Counting & Cardinality					
Indicator	Date	Date	Date	Date	Date
	Taught	Retaught	Reviewed	Assessed	ReAssessed
Know nun	nber names a	and the cour	nt sequence.		
K.CC.1. Count to 100 by ones					
and by tens.					
K.CC.2. Count forward beginning					
from a given number within the					
known sequence (instead of					
having to begin at 1).					
K.CC.3. Write numbers from 0 to					
20. Represent a number of					
objects with a written numeral					
0-20 (with 0 representing a					
count of no objects).					
	t to tell the	number of o	bjects.		
K.CC.4. Understand the					
relationship between numbers					
and quantities; connect					
counting to cardinality.					
When counting objects, say the					
number names in the standard					
order, pairing each object with one					
and only one number name and					
each number name with one and					
only one object.					
Understand that the last number					
name said tells the number of					
objects counted. The number of					
objects is the same regardless of					
their arrangement or the order in					
which they were counted.					
Understand that each successive					
number name refers to a quantity					
that is one larger.					
K.CC.5. Count to answer "how					
many?" questions about as					
many as 20 things arranged in a					
line, a rectangular array, or a					
circle, or as many as 10 things in					
a scattered configuration; given					
a number from 1–20, count out					
that many objects.

	Compare numbers.						
K.CC.6. Identify whether the							
number of objects in one group							
is greater than, less than, or							
equal to the number of objects							
in another group, e.g., by using							
matching and counting							
strategies. (Include groups with							
up to ten objects.)							
K.CC.7. Compare two numbers							
between 1 and 10 presented as							
written numerals.							

Operations & Algebraic Thinking

	Taught	Retaught	Reviewed	Assessed	ReAssessed
Understand addition as putting together and adding to, and understand subtraction as taking					
	apart and	taking from.			
K.OA.1. Represent addition and					
subtraction with objects,					
fingers, mental images,					
drawings, sounds (e.g., claps),					
acting out situations, verbal					
explanations, expressions, or					
equations.					
K.OA.2. Solve addition and					
subtraction word problems, and					
add and subtract within 10, e.g.,					
by using objects or drawings to					
represent the problem.					
K.OA.3. Decompose numbers					
less than or equal to 10 into					
pairs in more than one way,					
e.g., by using objects or					
drawings, and record each					
decomposition by a drawing or					
equation (e.g., 5 = 2 + 3 and 5 =					
4 + 1).					
K.OA.4. For any number from 1					
to 9, find the number that					
makes 10 when added to the					
given number, e.g., by using					
objects or drawings, and record					
the answer with a drawing or					
equation.					
K.OA.5. Fluently add and					
subtract within 5.					

Number & Operations in Base Ten						
Indicator	Date	Date	Date	Date	Date	
	Taught	Retaught	Reviewed	Assessed	ReAssessed	
Work with number	ers 11-19 to g	gain foundat	ions for place	e value.		
K.NBT.1. Compose and						
decompose numbers from 11 to						
19 into ten ones and some						
further ones, e.g., by using						
objects or drawings, and record						
each composition or						
decomposition by a drawing or						
equation (such as 18 = 10 + 8);						
understand that these numbers						
are composed of ten ones and						
one, two, three, four, five, six,						
seven, eight, or nine ones.						

Measurement and Data					
Indicator	Date	Date	Date	Date	Date
	Taught	Retaught	Reviewed	Assessed	ReAssessed
Describe a	and compare	measurable	e attributes.		
K.MD.1. Describe measurable					
attributes of objects, such as					
length or weight. Describe					
several measurable attributes of					
a single object.					
K.MD.2. Directly compare two					
objects with a measurable					
attribute in common, to see					
which object has "more					
of"/"less of" the attribute, and					
describe the difference. For					
example, directly compare the					
heights of two children and					
describe one child as					
taller/shorter.					
Classify objects and count the number of objects in each category.					
K.MD.3. Classify objects into					
given categories; count the					
numbers of objects in each					
category and sort the categories					
by count. (Limit category counts					
to be less than or equal to 10.)					

Geometry

Identify and describe shapes (say	Taught	Retaught		Assessed	ReAssessed	
Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).						
K.G.1. Describe objects in the						
environment using names of						
shapes, and describe the relative						
positions of these objects using						
terms such as above, below,						
beside, in front of, behind, and						
next to.						
K.G.2. Correctly name shapes						
regardless of their orientations						
or overall size.						
K.G.3. Identify shapes as two-						
dimensional (lying in a plane,						
"flat") or three-dimensional						
("solid").						
Analyze, compare, create, and compose shapes.						
K.G.4. Analyze and compare						
two- and three-dimensional						
shapes, in different sizes and						
orientations, using informal						
language to describe their						
similarities, differences, parts						
(e.g., number of sides and						
vertices/"corners") and other						
attributes (e.g., having sides of						
equal length).						
K.G.5. Model shapes in the						
world by building shapes from						
components (e.g., sticks and						
clay balls) and drawing shapes.						
K.G.6. Compose simple shapes						
to form larger shapes. For						
example, "Can you join these						
two triangles with full sides						
touching to make a rectangle?"
