Name: _____

Problem Solving: Feet and Inches

Strategy: Make a Table

Problem: Pablo made a chain of Legos that is five feet long. His mother wants to know how long his chain would be if he were to measure it in inches. What will he tell his mother?

Step 1: Circle the math words.
Step 2: Ask yourself: Do I understand the problem?
Step 3: Solve the problem by drawing a picture and/or using the table.

Feet	Inches
1	12
2	

Step 4: My answer is _____

_____

_____

_____

_____
