

Name: _____

My Science Lab Notes

Experiment: _____

step 1: Ask questions. Think about what you want to learn. What problem will you try to solve?

step 2: Research the problem. Think about what you want to learn. List the key words you will use when you search on the internet.

step 3: Form a hypothesis. What do you think is the answer to your problem?

step 4: Test your hypothesis. How will you test your hypothesis?
Write the steps you will follow below.

1.

2.

3.

4.

5.

6.

step 5: Share your results. What were your results? How do you plan to share those results with others?

step 6: Draw a conclusion. What did you learn from the experiment?
