**That shooting star is
amazing!**

**The nearest star to Earth is
the sun.**

**Did you know that Earth is
a part of the Milky Way
Galaxy?**

**Astronomers can
determine the age of a star
by observing it closely.**

**Look how bright that star
is.**

Think about how many stars are in the sky.

Do you notice anything about the shape the stars in the sky make?

Astronomers have grouped stars into constellations.

I learned that stars are grouped into galaxies.

Do you know the names of any constellations?

Most stars are between 1 billion and 10 billion years old!

**You need to read a book
about stars.**

**Stars in the Milky Way
Galaxy are made of mostly
hydrogen and helium.**

**How many stars did you
count in the sky?**

I love watching the stars!

**Make a journal entry
about what you observe in
the sky tonight.**

**You need to read carefully to
understand what the author is
trying to teach you about stars.**
