

2nd Grade Math

Operations & Algebraic Thinking

“I Can” Statements

*I can write and solve problems using
addition and subtraction.*

*I can use different strategies to solve
addition word problems
(within 100).*

*I can use different strategies to solve
subtraction word problems
(within 100).*

*I can add and subtract any numbers from 0
to 20 in my mind.*

I can show that I know my addition facts.

*I can show that I know my subtraction
facts.*

I can work with equal groups of objects to help me start to understand multiplication.

I can group objects to tell if a number is odd or even.

I can write a number sentence to show how adding two of the same number will equal an even number.

I can use addition to help me figure out how many objects are in an array.

I can write a number sentence to show the total number of objects that are in an array.

2nd Grade Math

Number & Operations in Base Ten

“I Can” Statements

I can understand place value.

I can understand and use hundreds, tens and ones to show numbers.

I can show that I understand a bundle of ten "tens" is called a "hundred".

I can show I understand that when I count by hundreds, they all have a certain number of hundreds, 0 tens and 0 ones.

I can count to 1,000 by ones, fives, tens and hundreds.

I can read and write numbers to 1,000 in different ways.

I can compare three-digit numbers using $<$, $=$, and $>$ because I understand hundreds, tens and ones.

I can use what I know about place value to help me add and subtract.

I can add two-digit numbers.

I can subtract two-digit numbers.

*I can add two, three or four 2-digit numbers
to find their sum.*

*I can use strategies to add numbers within
1,000 and know when to regroup.*

I can use strategies to subtract numbers within 1,000 and know when to borrow.

I can use mental math to add and subtract 10 or 100 to any number from 100 to 900.

I can explain why adding and subtracting strategies work using what I know about place value.

2nd Grade Math

Measurement & Data

“I Can” Statements

I can measure and estimate lengths of objects.

I can use different types of tools to measure objects.

I can use two different units to measure the same object and tell how the measurements compare.

I can estimate the lengths of objects using inches, feet, centimeters and meters.

I can tell the difference between the lengths of two different objects.

I can use what I know about addition and subtraction to understand length.

I can use addition and subtraction to solve measurement problems.

I can make and use a number line.

I can understand how to tell time.

I can tell time to the five minute marks on a clock.

I can use a.m. and p.m. correctly when I am telling time.

I can count money.

I can count money to help me solve word problems.

I can understand how information is shared using numbers.

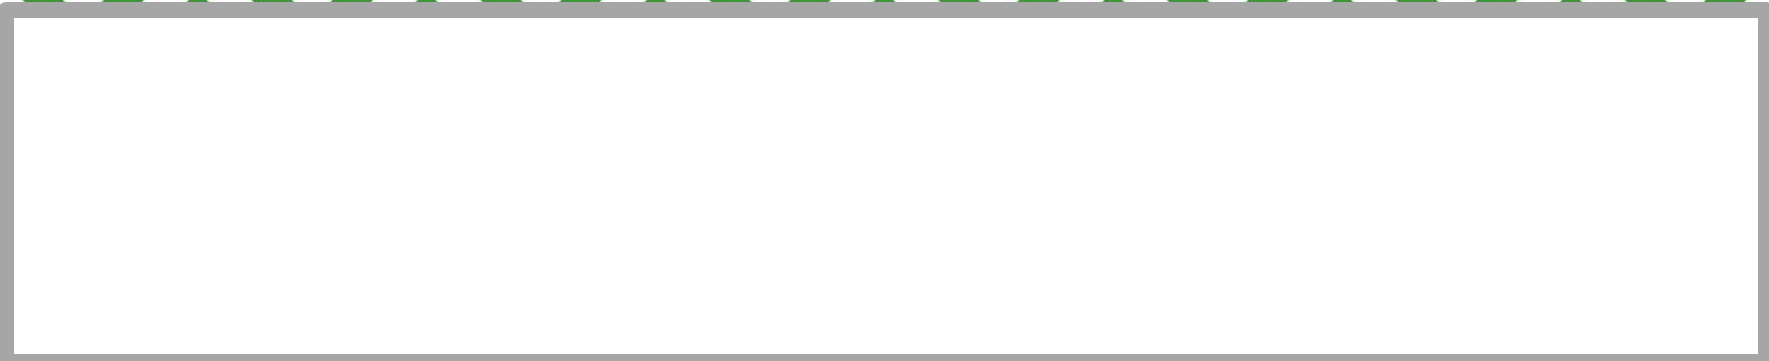

I can make a table to organize information about measurement.

I can show measurements by making a line plot.

I can draw a picture graph to share number information.

I can draw a bar graph to share number information.

I can solve problems using information from a bar graph.

2nd Grade Math

Geometry

“I Can” Statements

I can understand shapes better by using what I notice about them.

I can name and draw triangles, quadrilaterals, pentagons, hexagons and cubes.

I can find the area of a rectangle by breaking it into equal sized squares.

I can divide shapes into equal parts and describe the parts with words like halves or thirds.

I can understand that equal parts of a shape may look different depending on how I divide the shape.
