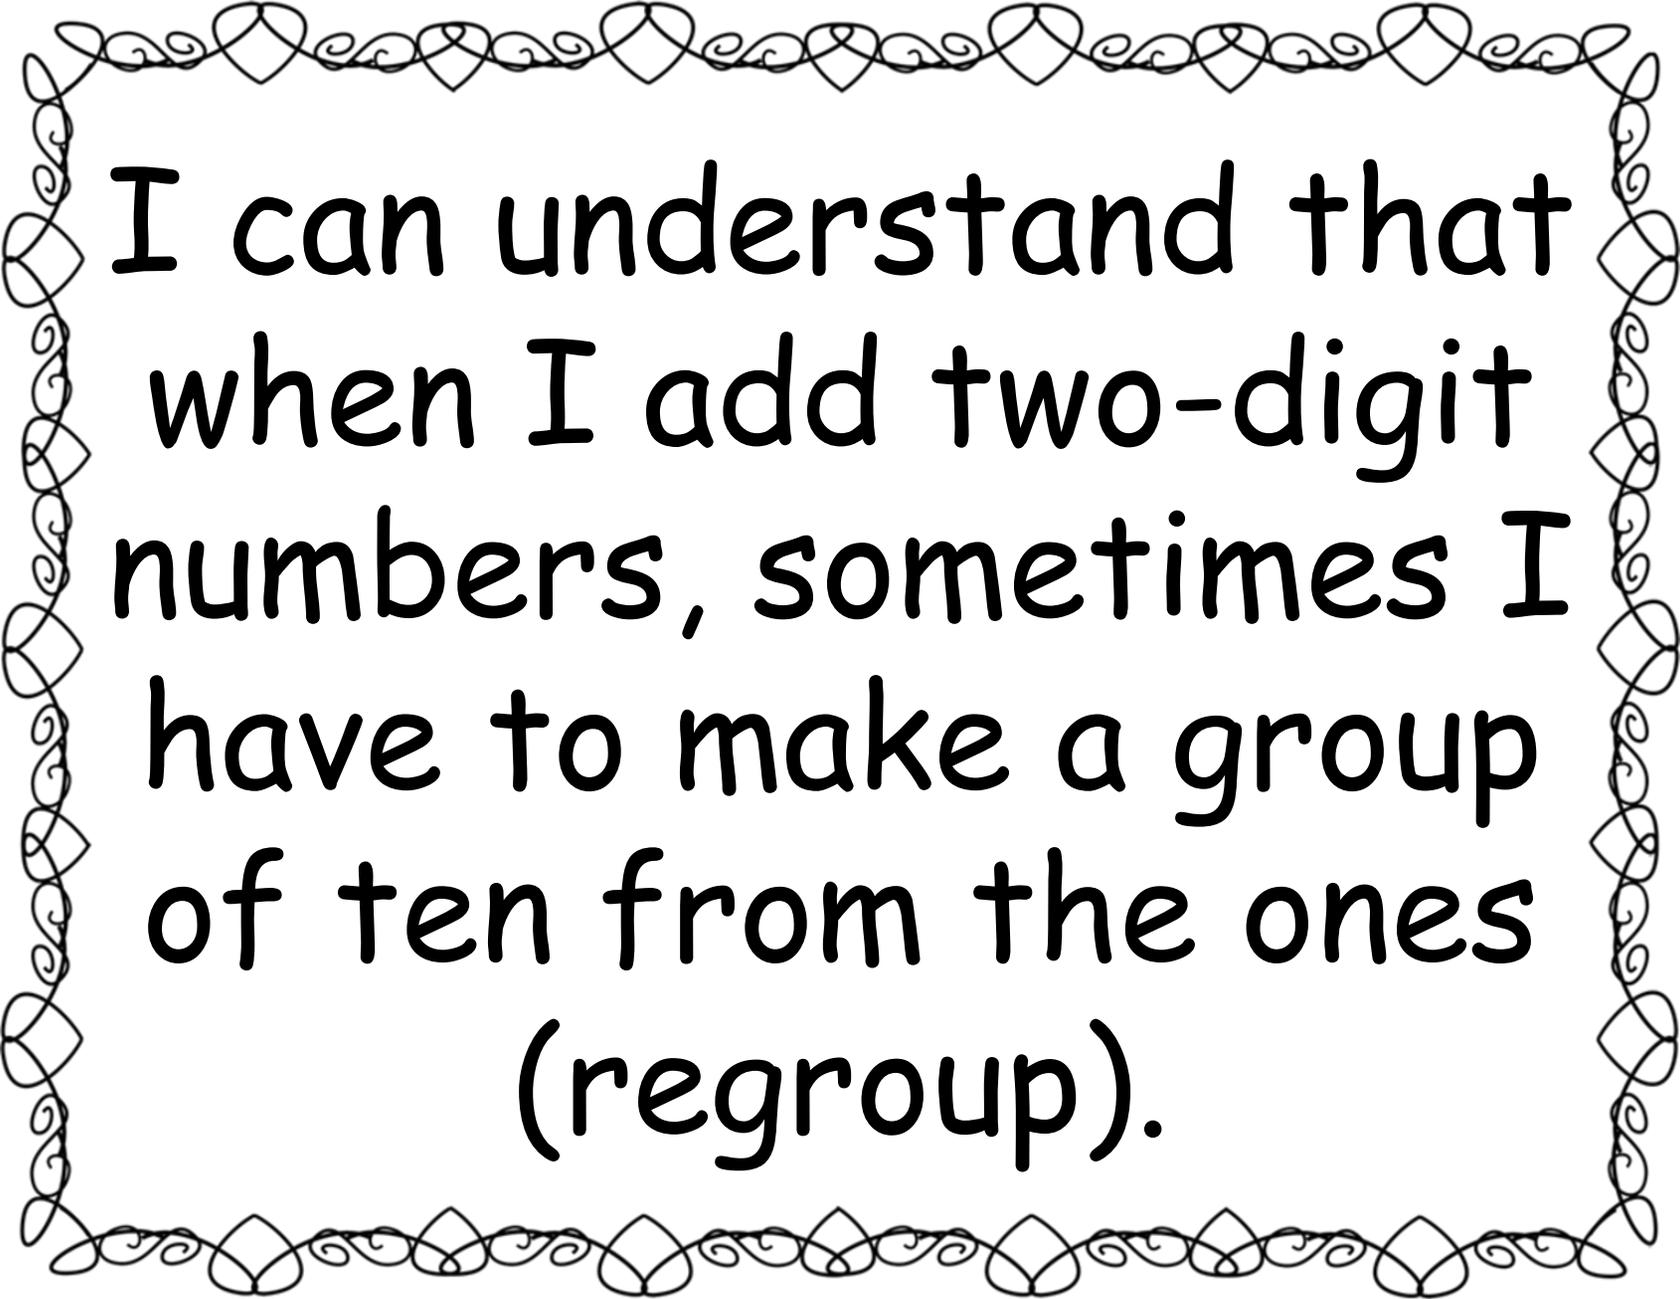

I can use math  
strategies I know  
to help me solve  
and explain addition  
problems within  
100.

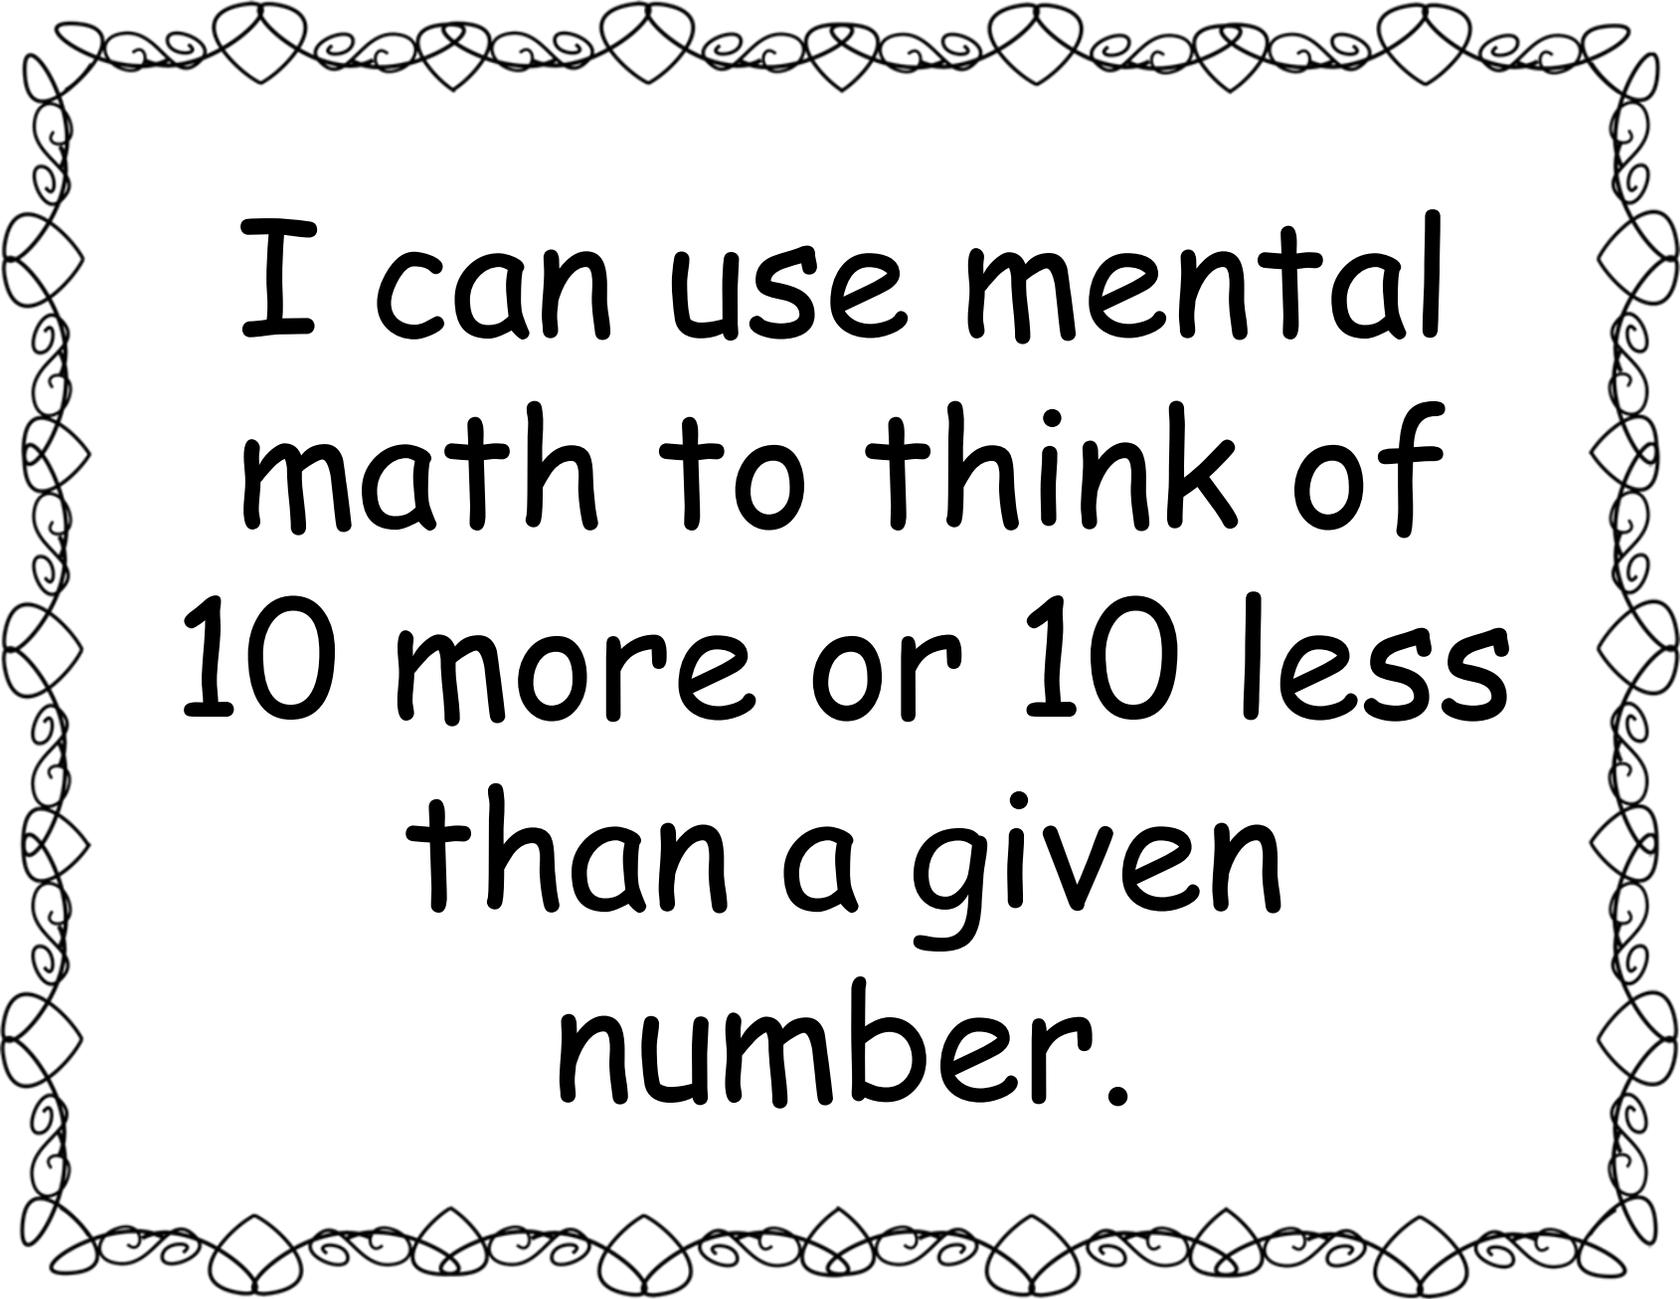

I can use objects  
and pictures to help  
me solve and  
explain addition  
problems within  
100.

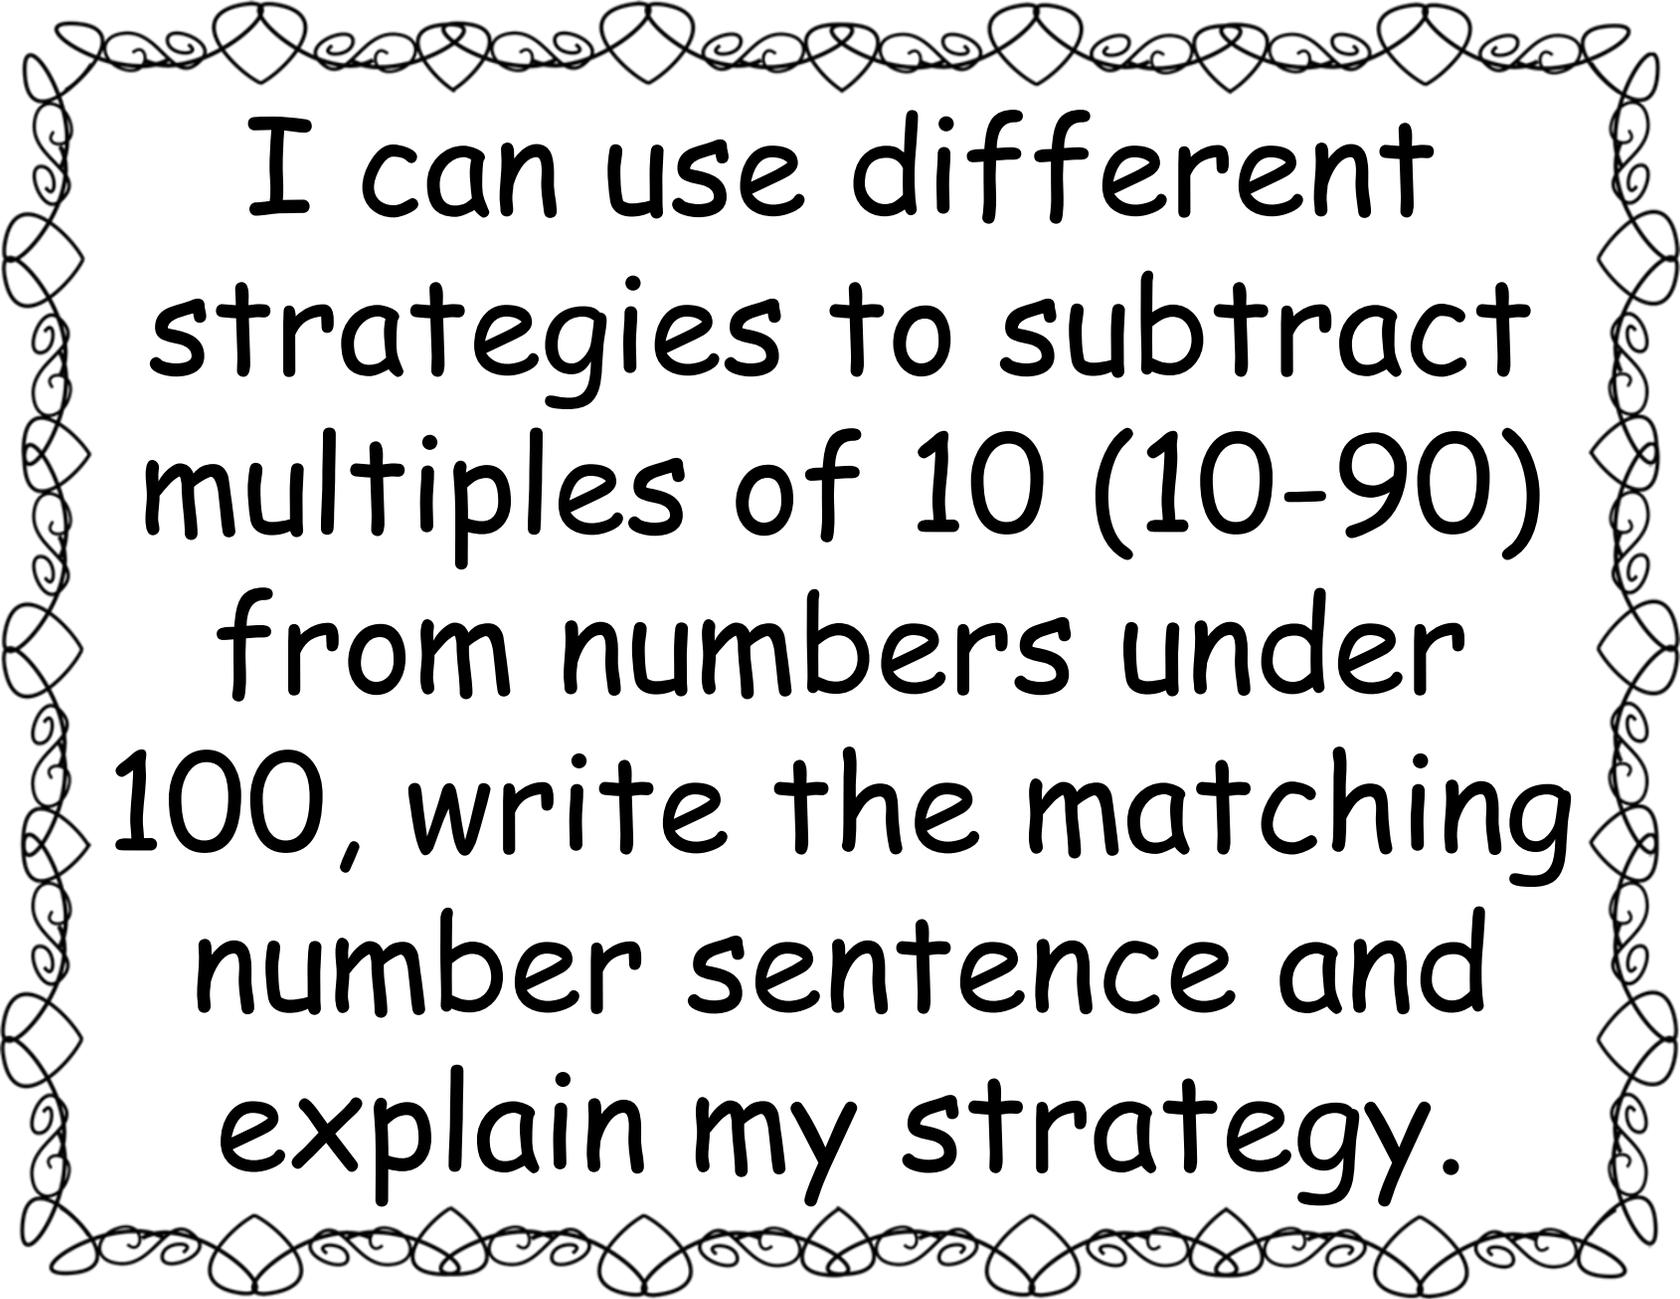

I can add two-digit numbers by adding the ones first and then adding the tens.

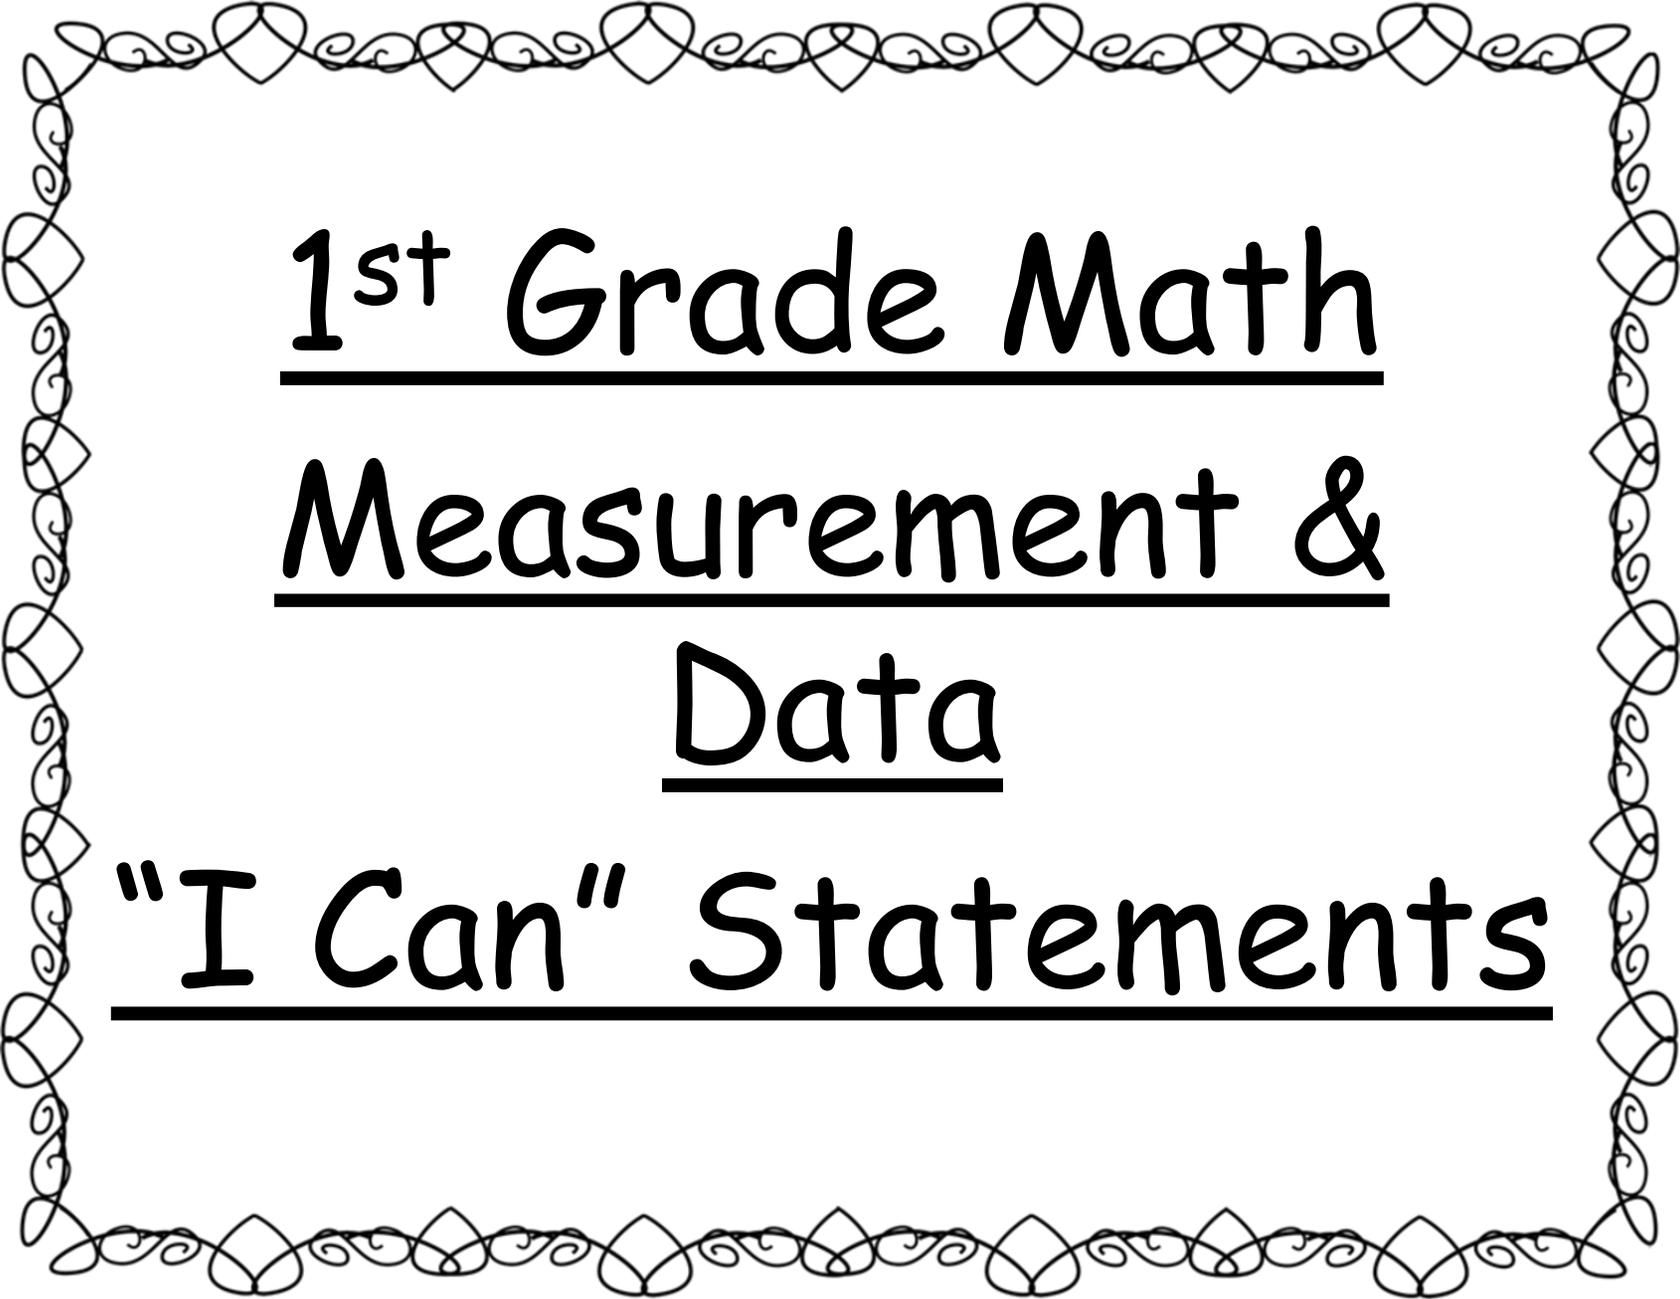

I can understand that  
when I add two-digit  
numbers, sometimes I  
have to make a group  
of ten from the ones  
(regroup).

I can use mental  
math to think of  
10 more or 10 less  
than a given  
number.

I can use different strategies to subtract multiples of 10 (10-90) from numbers under 100, write the matching number sentence and explain my strategy.

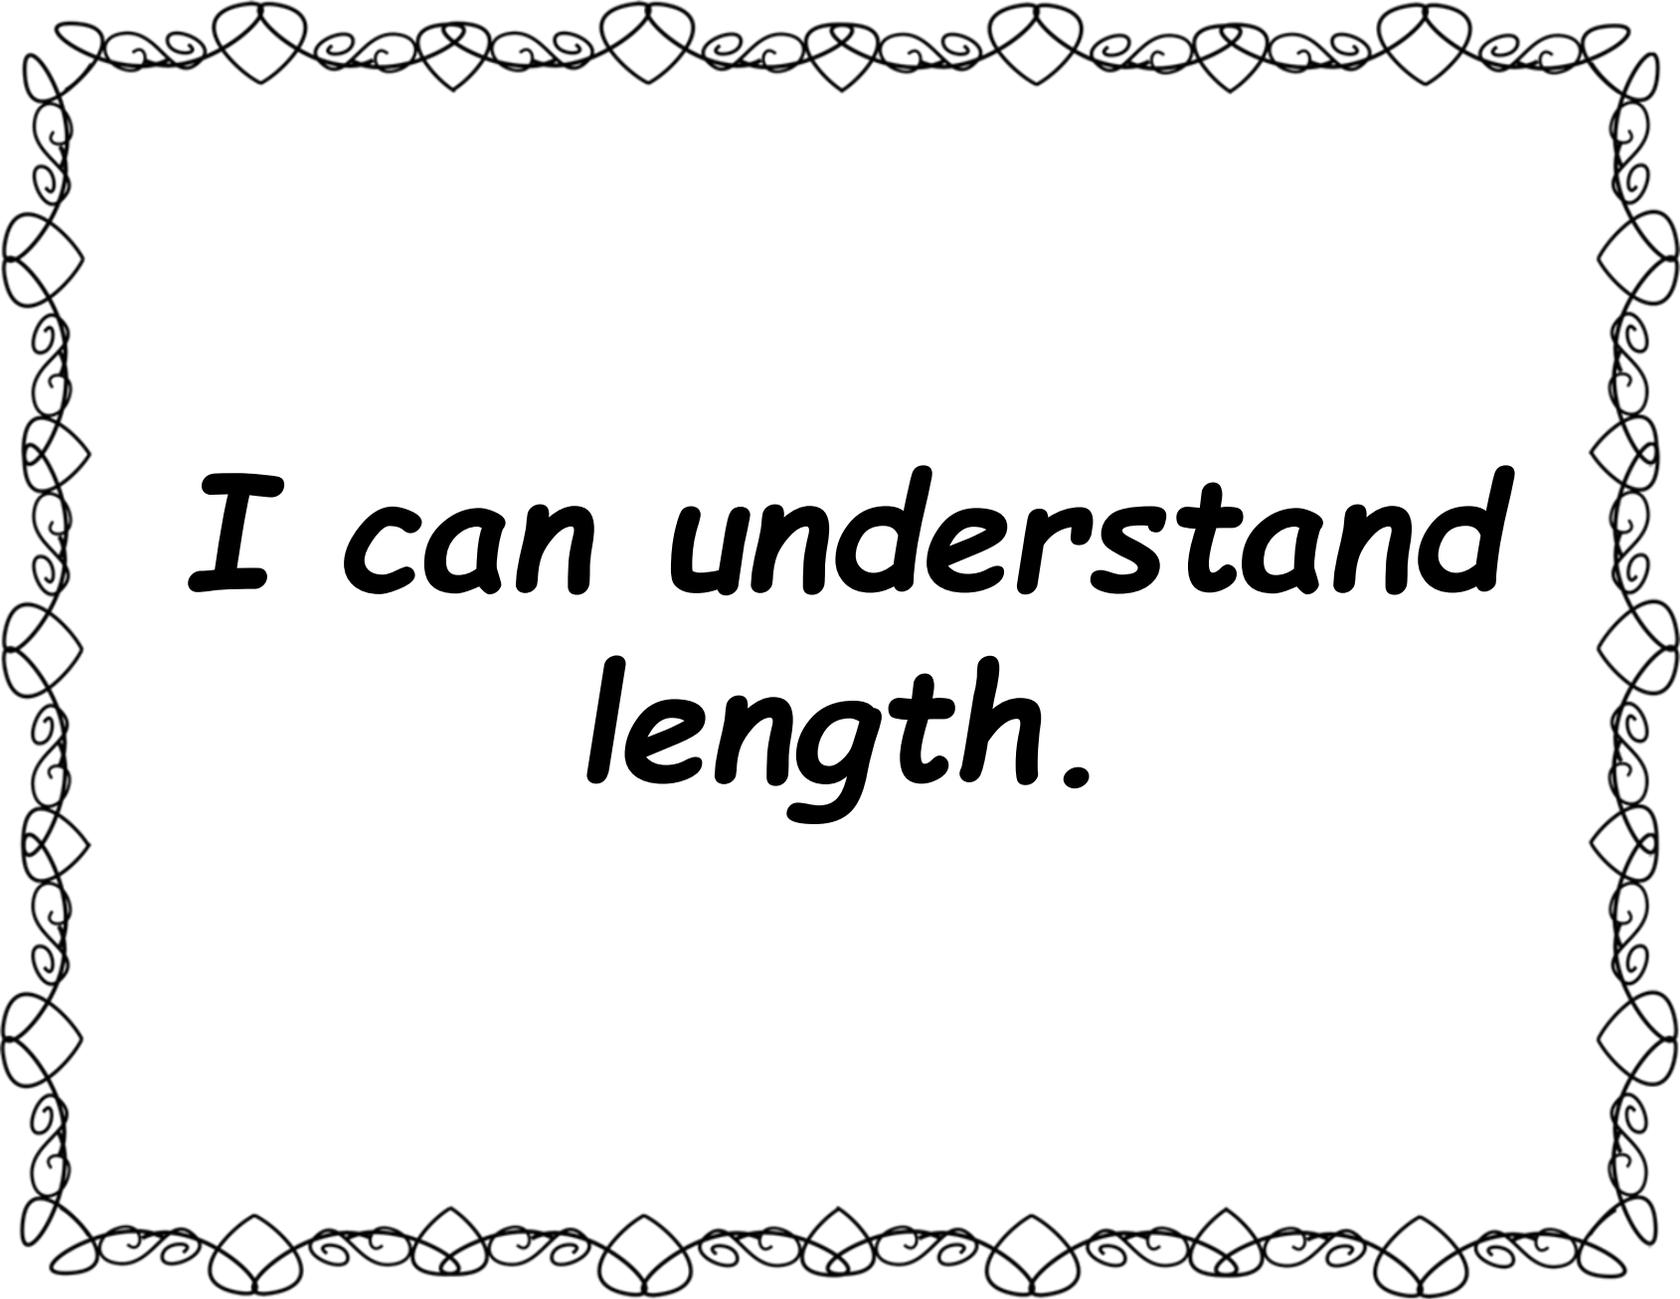

1<sup>st</sup> Grade Math

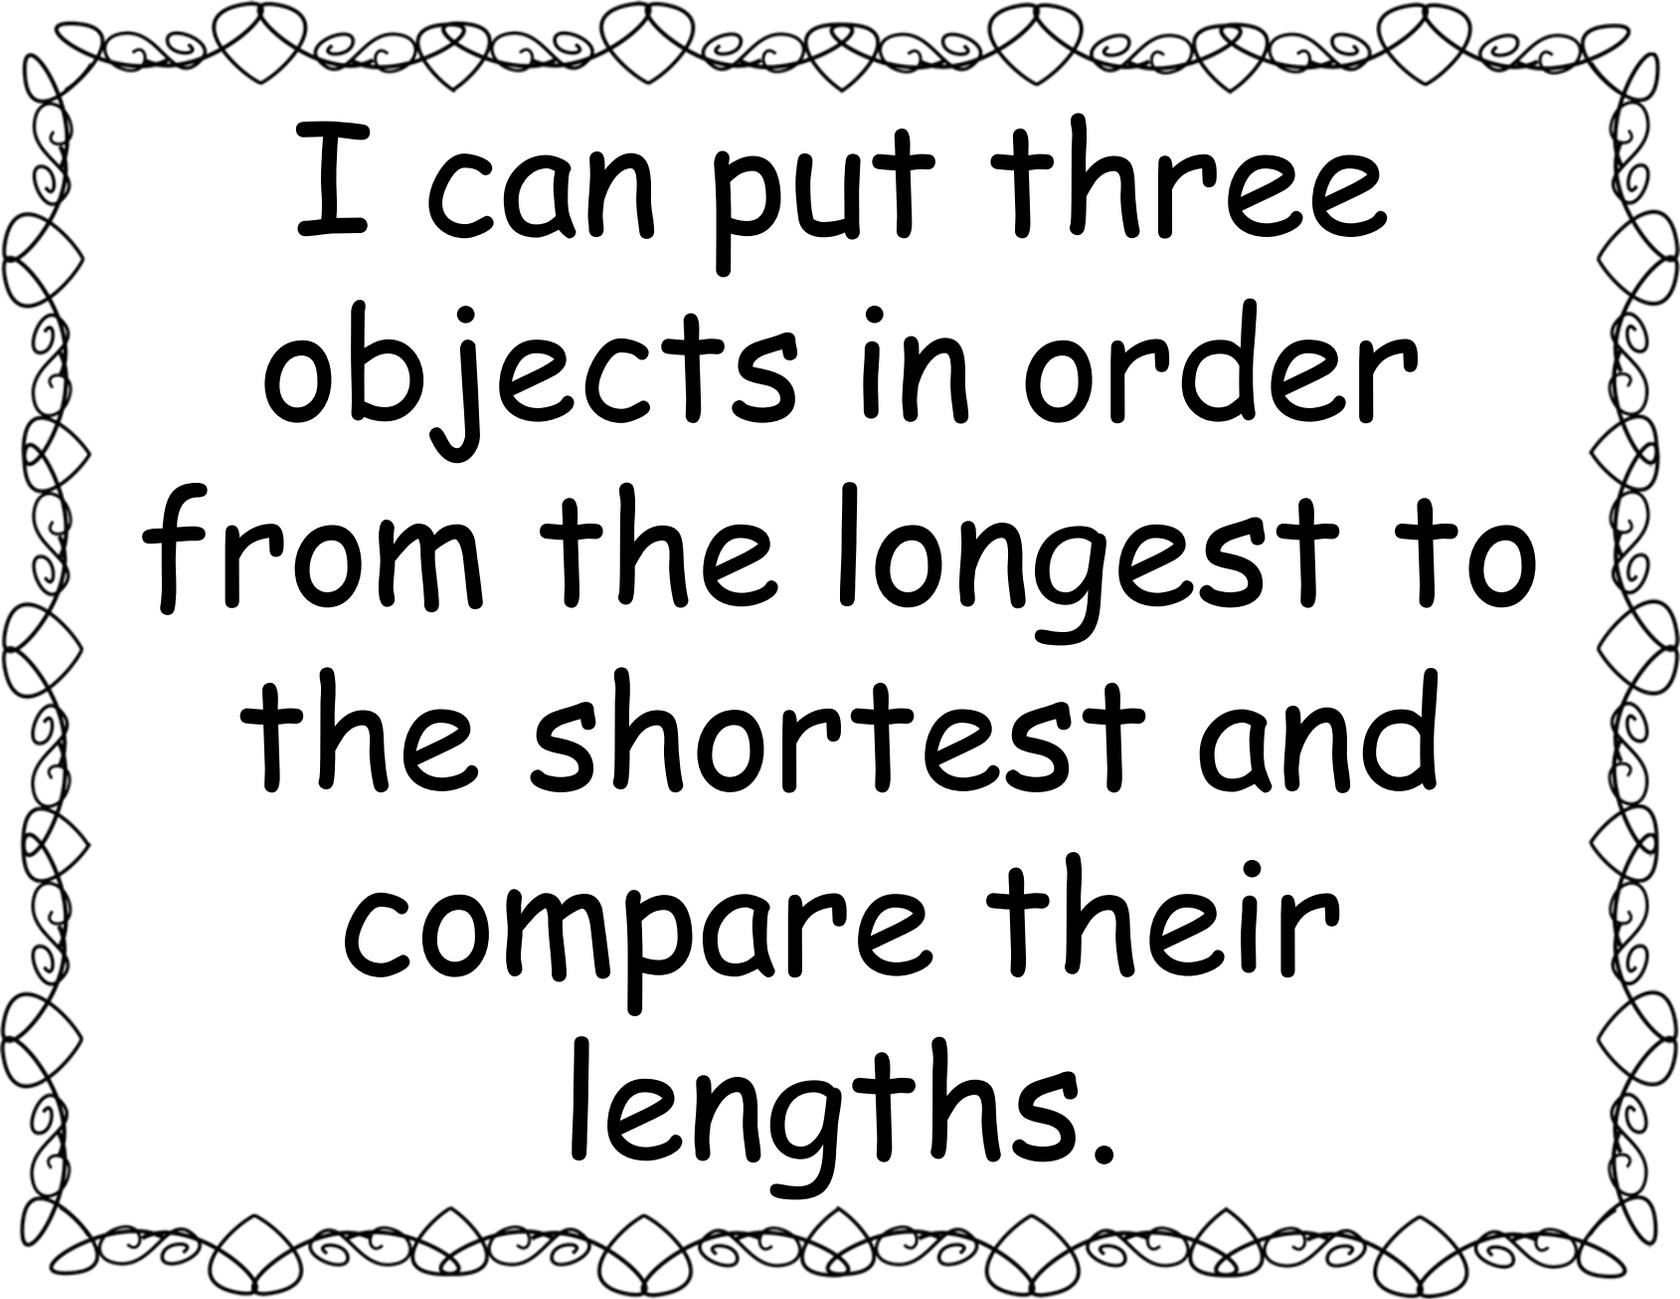

Measurement &

Data

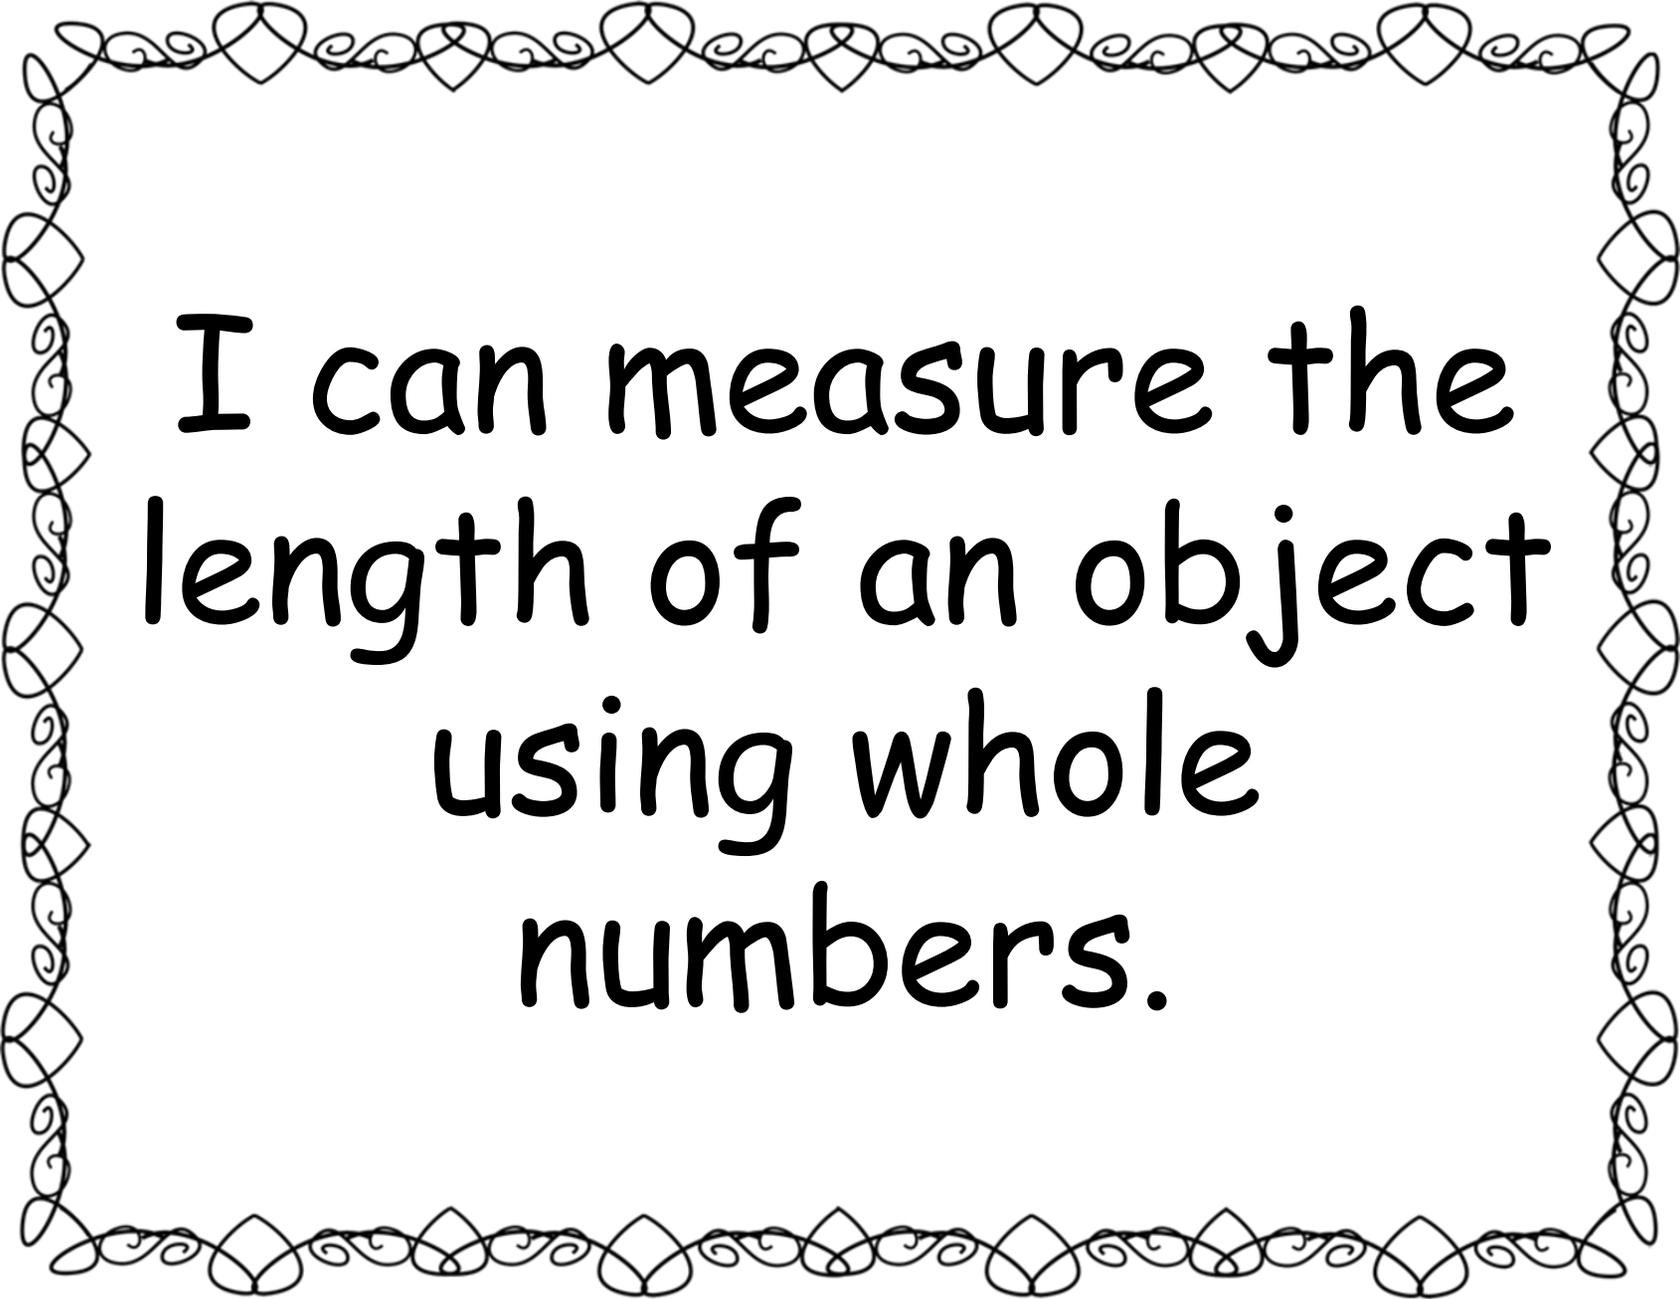

"I Can" Statements

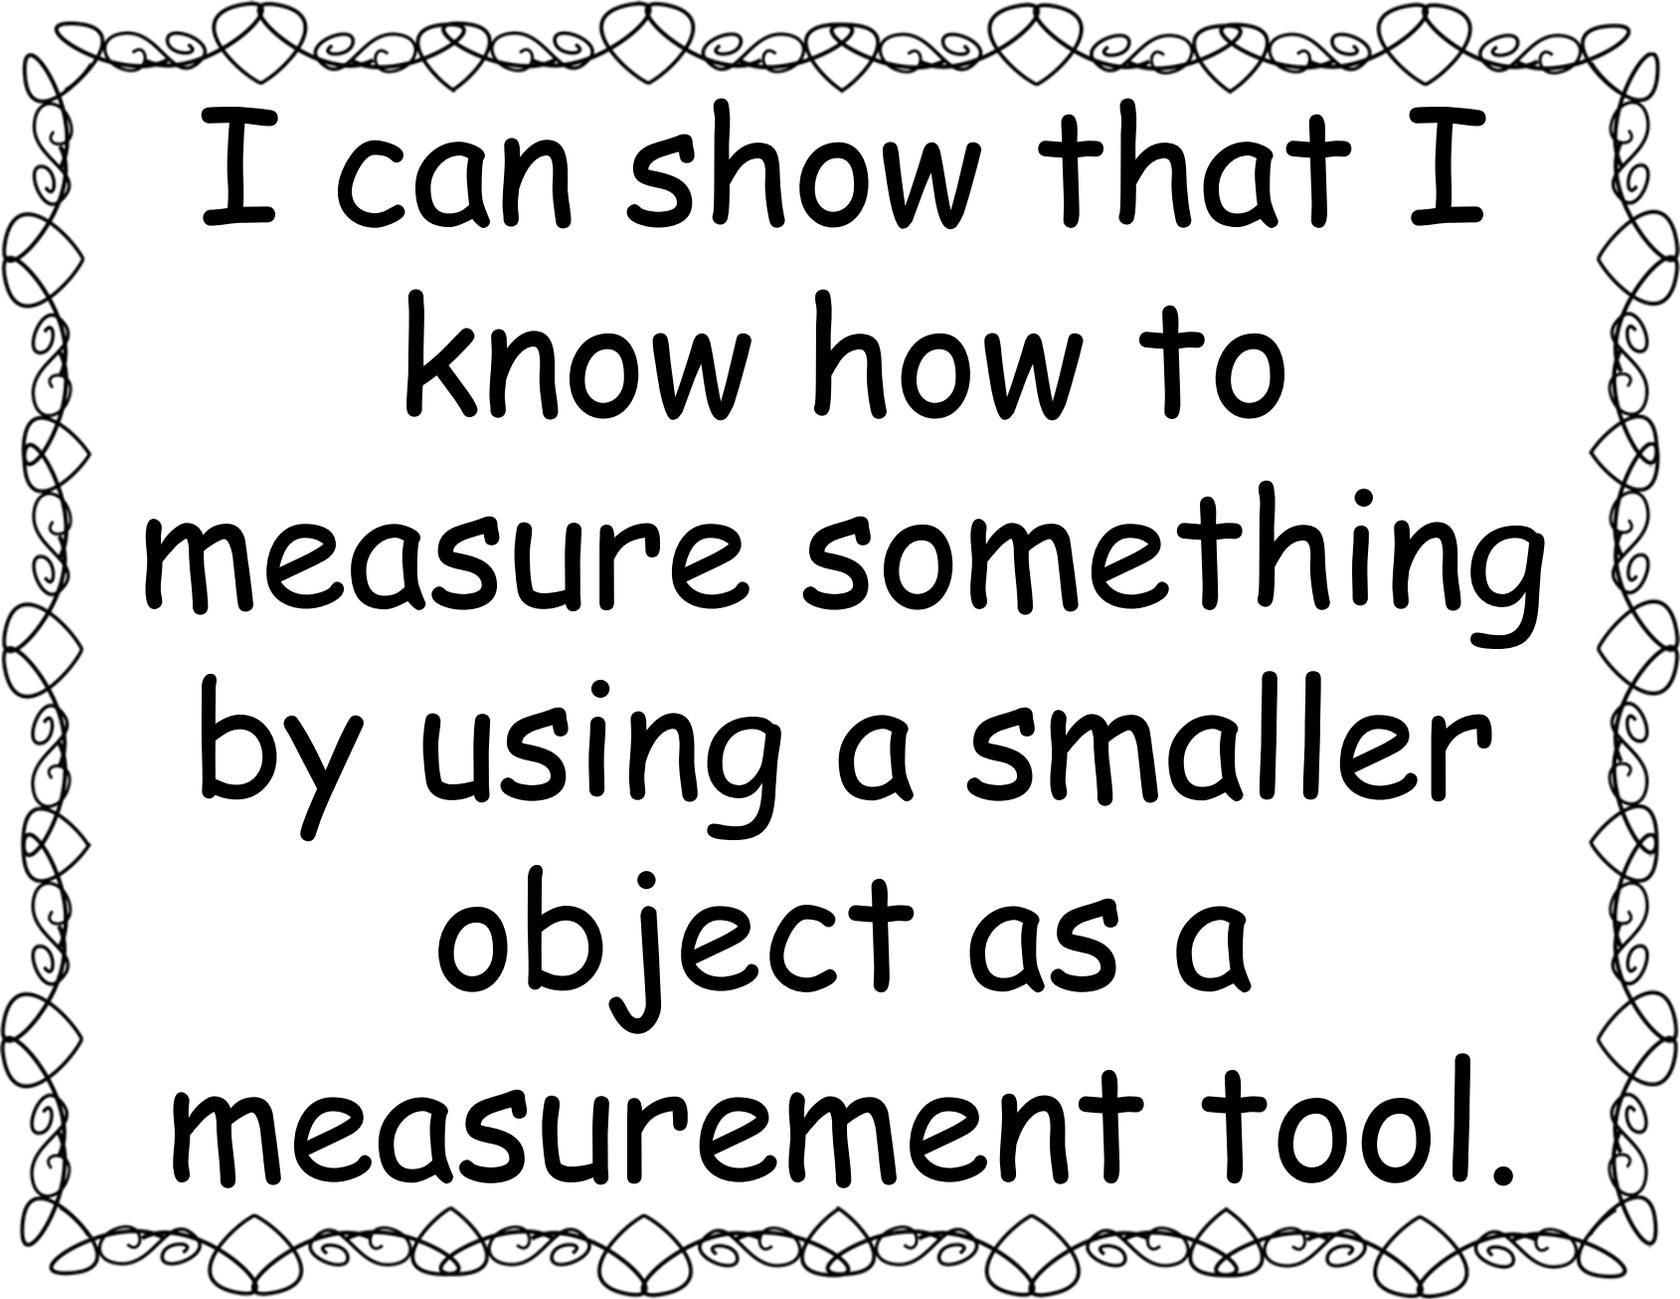

***I can understand  
length.***

I can put three  
objects in order  
from the longest to  
the shortest and  
compare their  
lengths.

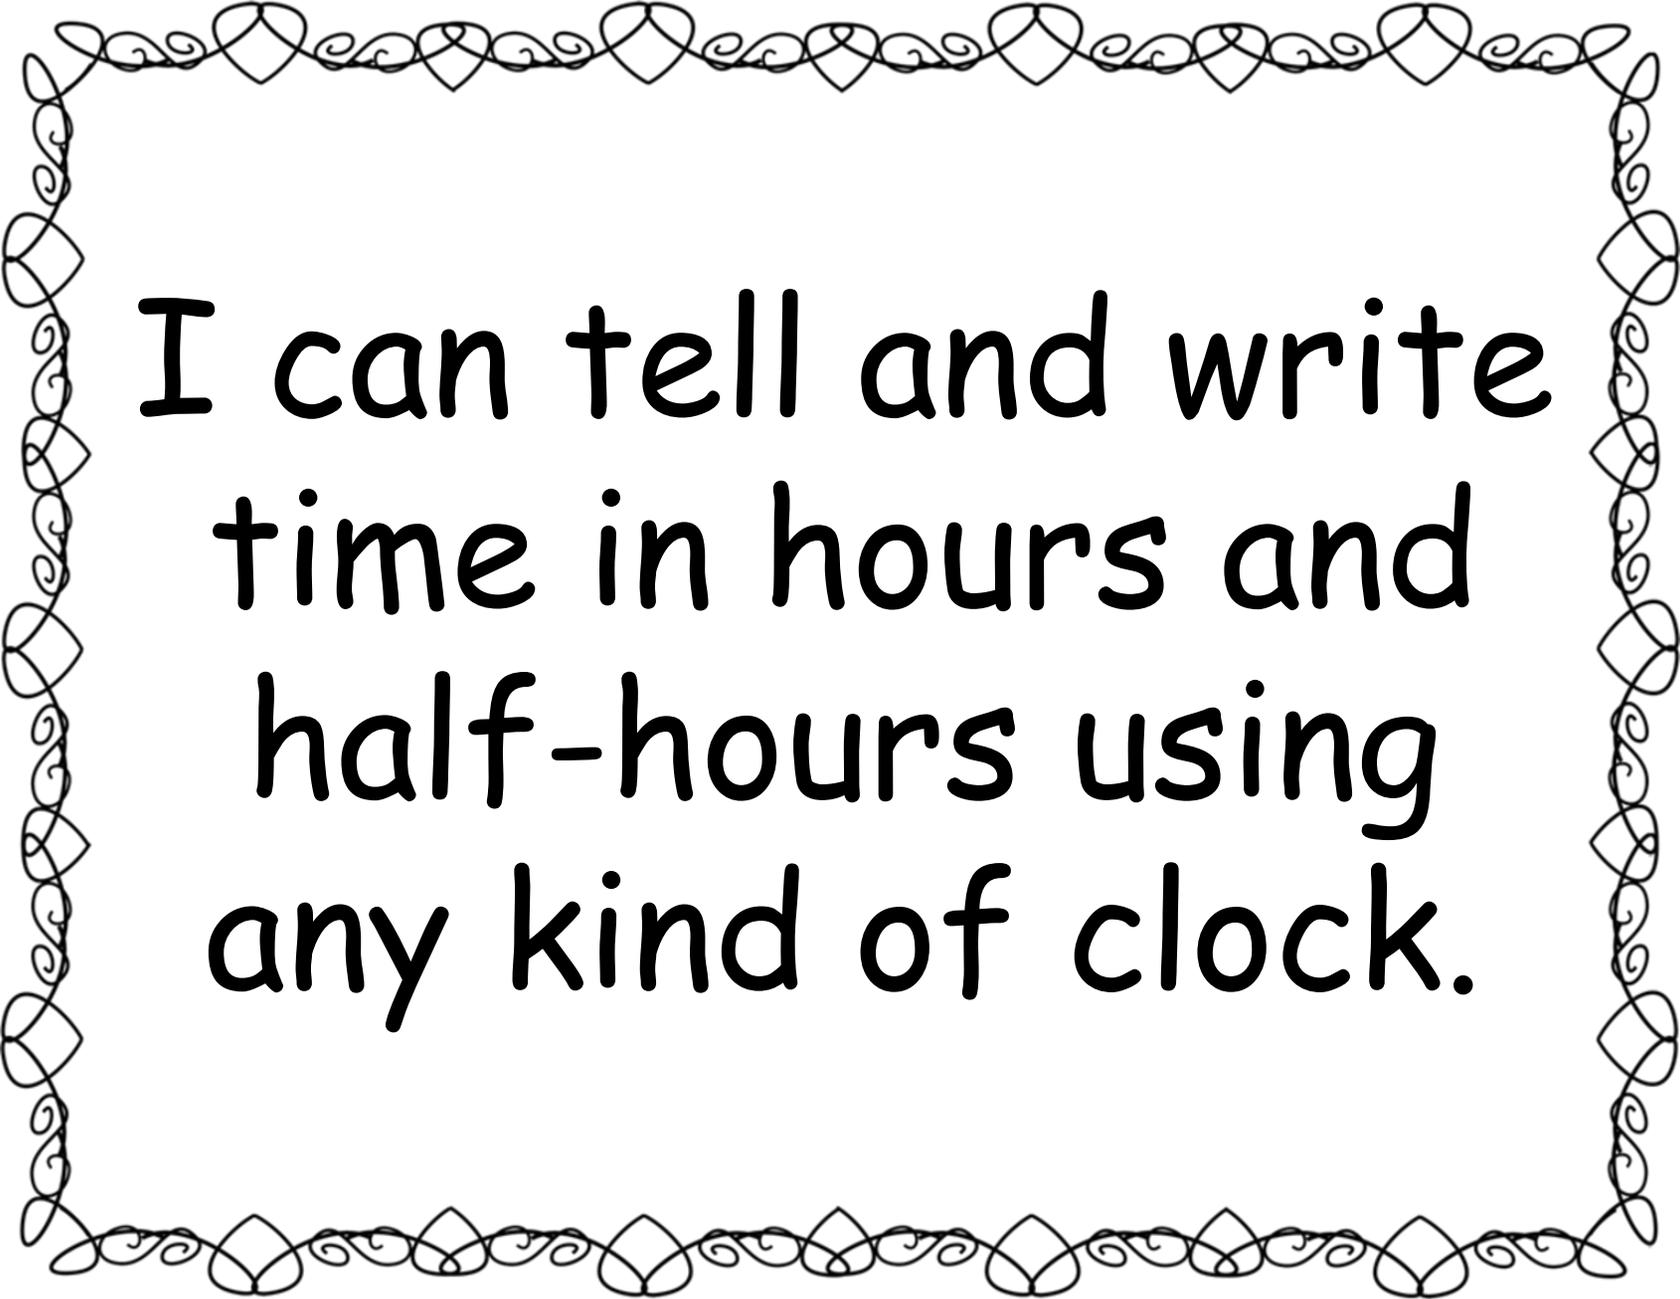

I can measure the  
length of an object  
using whole  
numbers.

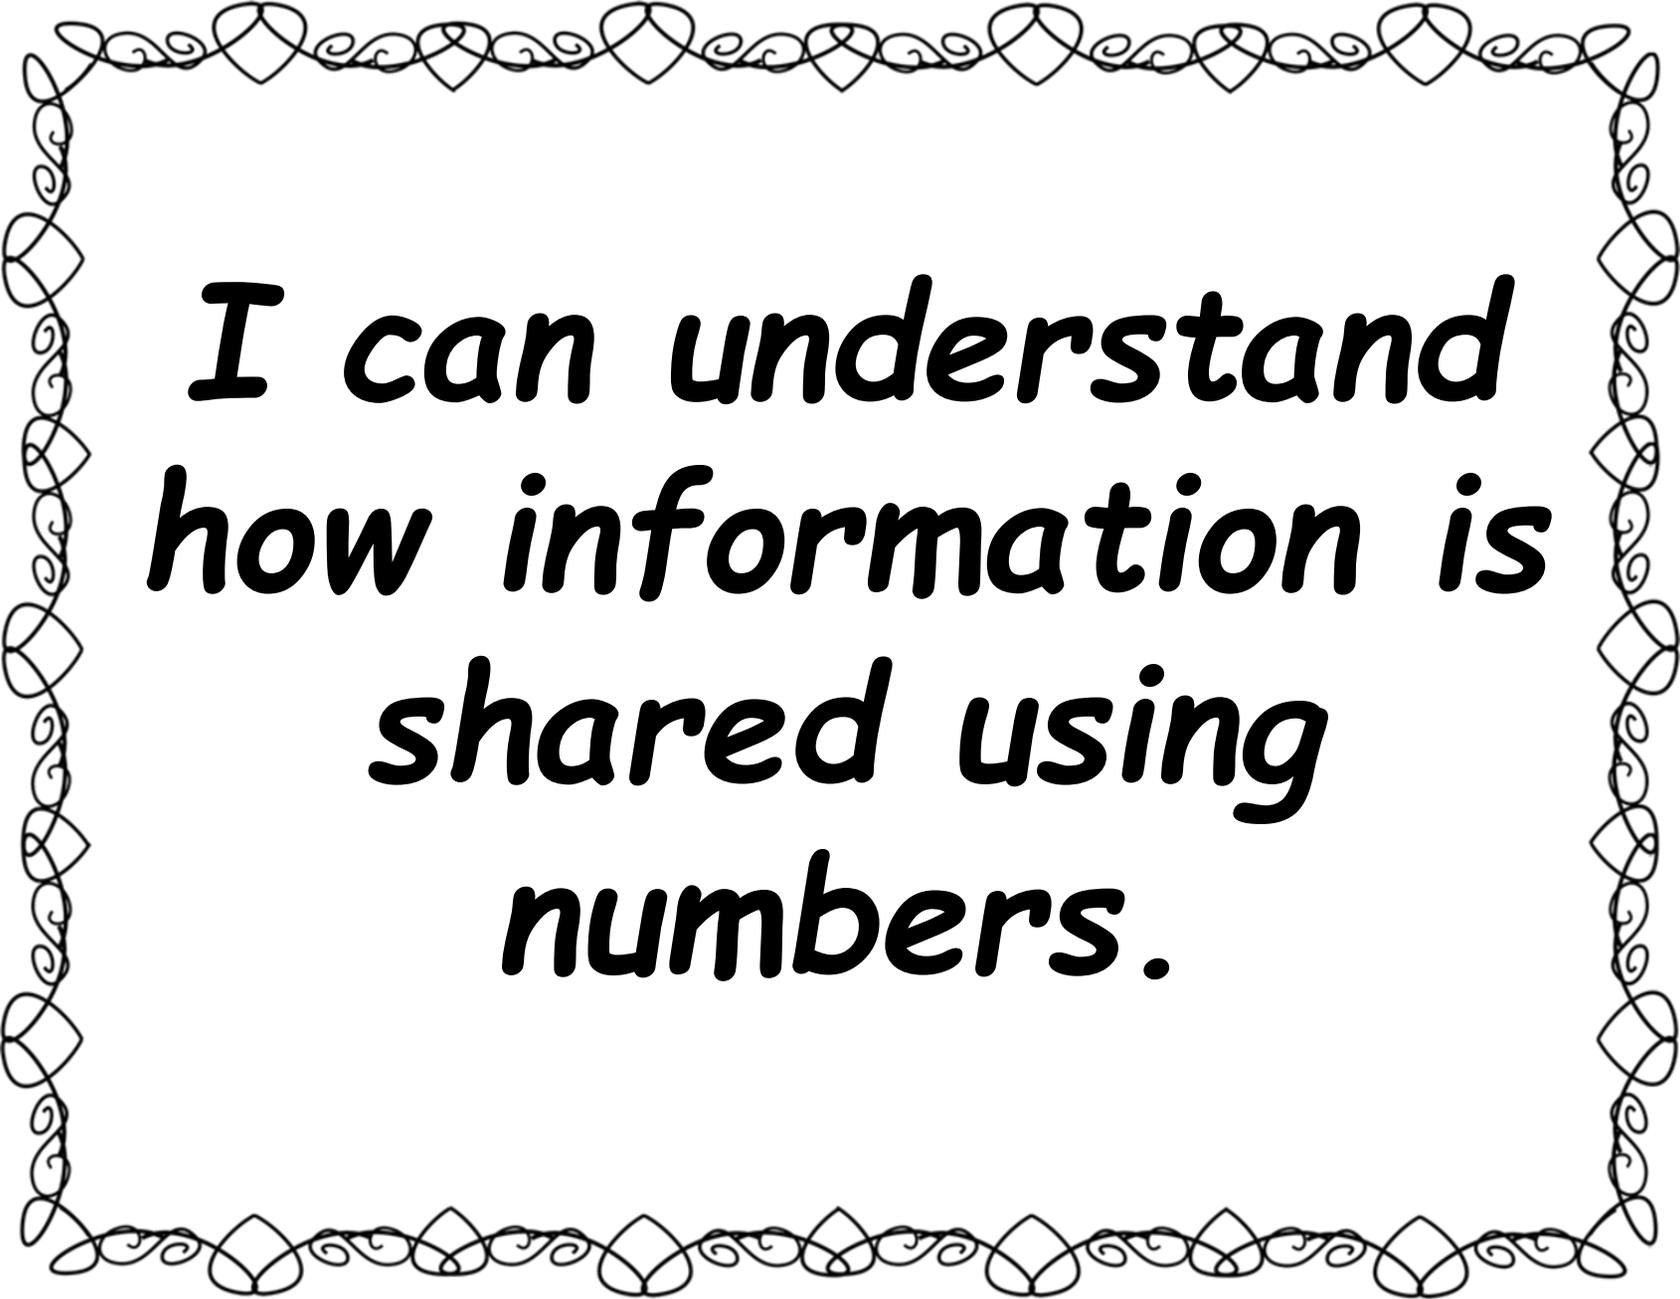

I can show that I  
know how to  
measure something  
by using a smaller  
object as a  
measurement tool.

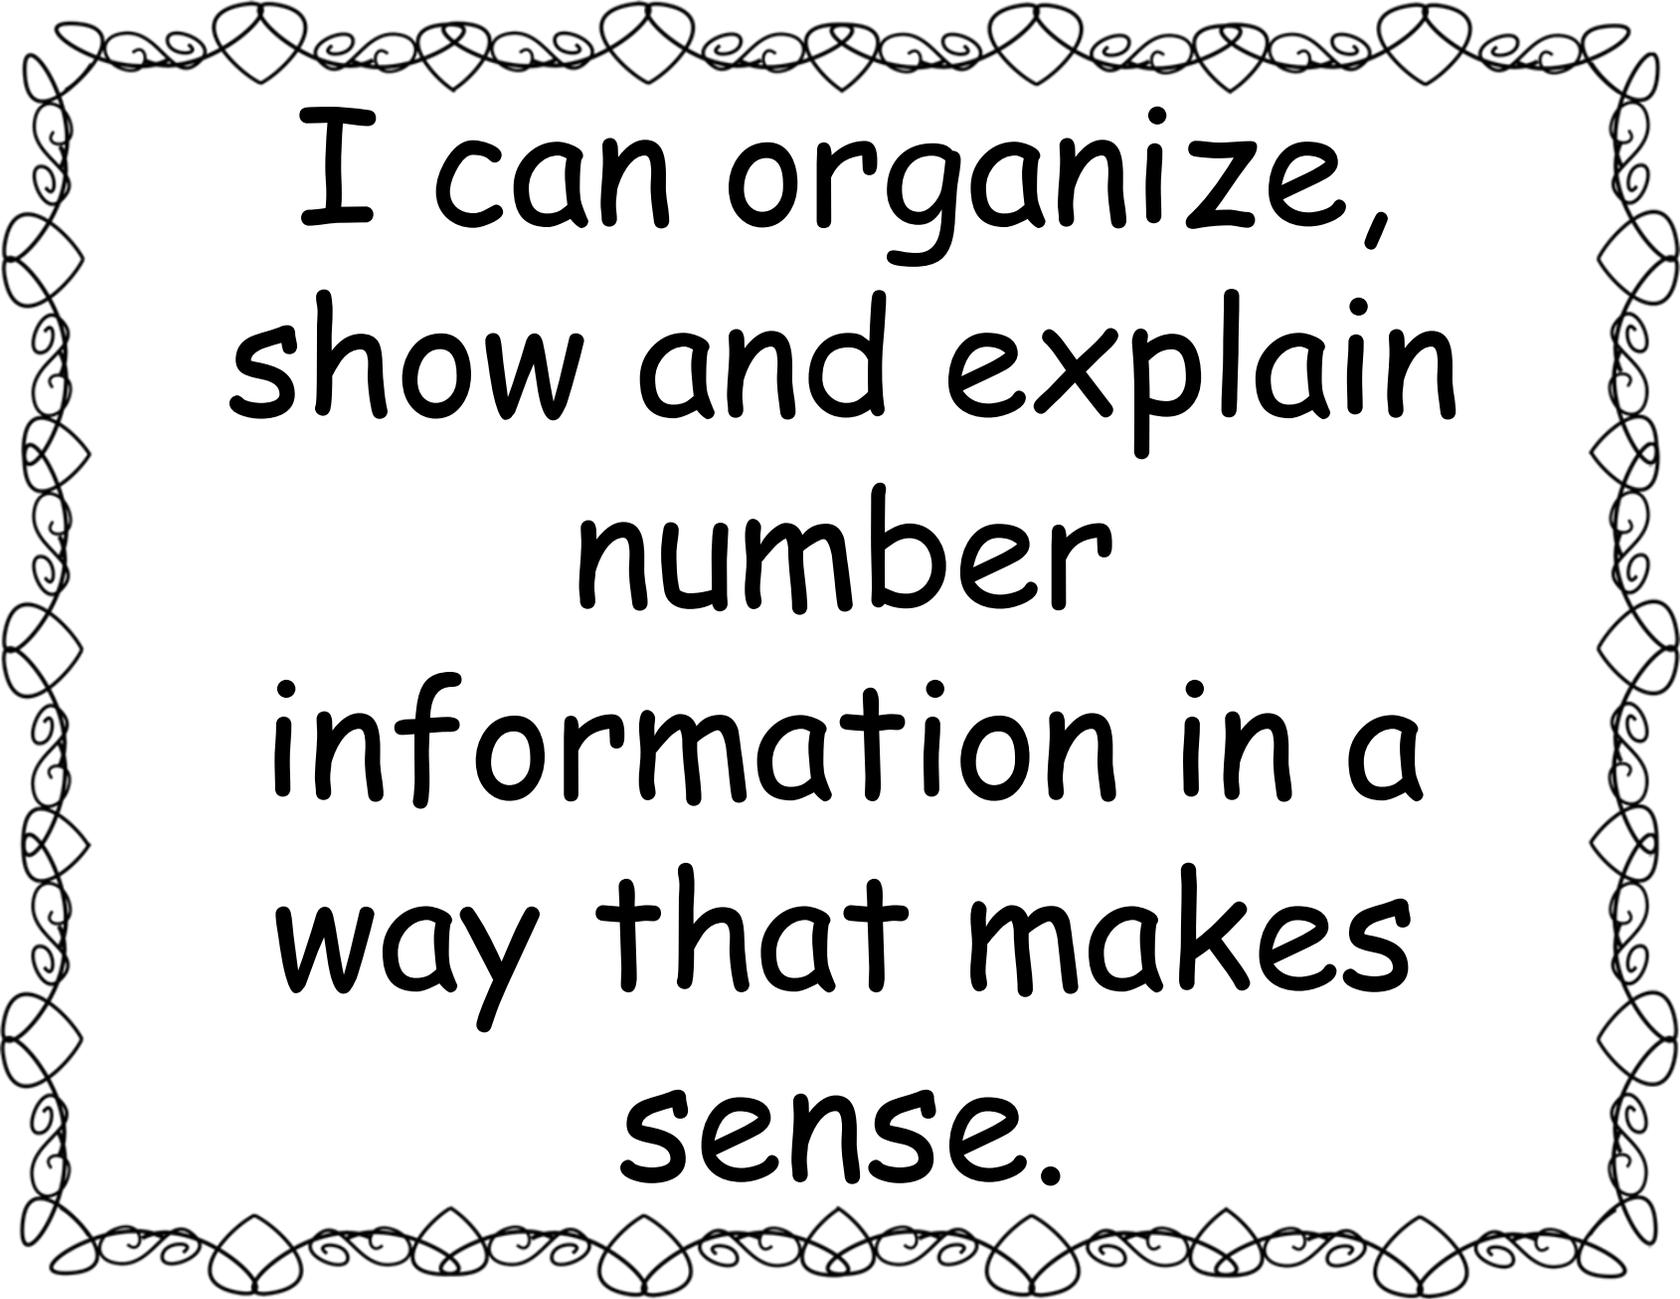

***I can tell time.***

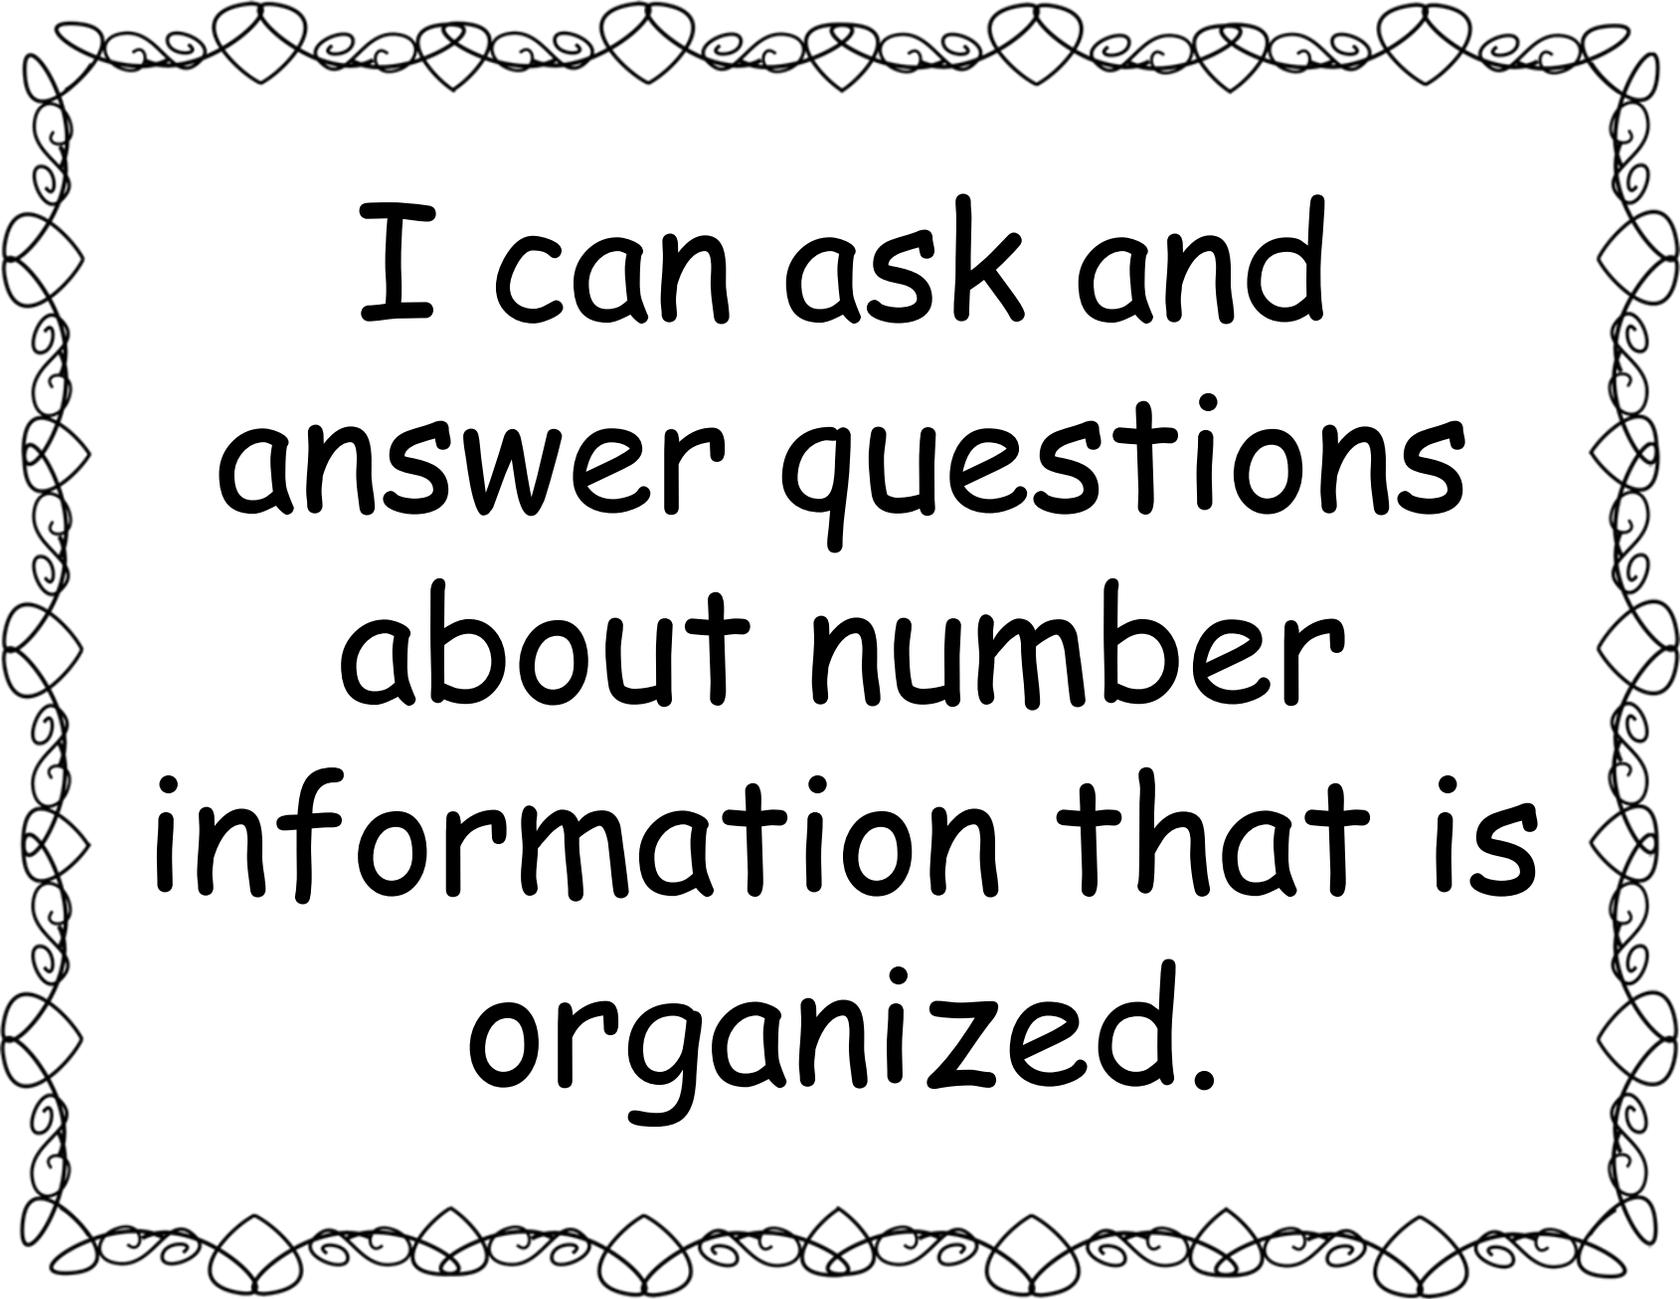

I can tell and write  
time in hours and  
half-hours using  
any kind of clock.

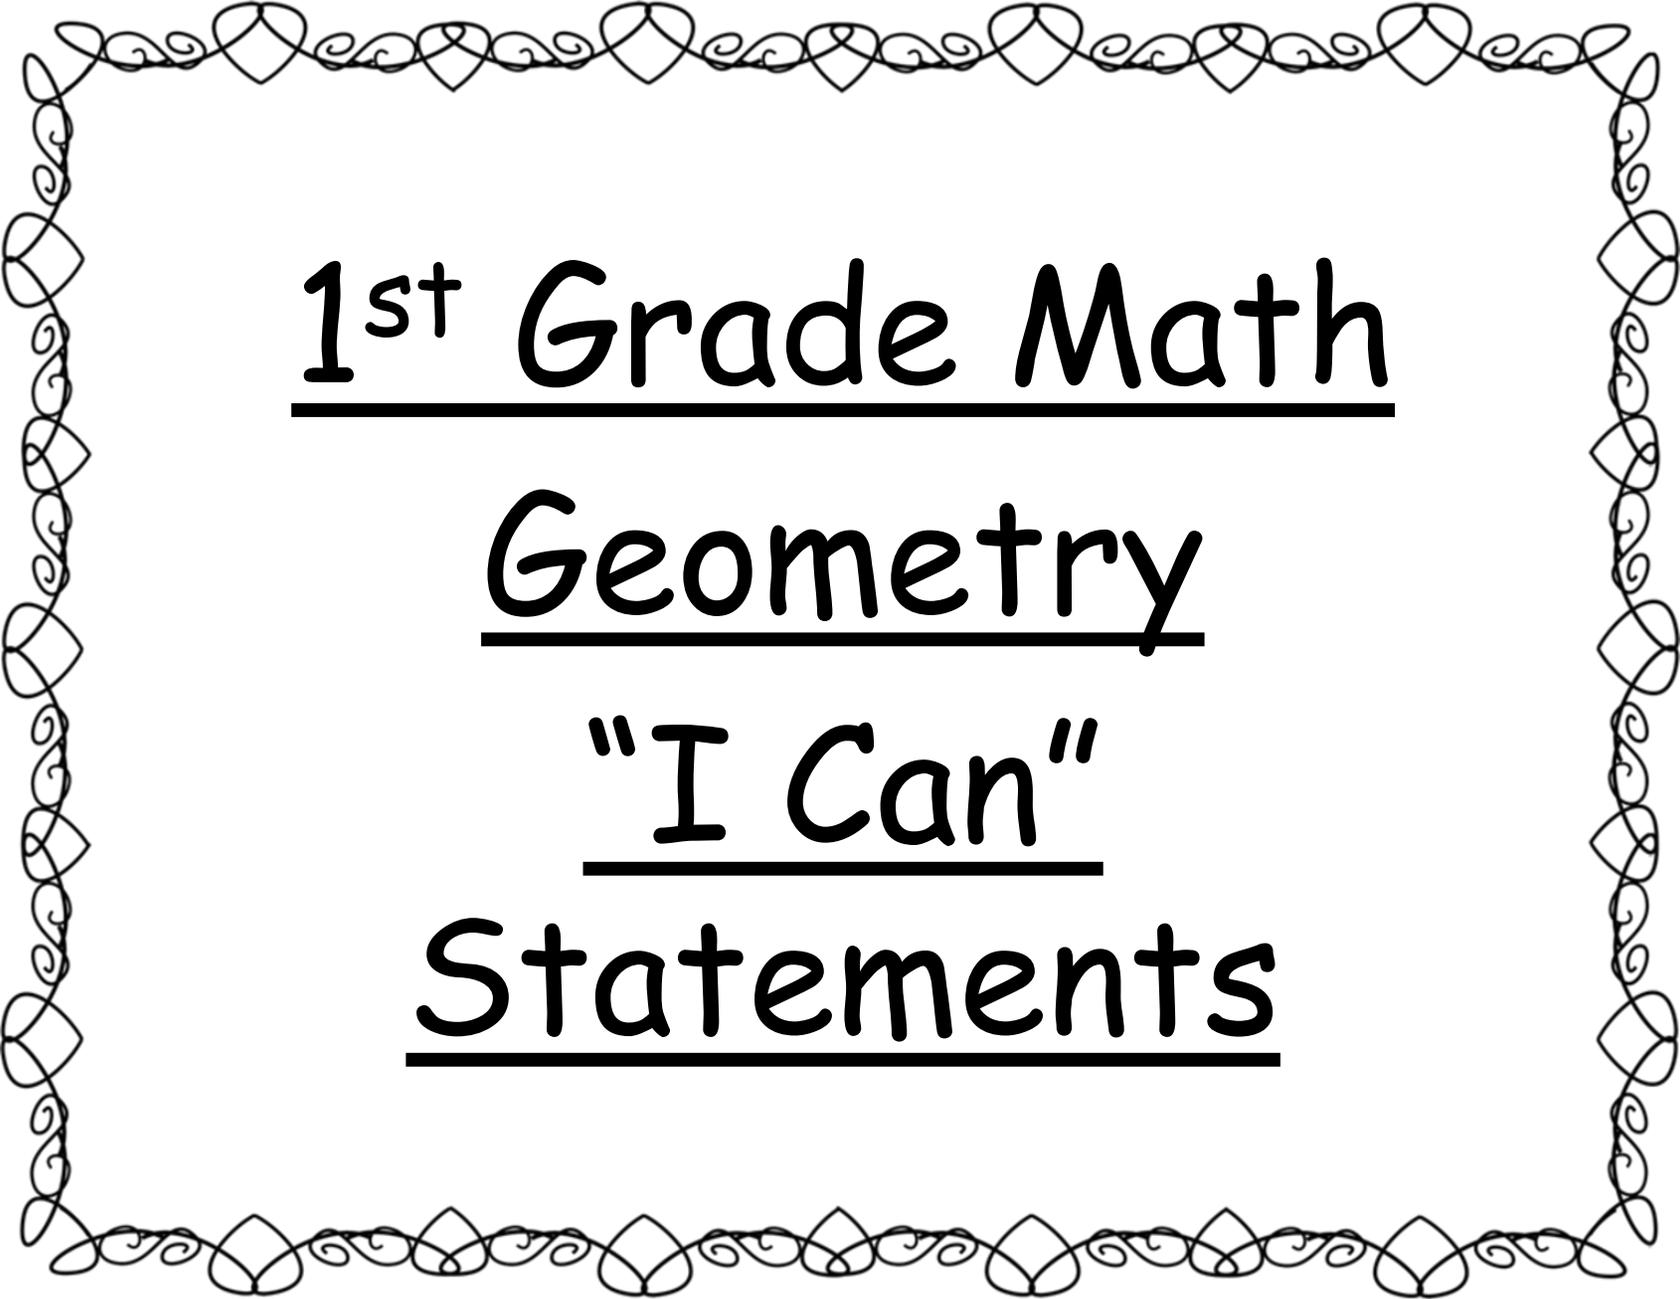

***I can understand  
how information is  
shared using  
numbers.***

I can organize,  
show and explain  
number  
information in a  
way that makes  
sense.

I can ask and  
answer questions  
about number  
information that is  
organized.

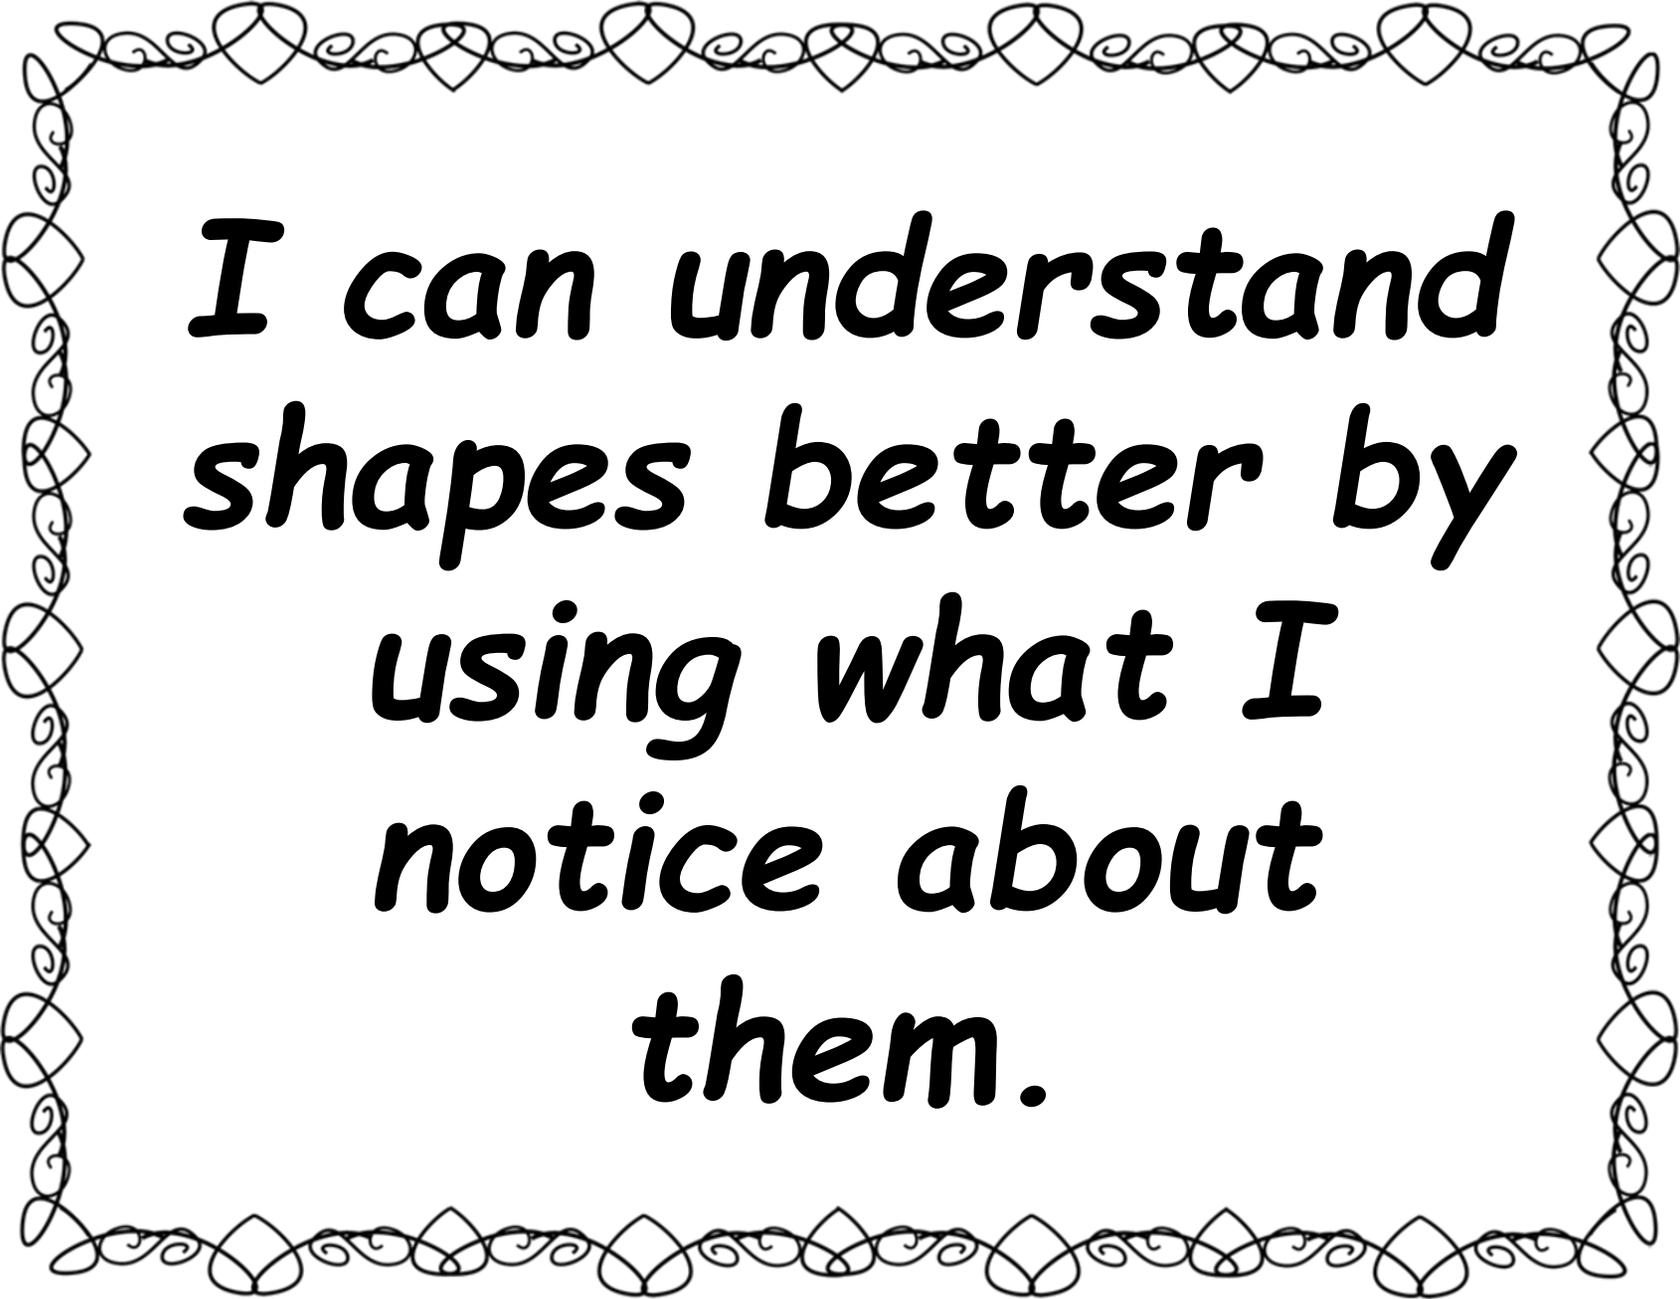

1<sup>st</sup> Grade Math

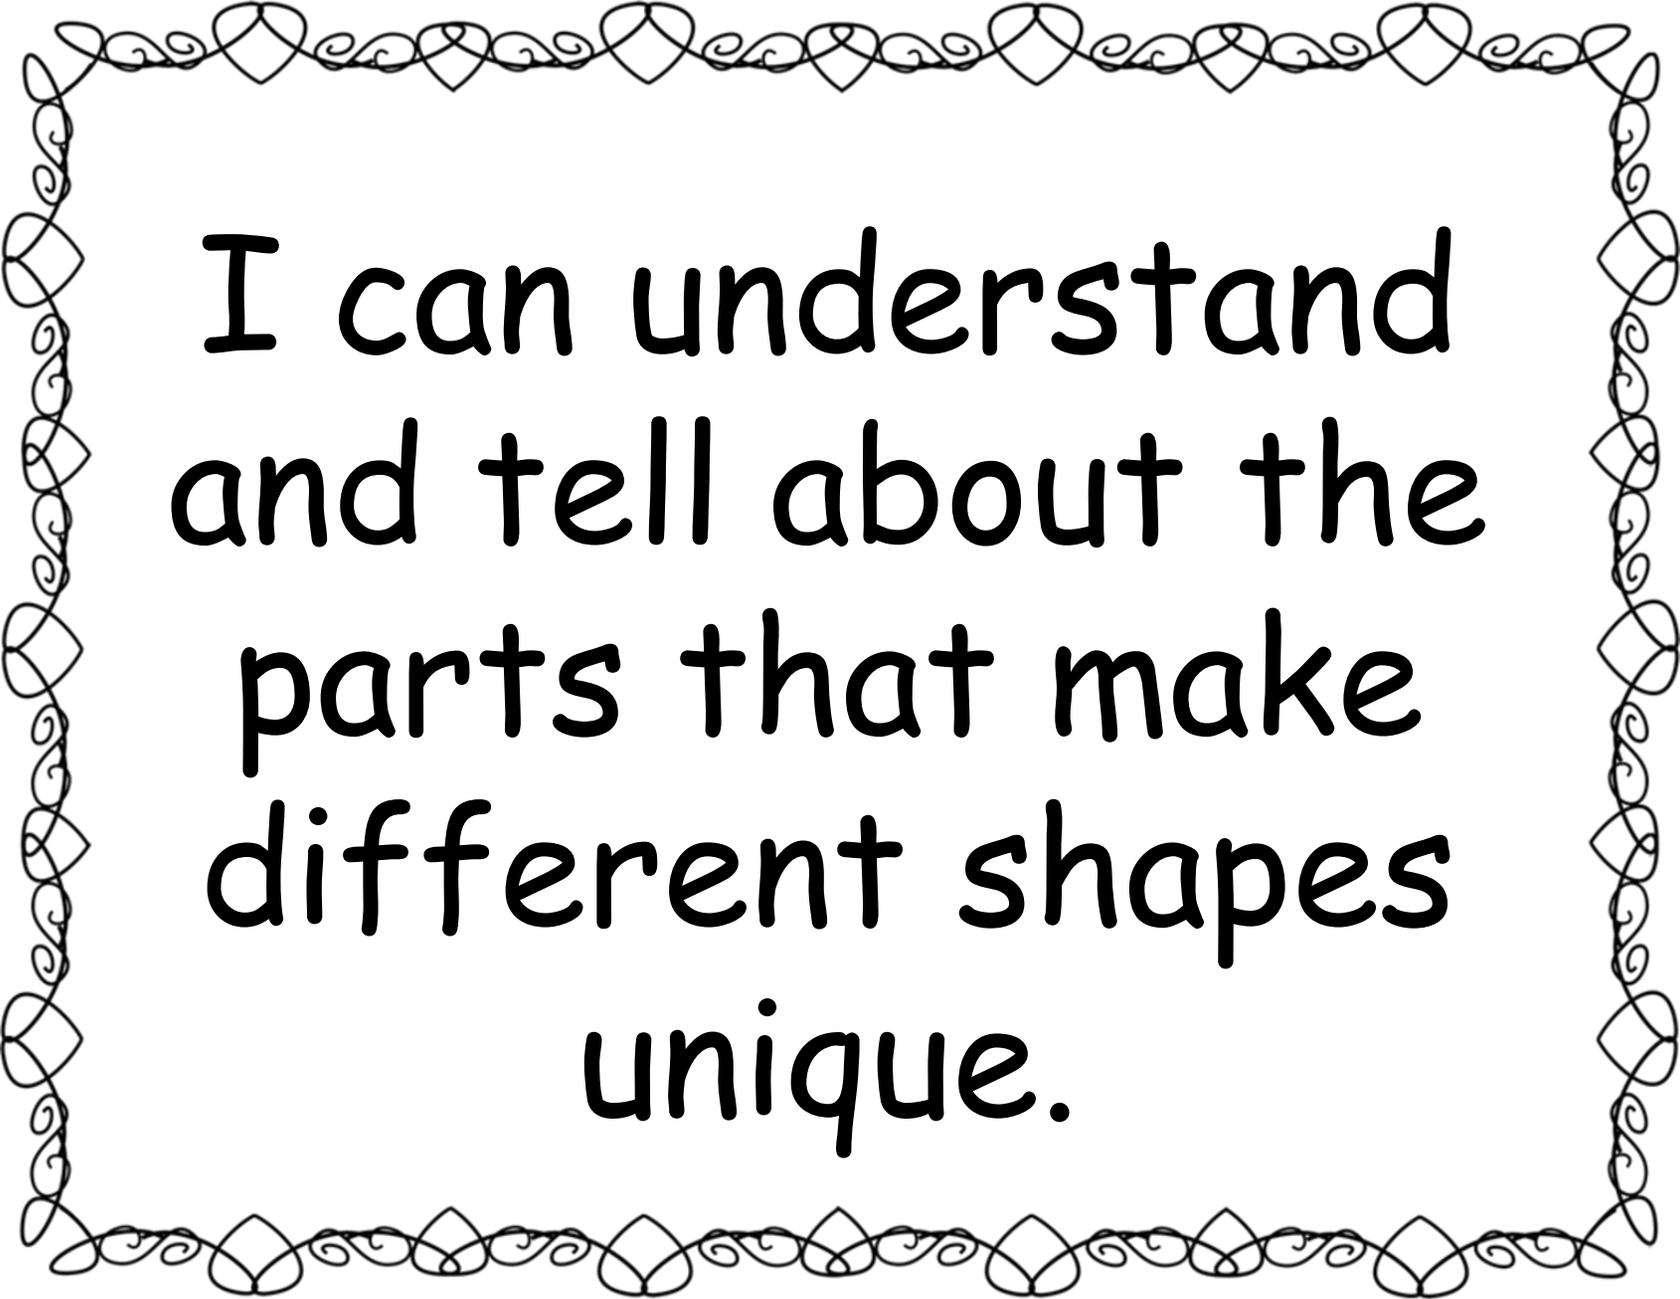

Geometry

"I Can"

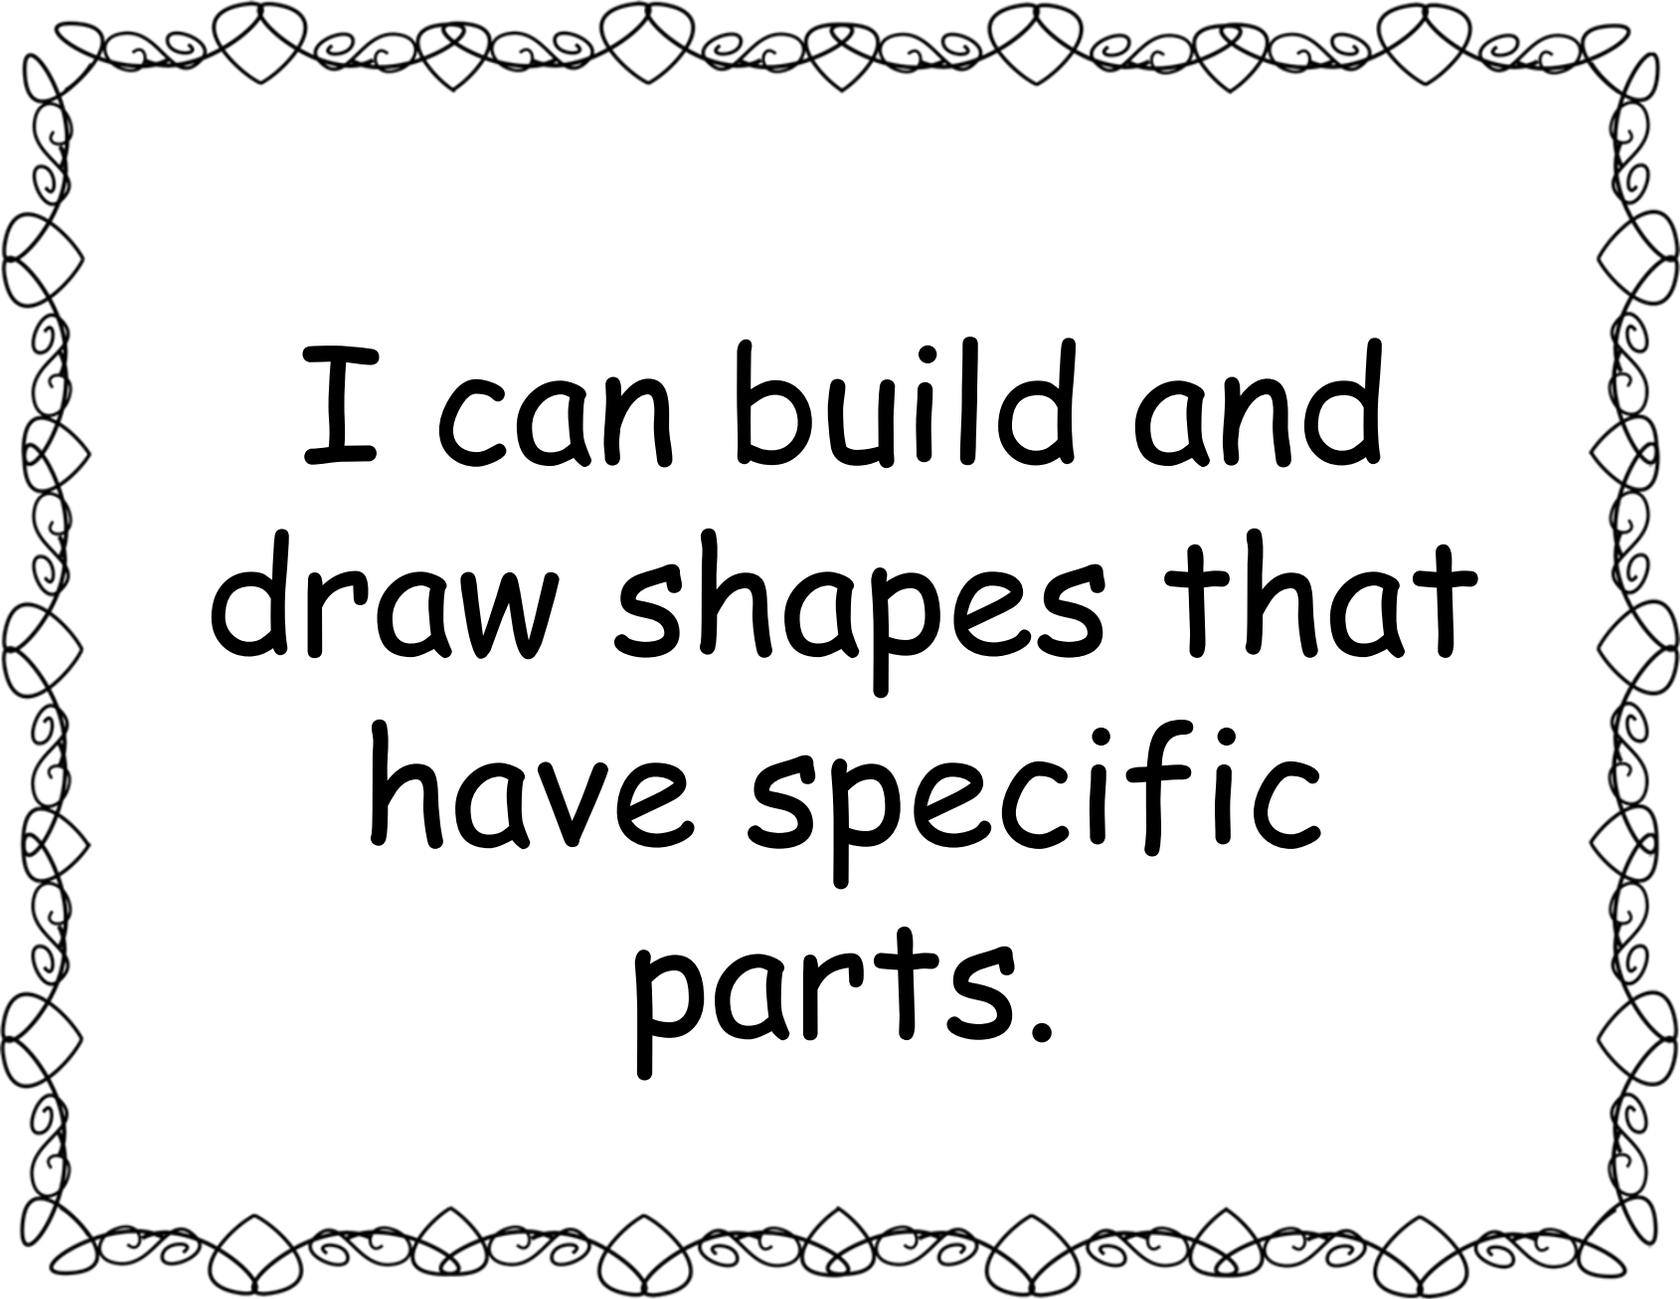

Statements

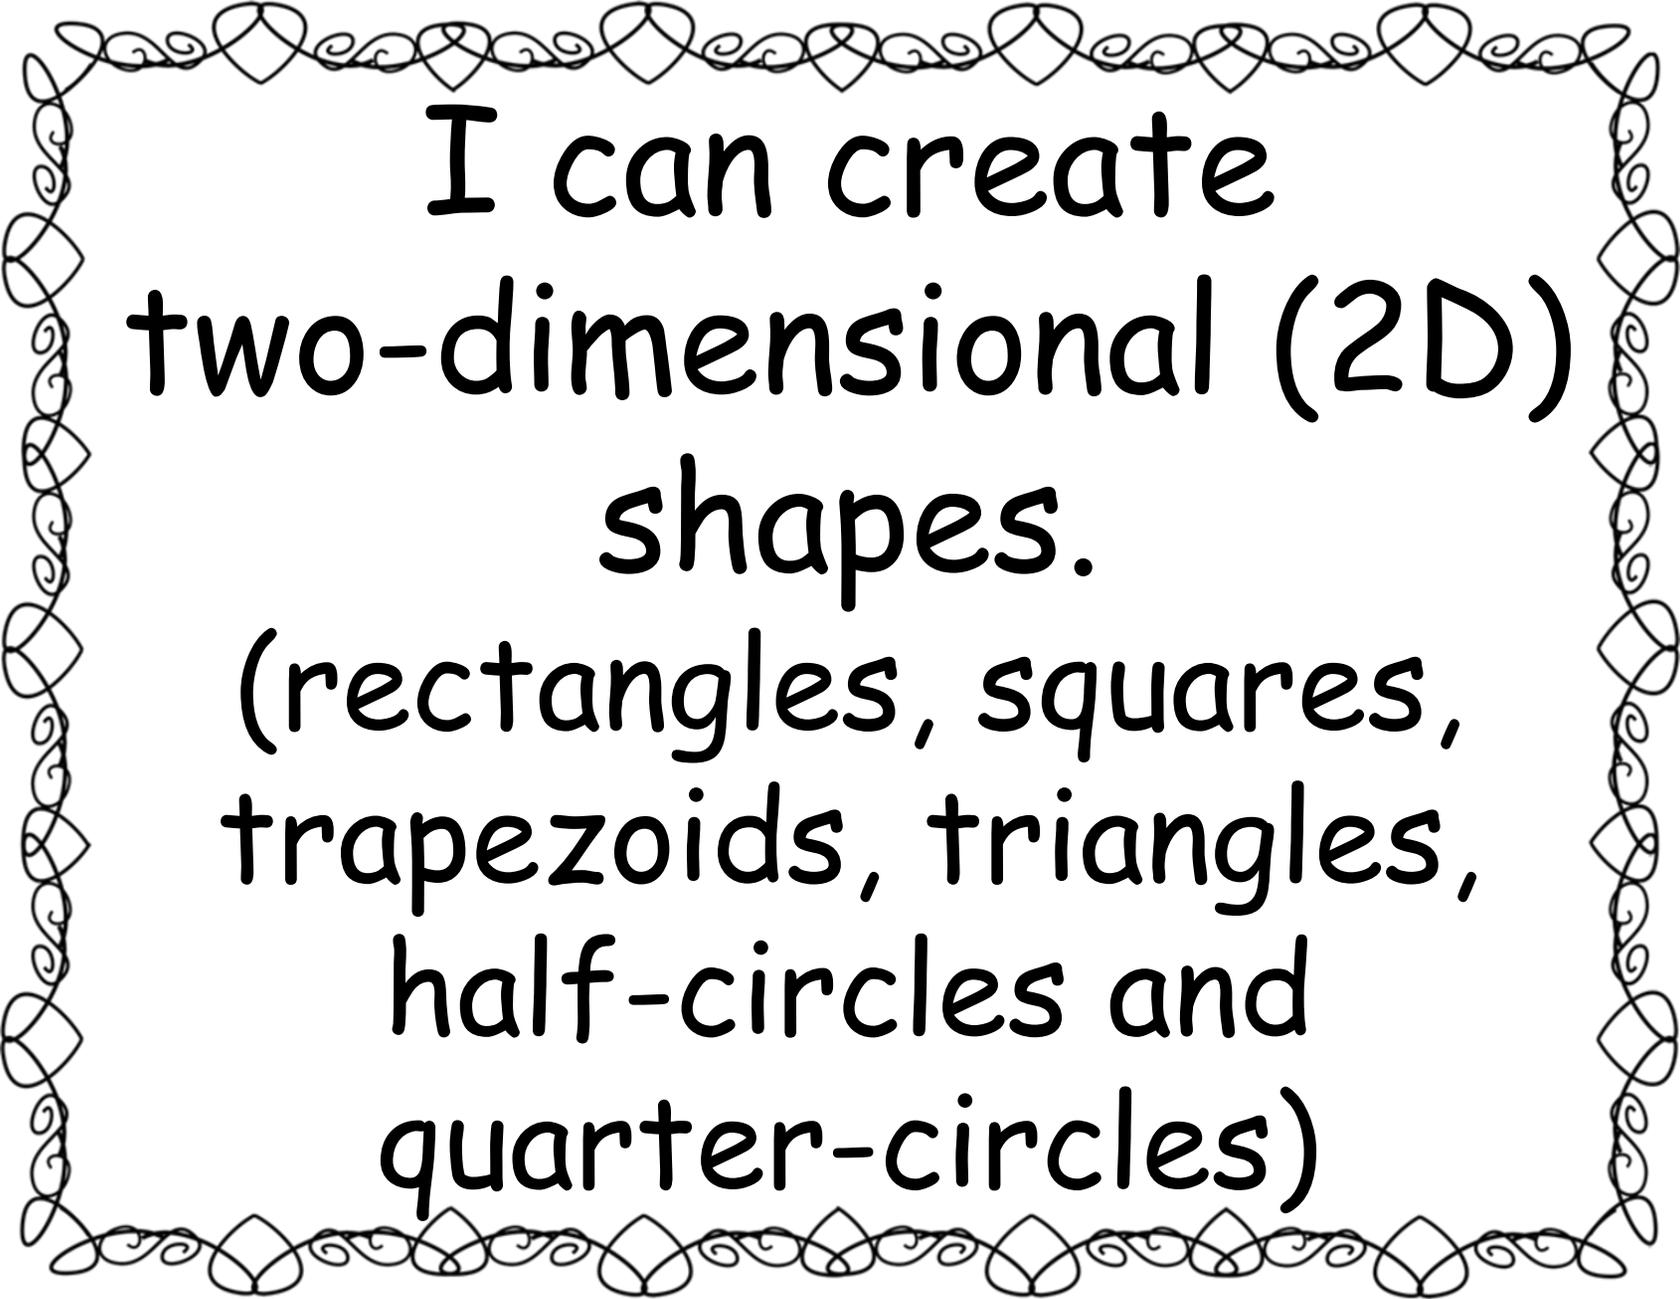

***I can understand  
shapes better by  
using what I  
notice about  
them.***

I can understand  
and tell about the  
parts that make  
different shapes  
unique.

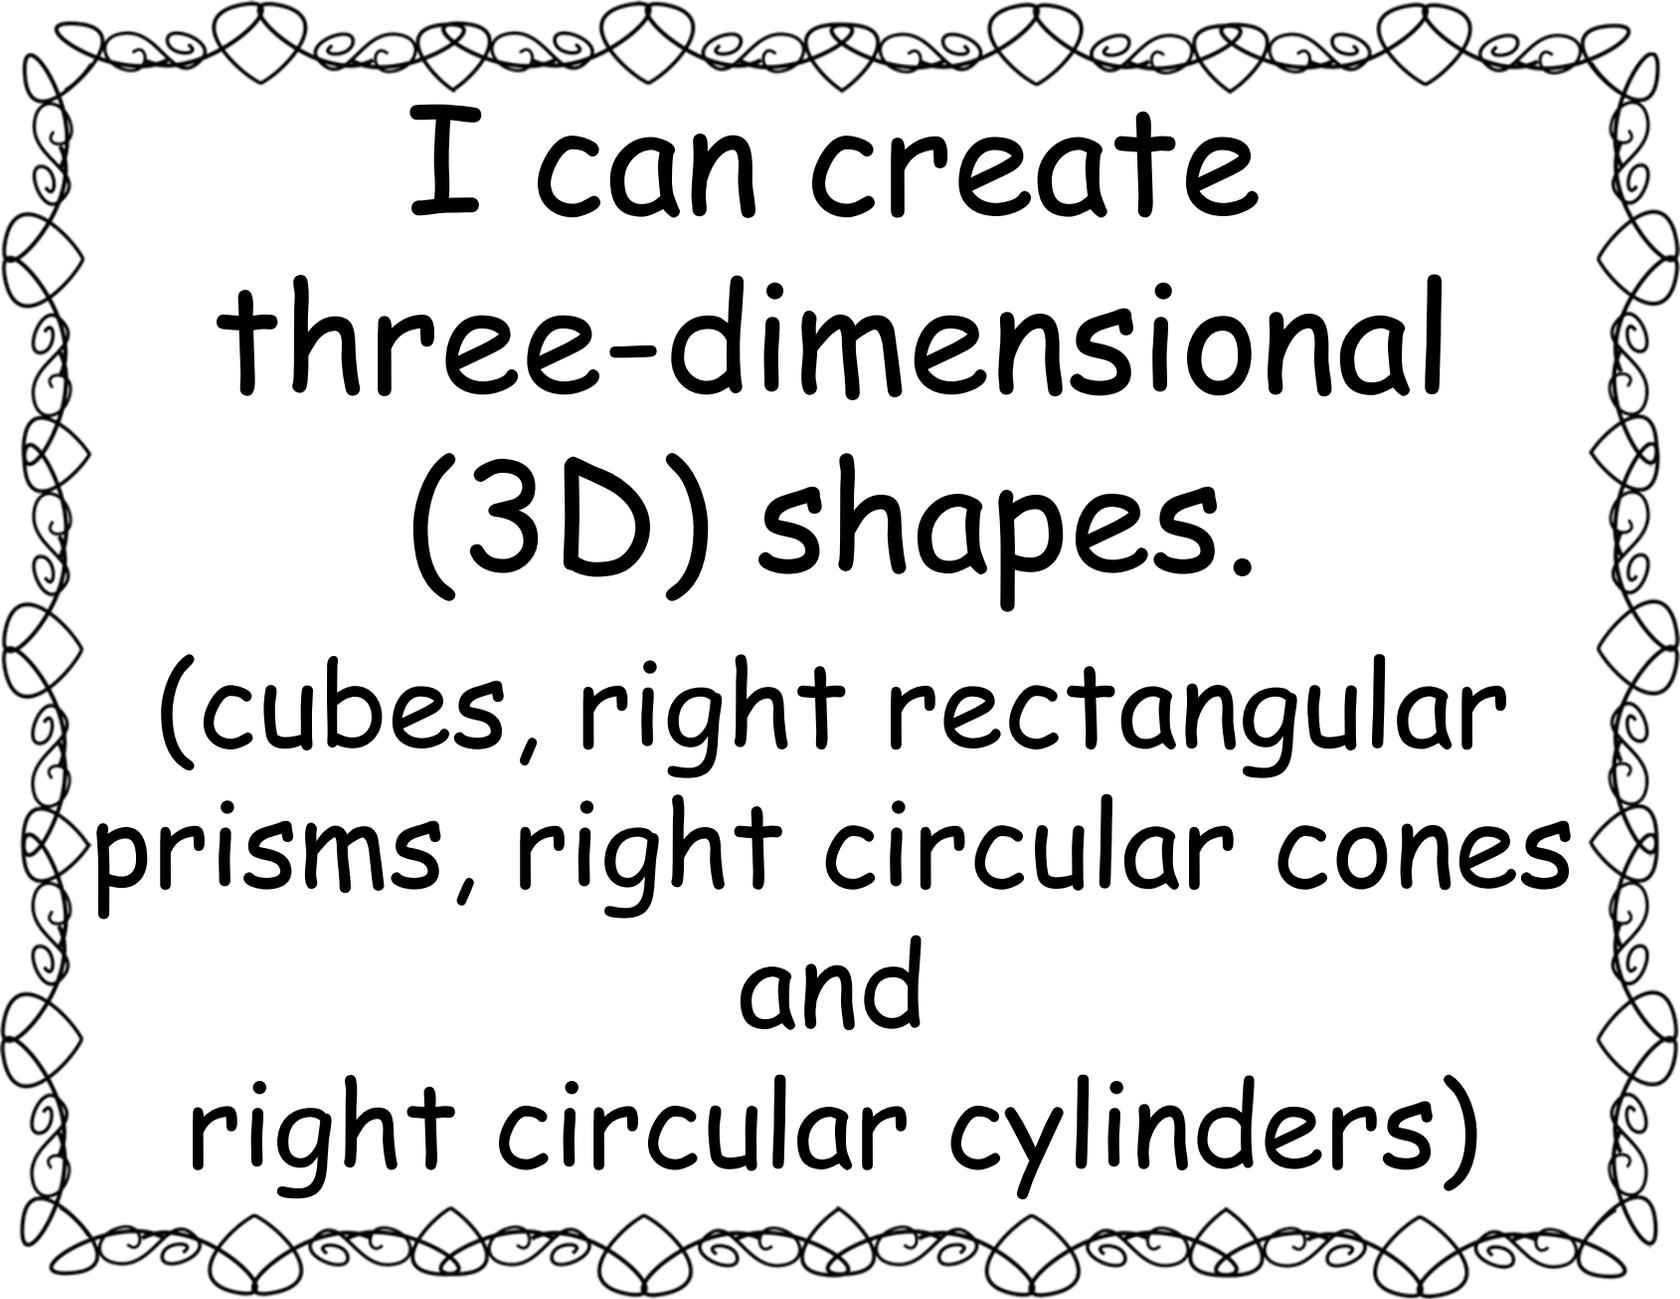

I can build and  
draw shapes that  
have specific  
parts.

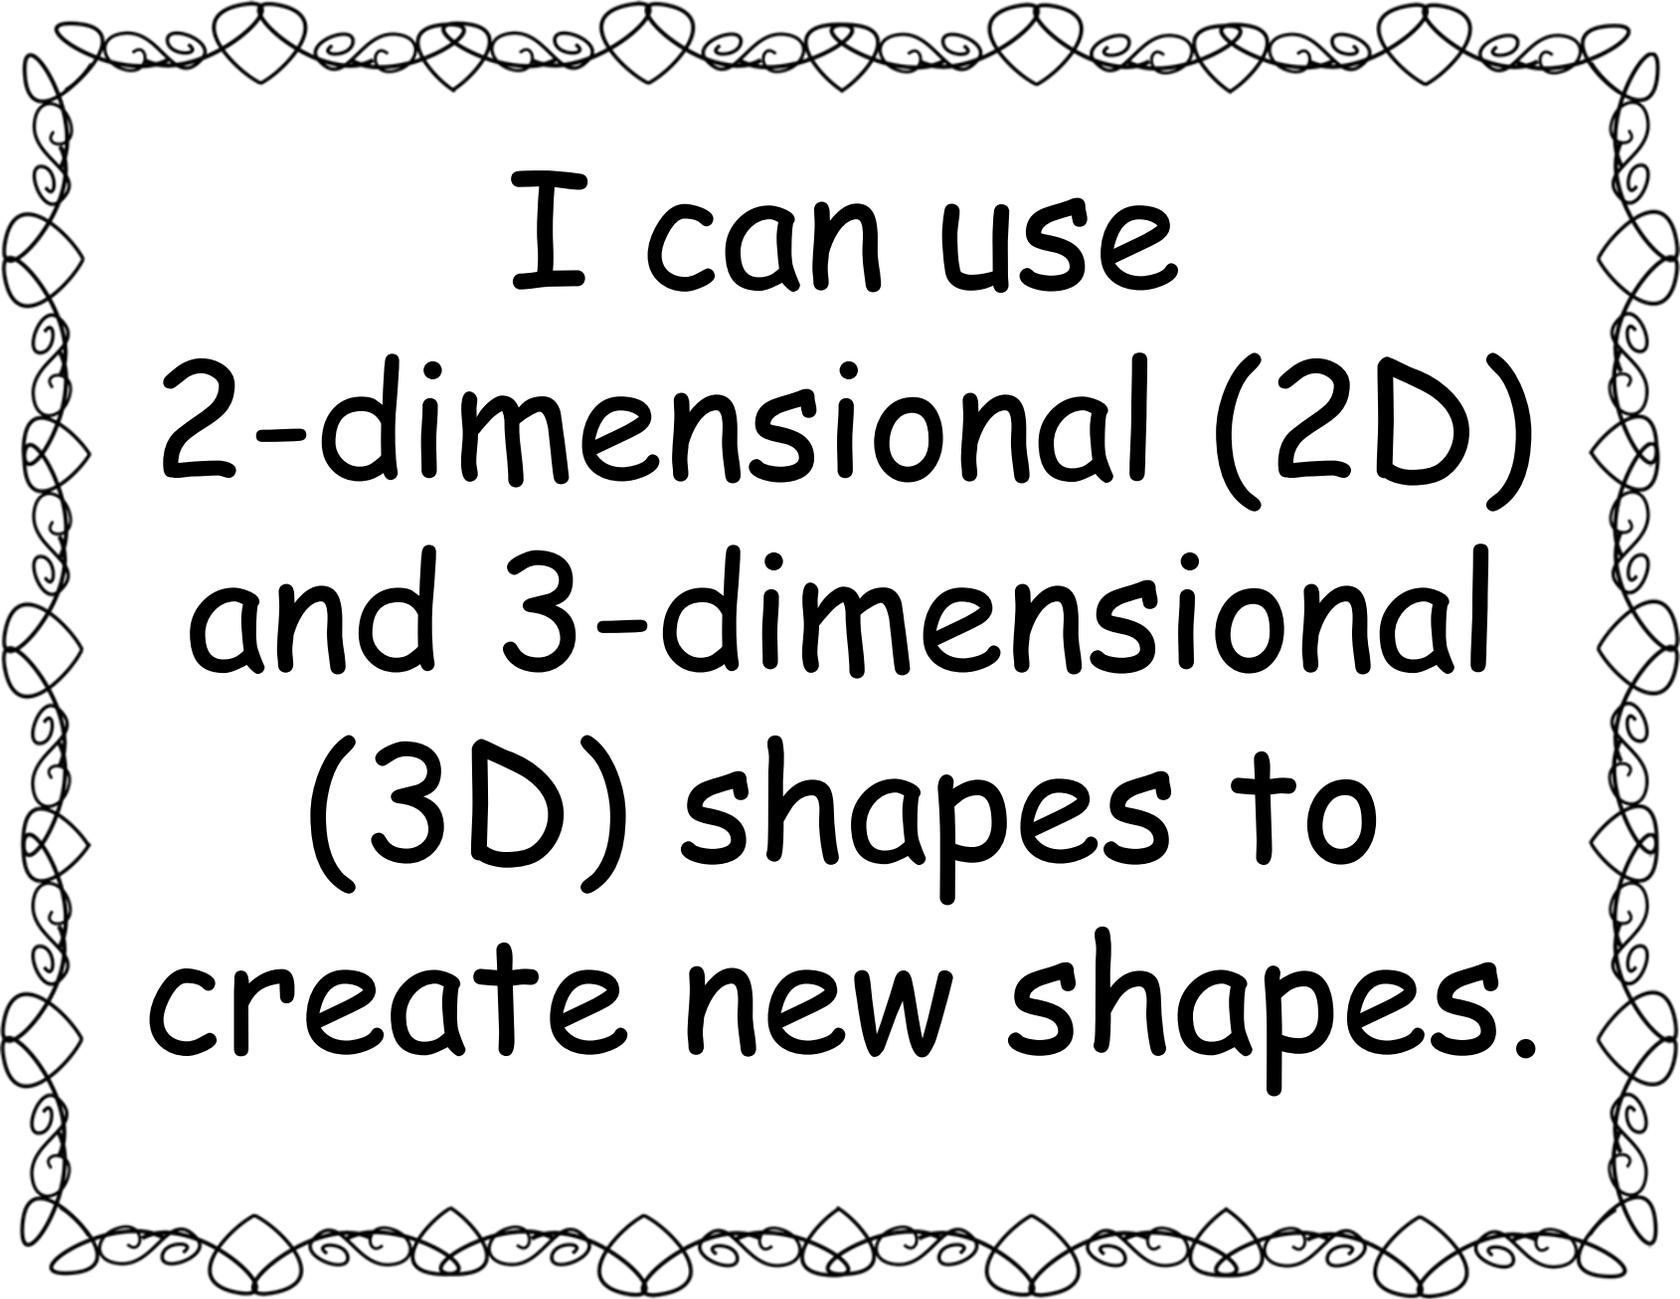

I can create  
two-dimensional (2D)  
shapes.

(rectangles, squares,  
trapezoids, triangles,  
half-circles and  
quarter-circles)

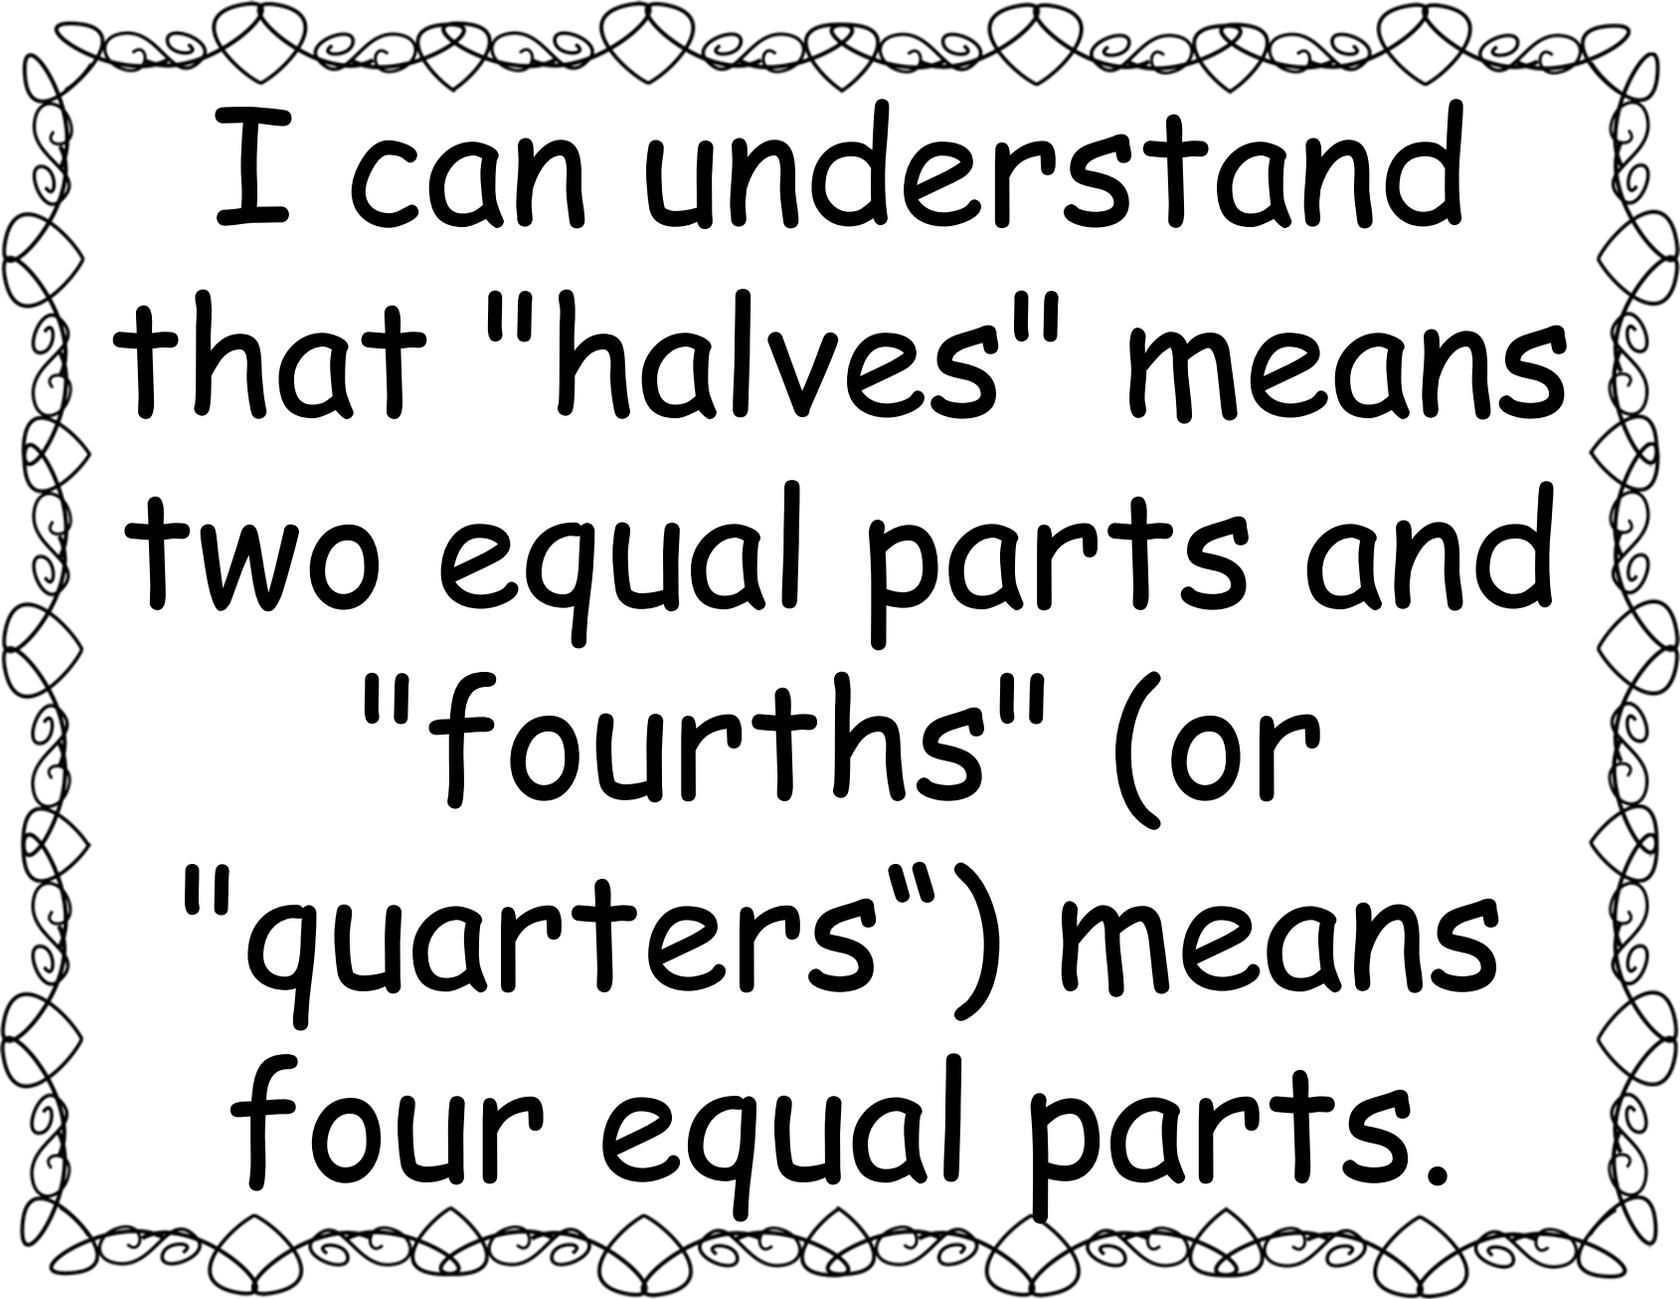

I can create  
three-dimensional  
(3D) shapes.

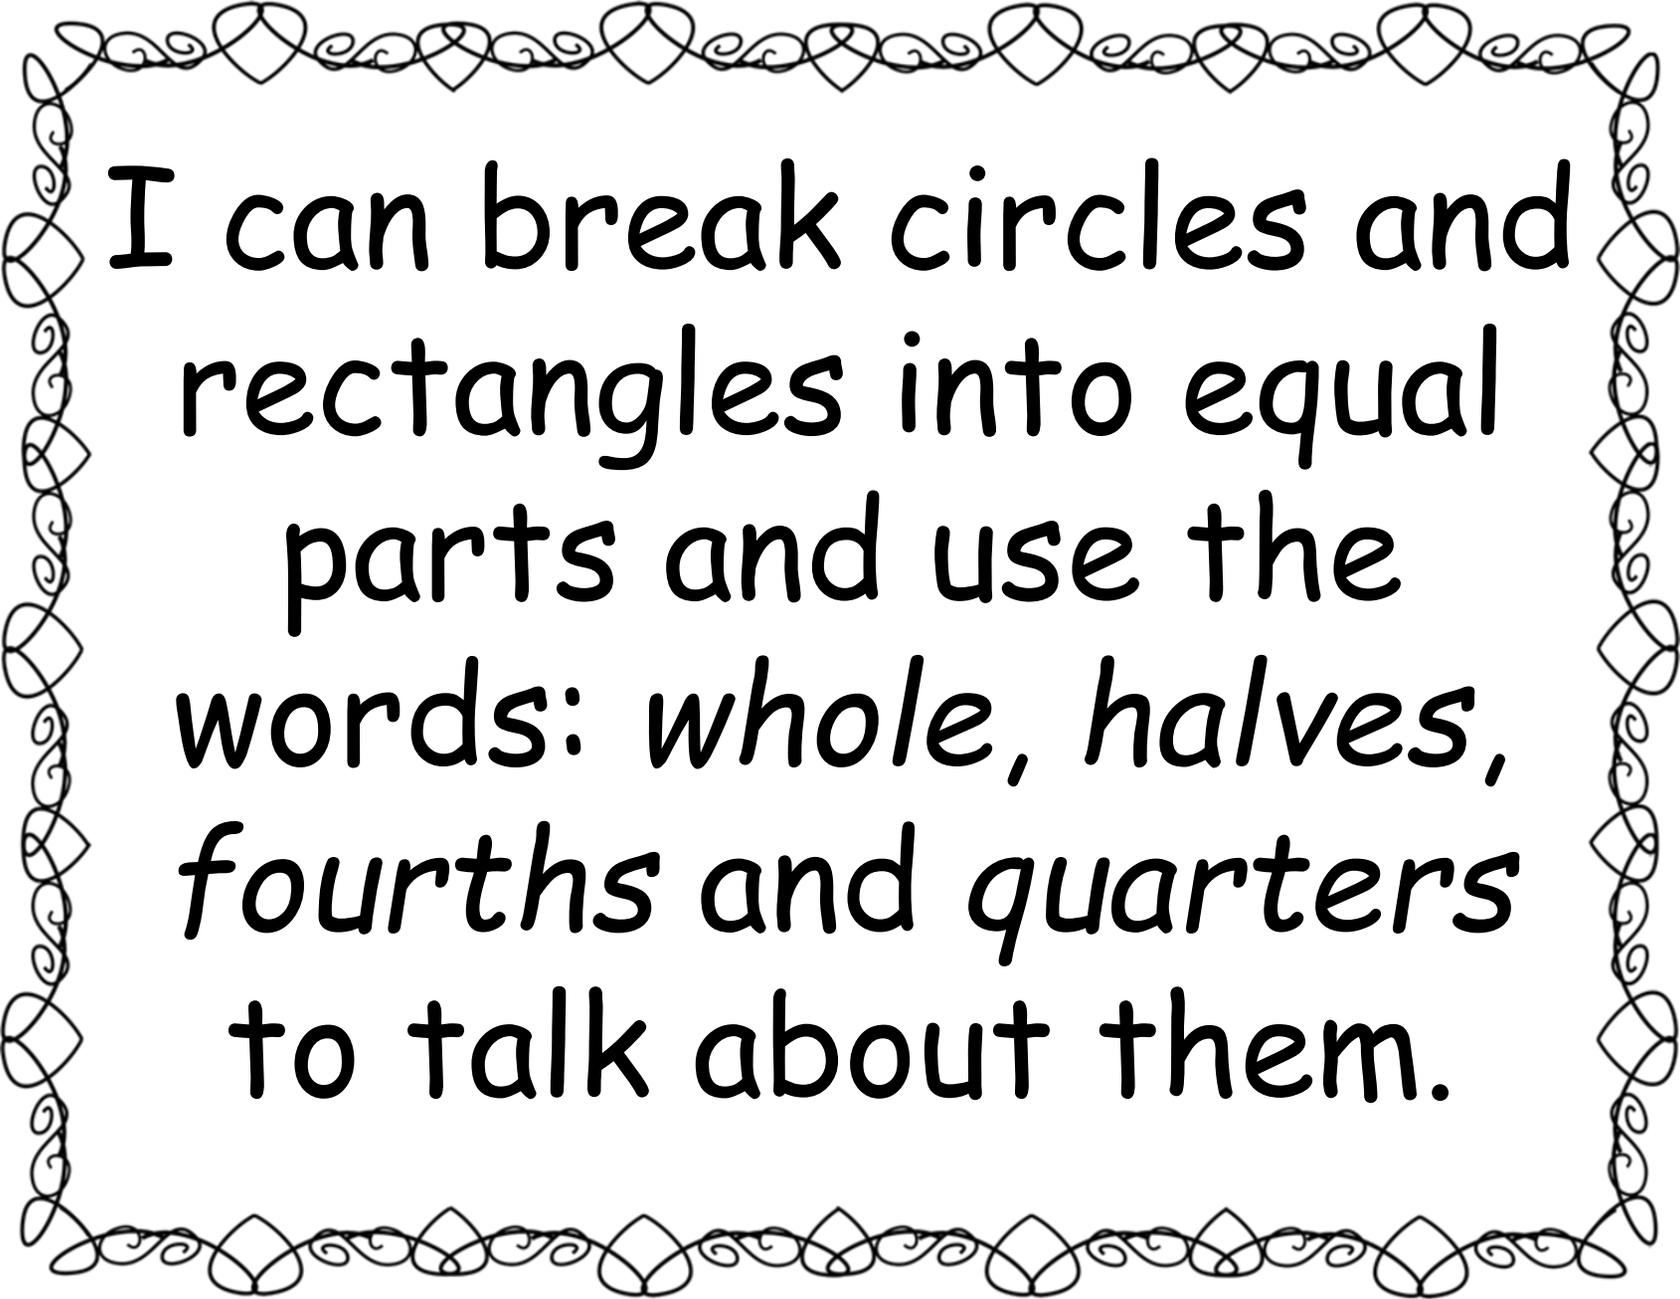

(cubes, right rectangular  
prisms, right circular cones  
and  
right circular cylinders)

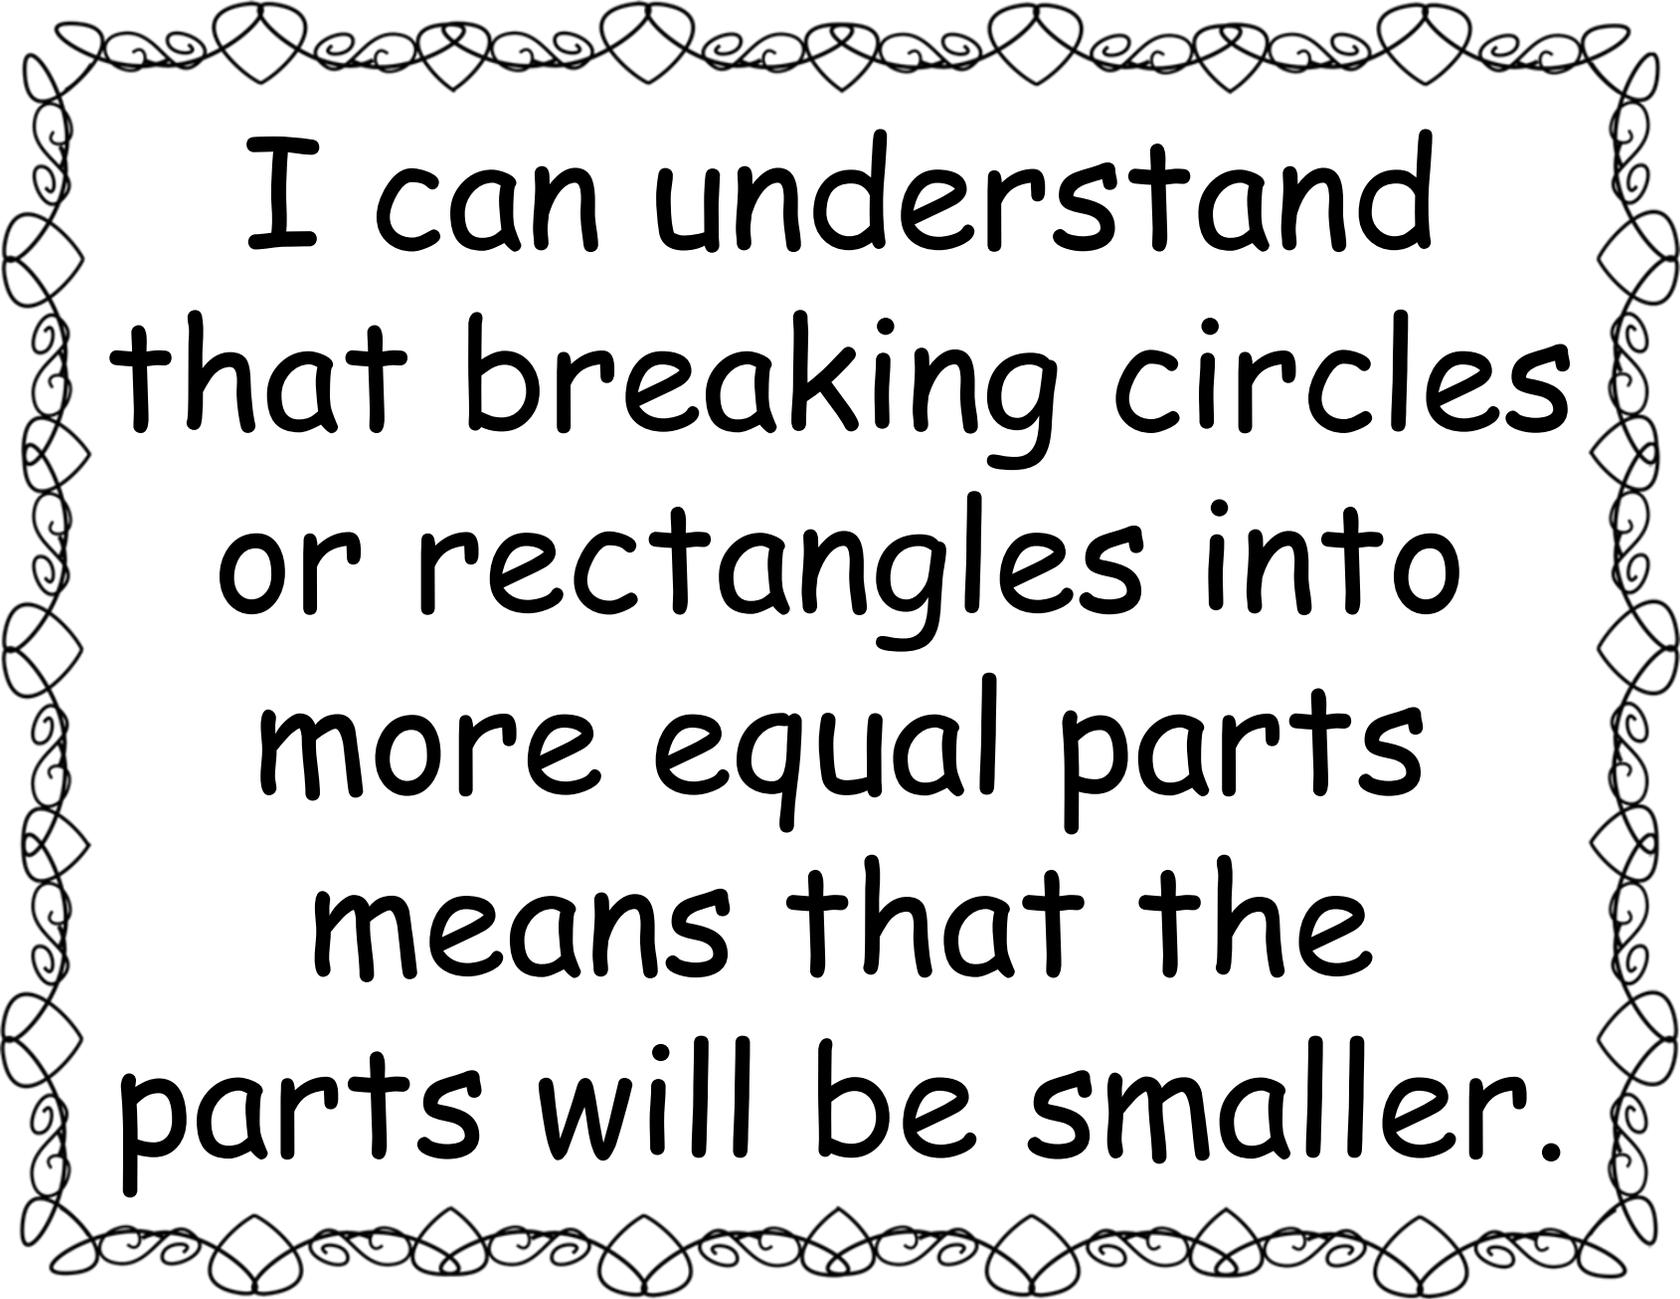

I can use  
2-dimensional (2D)  
and 3-dimensional  
(3D) shapes to  
create new shapes.

I can understand  
that "halves" means  
two equal parts and  
"fourths" (or  
"quarters") means  
four equal parts.

I can break circles and rectangles into equal parts and use the words: *whole, halves, fourths* and *quarters* to talk about them.

I can understand  
that breaking circles  
or rectangles into  
more equal parts  
means that the  
parts will be smaller.
