	<hr/> <hr/> <hr/>

**tundra**

© www.thecurriculumcorner.com

A cold, treeless  
area in far  
northern regions.

**hibernate**

© www.thecurriculumcorner.com

To be inactive or  
dormant during a  
cold period.

**migration**

© www.thecurriculumcorner.com

To move from one  
location or region  
to another,  
especially  
seasonally.

**blubber**

© www.thecurriculumcorner.com

The thick layer of fat between the skin and the muscle layers in marine mammals.

**permafrost**

© www.thecurriculumcorner.com

Soil below the ground that is permanently frozen.

**adaptation**

© www.thecurriculumcorner.com

A trait that develops in plants and animals that makes them better able to survive in their environment.

**habitat**

© www.thecurriculumcorner.com

The natural environment in which a species or group of species live.

**Arctic**

© www.thecurriculumcorner.com

The region north of the Arctic Circle.

**shelter**

© www.thecurriculumcorner.com

A structure that provides cover or protection from the weather.

# FACTS

© www.thecurriculumcorner.com

Arctic foxes stay together and raise their young in underground dens.

© www.thecurriculumcorner.com

The arctic fox is also known as the white fox, the polar fox or the snow fox.

© www.thecurriculumcorner.com

Some arctic animals don't begin to shiver until the temperature is over 90° below zero.

© www.thecurriculumcorner.com

An adult male polar bear is called a boar and an adult female is called a sow.

© www.thecurriculumcorner.com

Seals make up most of a polar bear's diet.

© www.thecurriculumcorner.com

Pacific walruses and beluga whales are two endangered animals that live in the Arctic Ocean.

© www.thecurriculumcorner.com

The arctic ground squirrel is prey to many other animals in the Arctic.

© www.thecurriculumcorner.com

Arctic terns (a seabird) have the longest migration known in the animal kingdom.

© www.thecurriculumcorner.com

At birth, a baby harp seal has a yellowish coat that turns white for about 12 days before it becomes a silvery-gray.

© www.thecurriculumcorner.com

There are only about 50 species of land mammals that can be found in the Arctic tundra.

© www.thecurriculumcorner.com

It is cool how  
Arctic foxes raise  
their young in  
underground dens.

© www.thecurriculumcorner.com

White foxes are  
beautiful animals  
and should not be  
killed.

© www.thecurriculumcorner.com

Nobody should  
live where the  
temperatures get  
so cold.

© www.thecurriculumcorner.com

Baby polar bears  
are the cutest of  
all the Arctic  
animals.

© www.thecurriculumcorner.com

It is very sad and  
horrible that  
polar bears attack  
baby seals.

© www.thecurriculumcorner.com

Saving endangered  
animals should be  
the most important  
cause to everyone  
on earth.

© www.thecurriculumcorner.com

Polar bears are tall and very scary when they stand on their hind legs.

© www.thecurriculumcorner.com

Flying across the Arctic Ocean is too far for birds to have to go.

© www.thecurriculumcorner.com

Everyone should want to learn about animals living in the Arctic.

© www.thecurriculumcorner.com

The animals in the Arctic are fun to watch.
