Vocabulary of the Arctic

Directions: Record your vocabulary words in the boxes. Use words and pictures to show the meaning.
tundra
A cold, treeless area in far northern regions.

hibernate
To be inactive or dormant during a cold period.

migration
To move from one location or region to another, especially seasonally.
Soil below the ground that is permanently frozen.

The thick layer of fat between the skin and the muscle layers in marine mammals.

A trait that develops in plants and animals that makes them better able to survive in their environment.
**Habitat**: The natural environment in which a species or group of species live.

**Arctic**: The region north of the Arctic Circle.

**Shelter**: A structure that provides cover or protection from the weather.
