

point

the spot formed at the intersection between two distinct lines

line

a straight path connecting two points that extends beyond the points in both directions

line
segment

part of a line between two points; all of the points between two given points and including those points

ray

a part of a line
starting at a
particular point and
extending infinitely in
one direction

right
angle

an angle that
measures 90°

acute
angle

an angle that
measures less than
 90°

obtuse
angle

an angle that
measures more than
 90° but less than 180°

perpendicular
lines

line segments that
intersect at an angle
of 90°

parallel
lines

line segments that
never intersect and
are always the same
distance apart

line of
symmetry

the line that splits a
figure in half so that
creating two sides
that are mirror
images of each other

right
triangle

a triangle that has a
right (90°) interior
angle

isosceles
triangle

a triangle with two
sides that are the
same length and two
equal internal angles
