

## The Greatest Sum Game

Directions: This is a partner game. Each pair of children should have one deck of digit cards. Each player needs a game sheet.

1. Shuffle the cards and place face down in the middle.
2. For each round, take turns drawing a card and writing that number in any box. Players continue until all of the boxes are filled.
3. When all of your boxes are filled, add the numbers to complete the addition problem. The player with the biggest sum is the winner.
