Why do people plant gardens? Some people like to look at different plants and flowers. Other people plant fruits and vegetables so they can grow fresh food.

It is important to plan your garden before you start. Think about how much sun your plants need and how they will get water.

Be sure to plant your seeds at the right time of the year. You don't want to plant your garden when it is still too cold outside!

Follow the directions on your seed packets as you plant them. Some seeds need to be spaced farther apart than others. Some seeds need to be planted deeper in the ground than others.

Our class planted a garden. We are growing tomatoes, strawberries and flowers.

We will take turns watering the plants. We will also need to pull weeds to keep our garden healthy.

We are excited to pick the tomatoes and strawberries when they are ripe.

It has been fun to plan and plant a garden. I want to make one at my house, too!

Where can we buy the supplies to make our own garden?

Wow! I didn't realized how much work a garden would be.

After we plant the seeds, how long will we have to wait before they sprout?

I see the seeds sprouting out of the ground!
