Four in a Row

Multiplication

How to Play: Take turns with your partner. Choose two numbers from the small square. Multiply the numbers. Find the product in the large square and cover it with a marker. Use all the numbers once before starting over. The first player to get four in a row wins!

1	7	2
8	4	5
10	3	6

28	30	10	8	16	7
20	56	40	18	32	24

50	3	16	30	24	60
80	32	15	21	70	56

Four in a Row

Multiplication Cover-it-Up!

Play with a partner. Cover a set of numbers to make an equation, say the equation out loud for your partner to hear. For example, $7 \times 8 = 56$. The last person to cover a full equation is the winner.

9	2	9	5	7	45	63
18	40	28	56	6	8	9
8	7	3	5	9	4	16

25. The pool in our town had 528 visitors this week. About how many visitors were there? (Round to the nearest hundred).

26. An island in the Pacific has an area of about 23 billion, 468 million, 442 thousand, 206 square inches. Write that number in standard form.

27. Riley collected 18,296 stamps in 2016. He collected 24,092 stamps in 2017. How many more did he collect in 2017?

28. Ellie owns a video game store. Last year she sold \$232,810 worth of merchandise. Her costs were \$92,993. How much profit did she make?

29. If Jon buys a shirt for \$28.14, a pair of pants for \$35.18 and a hat for \$14.93, about how much will he spend?

30. In its first year a car dealer sold 3,928. The next year it only sold 2,899. How many more did it sell in its first year?

31.

Evan bought 326 cans of soda pop and 412 cans of lemonade to sell at the soccer game. He sold 253 cans of soda pop and 309 cans of lemonade. How many cans did he have left?

32.

The Pacers scored 13 more points than the Bulls in the championship game. Write an expression that represents the number of points the Pacers scored.

33.

A famous tennis player earned \$1,755,720 in prize money at a tournament. Round that number to the nearest hundred thousand dollars.

34.

Sam scored a 8.95 in a gymnastics event at the state meet. Kayla scored 0.655 more than Polly in the same event. What was Kayla's score?

35.

Lilly bought five bags of apples at the grocery. Each bag contained 12 apples. Rio bought twice as many apples as Lilly. How many apples did Rio buy?

36.

A factory packs each of their large crates with 318 packages of coffee. How many packages are there in 33 crates?
