

# On a Roll!

adding and subtracting three numbers

**Directions:** You will need three dice, a board and a partner!

- 1. Player 1 tosses 3 regular dice. The player may add all 3 together, add 2 of the numbers and subtract the last or any other combination to get a score on the board.**
- 2. Player 1 marks the spot with a chip and scores 1 point.**
- 3. Player 2 tosses the 3 dice and uses the 3 numbers and the operations of addition and subtraction to make a new number. Player 2 marks that number with a chip and scores 1 point. If player 2 can make a number that touches Player 1's number on the board, Player 2 scores 1 extra point.**
- 4. The player with the most points at the end of the game is the winner.**
